Overview & Current Events

New York Community Bancorp is the parent of a state-chartered bank called New York Community Bank. The wholly owned subsidiary operates 236 branches in New York, New Jersey, Ohio, Florida, and Arizona. The holding company was founded in 1993 but the banking operations of the company can be traced to 1859. The bank focuses on multi-family loans in New York City, particularly in buildings that are rent controlled. That book of business is about three-quarters of its entire lending portfolio. The bank has a market capitalization of \$5.4 billion.

New York Community Bancorp reported fourth quarter and full-year earnings on January 26th, 2022, and results were largely in-line with expectations. The bank said it saw record quarterly loan growth in the final quarter of the year, as well as deposit growth and improving asset quality. Adjusted earnings-per-share came to 31 cents, which was up from 27 cents in the same period a year ago.

Pre-provision net revenue was \$203 million, up 7% year-over-year. Excluding the impact of merger-related expenses, that number was up 11% year-over-year. The bank originated \$4.6 billion in new loans and leases, up 18% year-over-year, and up 55% from a weak third quarter. Multifamily originations were up 62% quarter-over-quarter, while specialty finance originations were up 52% from Q3. Provisions for credit losses were \$4 million, a sizable improvement from \$11 million a year ago. Net interest margin was 2.44%, flat to Q3 but down three basis points year-over-year.

Loans held for investment were up \$2.1 billion to \$45.7 billion, up 19% on an annualized basis from Q3. Total deposits were up 5% to \$35.1 billion.

We initiate 2022 earnings estimates at \$1.40 following a terrific year in 2021.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$1.13	\$1.08	\$1.09	-\$0.11	\$1.01	\$0.81	\$0.79	\$0.77	\$0.87	\$1.24	\$1.40	\$1.79
DPS	\$1.00	\$1.00	\$1.00	\$1.00	\$0.68	\$0.68	\$0.68	\$0.68	\$0.68	\$0.68	\$0.68	\$0.68
Shares¹	439	441	443	485	487	488	474	467	464	465	467	472

NYCB's growth prospects are somewhat murky. The bank's leverage to New York City with its multi-family loan portfolio makes its results more volatile than a diversified bank that has lots of different types of lending strategies. In recent years, New York City passed stricter regulations that make it more difficult for landlords to raise rents on rent-controlled units, which is where NYCB is heavily leveraged. This could crimp the bank's customers' ability to improve properties over time and raise prices, which may cause some of them to lose the ability to service their loans. Some of this occurred in 2019, but we note 2020 saw this headwind abate somewhat. NYCB has been prudent in its underwriting standards, so risks are still somewhat low, but the possibility of lower growth because of this is noticeable. We note 2021 results showed improving credit quality, so this concern may have passed for the time being.

On the bright side, NYCB's deposit mix is very strong for an environment where rates are moving around. About 40% of its deposits are in time deposits, so those rates are locked in until maturity. In addition, strong deposit growth should help NYCB pay down more expensive borrowings and improve margins, along with strong expense controls. In total, we

New York Community Bancorp (NYCB)

Updated February 2nd, 2022, by Josh Arnold

forecast 5% earnings-per-share growth from 2022's level. We note that the bank's loan-to-deposit ratio is extremely high, meaning risks are higher, and the runway for additional growth is essentially nothing due to already-high leverage. In addition, NYCB has tremendously high exposure to the markets in and surrounding New York City.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	11.6	13.5	14.6	---	15.0	16.7	14.6	14.9	11.4	9.7	8.3	11.0
Avg. Yld.	7.6%	6.8%	6.3%	5.8%	4.5%	5.0%	5.9%	5.9%	6.8%	5.6%	5.9%	3.5%

We see fair value for NYCB at 11 times earnings based primarily upon peer valuations. Today, the stock trades for just 8.3 times our estimate of 2022 earnings-per-share, so it is significantly undervalued in our view. We see a tailwind from the valuation, and investors get a nearly 6% current yield as well.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	88%	93%	92%	---	67%	84%	86%	88%	78%	55%	49%	38%

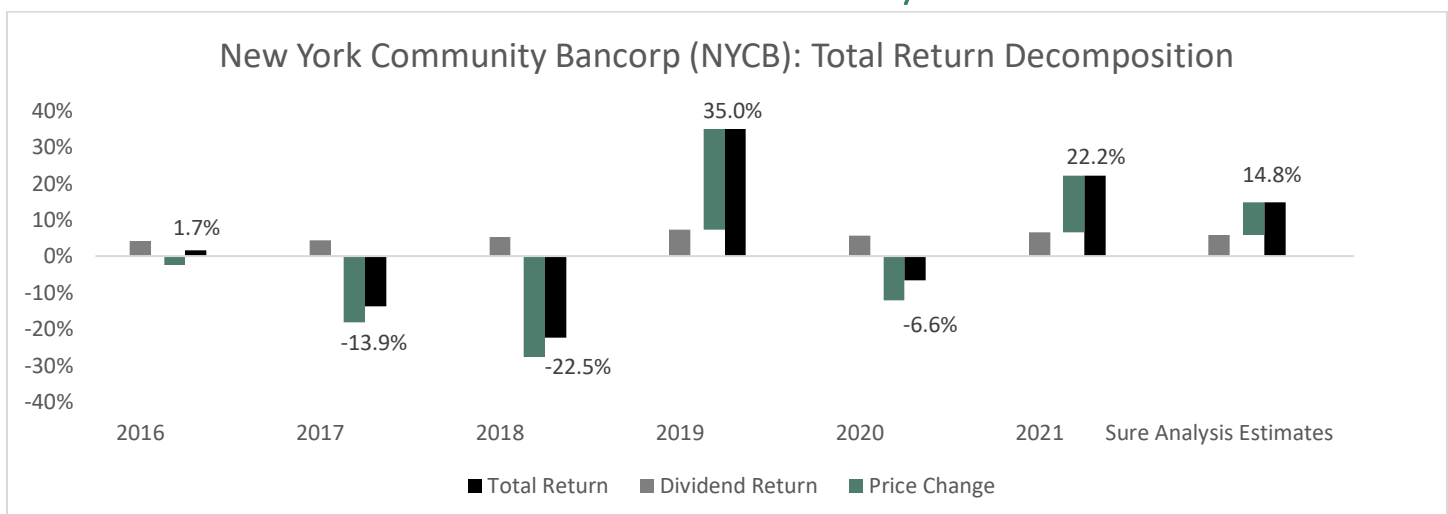

NYCB doesn't necessarily have a competitive advantage, as those are difficult to come by in banking. Indeed, we suggest that the bank's leverage to a narrow sliver of the New York City real estate market makes its results more volatile than most other banks' results and is a *disadvantage*. On the other hand, the focus on these rent-controlled apartments should make its recession performance quite strong and indeed, during the Great Recession, NYCB continued to grow earnings. That is quite an attractive trait, and a rare one, for a bank.

The payout ratio has improved greatly in the past two years, and NYCB is in a much better position to afford its current payout. We don't foresee any cuts upcoming, and while the bank could raise the payout, there have been no signs of any appetite for that from management. The Flagstar deal, which is yet to close, would indicate growth is favored by management instead of dividend increases.

Final Thoughts & Recommendation

NYCB offers investors strong total annual return potential with some measure of risk involved. The stock's yield is certainly attractive and shares trade under our estimate of fair value. New York Community Bancorp is back to growth, with Q4 results being quite strong. With projected returns of 14.8%, we are reiterating the stock at a buy rating.
