## Overview & Current Events

Phillips 66 was spun off from ConocoPhillips in 2012. Phillips 66 has a market capitalization of \$36.9 billion and operates in four segments: refining, midstream, chemicals, and marketing. It is a diversified company with each of its segments behaving differently under various oil prices, in the absence of a severe recession. When oil prices collapsed in 2014, the refining segment became by far the most profitable segment, as low oil prices improved demand for oil products and boosted refining margins. In 2019, the refining segment generated 48% of the total earnings of Phillips 66.

In late January, Phillips 66 reported (1/28/22) financial results for the fourth quarter of fiscal 2021. The company continued to recover impressively from the pandemic. Refining margins greatly increased thanks to improved demand for oil products and thus the refining segment posted an adjusted profit of \$404 million, its first material profit in two years. In addition, midstream, chemicals and marketing segments posted strong earnings, up 37%, 301% and 27%, respectively, over the prior year's quarter. As a result, the company switched from an adjusted loss per share of -\$1.16 to a profit per share of \$2.94 and beat analysts' consensus by an impressive \$1.01. We reiterate that Phillips 66 is more defensive than pure refiners in the adverse scenario of a prolonged pandemic. Its minor loss of -\$0.89 per share in 2020 is a testament to the diversified business model of Phillips 66.

Phillips 66 also announced that it will buy all the units of Phillips 66 Partners LP (PSXP) it does not own in an all-stock deal valued at \$3.4 billion in order to simplify its structure across its integrated portfolio. The unitholders of PSXP will receive 0.5 shares of Phillips 66 for each unit of PSXP they own. The deal is expected to close in the first quarter of 2022.

## Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
<b>EPS</b>	\$6.48	\$5.92	\$7.10	\$7.73	\$2.92	\$4.58	\$11.85	\$8.05	-\$0.89	\$5.70	<b>\$7.60</b>	<b>\$9.70</b>
<b>DPS</b>	\$0.45	\$1.33	\$1.89	\$2.18	\$2.45	\$2.73	\$3.10	\$3.50	\$3.60	\$3.62	<b>\$3.68</b>	<b>\$4.10</b>
<b>Shares<sup>2</sup></b>	637	619	571	547	530	519	464	441	439	441	<b>500</b>	<b>450</b>

Growth projects in the oil industry take many years to start bearing fruit and hence there is a great lag between capital expenses and their resultant cash flows. Fortunately for the shareholders of Phillips 66, the company is currently in the positive phase of its cycle. While it has greatly reduced its capital expenses in recent years, it has begun to reap the benefits from past investments. In addition, the record earnings of the midstream, chemicals and marketing segments in 2021 are additional testaments to the widely recognized discipline of management to invest only in high-return projects.

The pandemic greatly affected the results of Phillips 66 in 2020 but the company is now recovering strongly, along with the energy market. As soon as the pandemic subsides, Phillips 66 will also benefit from the new international marine standard (IMO 2020), which has forced vessels sailing in international waters to burn low-sulfur diesel instead of heavy fuel oil. Phillips 66 also has many ongoing growth projects in its midstream segment. Overall, we expect 5.0% average annual earnings-per-share growth over the next five years.

## Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	6.4	10.5	11.1	10.3	27.7	18.5	8.9	12.4	---	13.6	<b>11.1</b>	<b>12.0</b>
Avg. Yld.	1.1%	2.1%	2.4%	2.7%	3.0%	3.2%	2.9%	3.5%	5.3%	4.7%	<b>4.4%</b>	<b>3.5%</b>

Phillips 66 is now trading at a forward price-to-earnings ratio of 11.1. This valuation level is lower than its 10-year average of 13.2. In order to be conservative, we assume a fair earnings multiple of 12.0 for this stock. If the stock trades at our fair value estimate in five years, it will enjoy a 1.7% annualized gain in its returns.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	6.9%	22.5%	26.6%	28.2%	83.9%	59.6%	26.2%	43.5%	---	63.5%	<b>48.4%</b>	<b>42.3%</b>

Phillips 66 has a significant competitive advantage, namely the discipline of its management to invest only in high-return projects. However, despite its diversified business, the company is cyclical, just like most oil companies. In the recent downturn of the oil sector, between mid-2014 and 2017, low oil prices resulted in high refining margins thanks to healthy underlying economic growth. However, in the Great Recession, the price of oil products plunged along with the price of oil and resulted in low refining margins. The downturn from the pandemic was much fiercer than the recent downturn and hence it forced Phillips 66 to post its first annual loss in its 10-year history.

## Final Thoughts & Recommendation

Phillips 66 is a well-managed company, properly positioned for most scenarios of oil prices. The stock has rallied 31% in less than five months, but it remains attractive. We expect the stock to offer a 10.1% average annual return over the next five years. We thus rate it as a buy but we note that the stock is suitable only for patient, long-term investors.
