Overview & Current Events

Skyworks Solutions is a semiconductor company that designs, develops, and markets proprietary semiconductor products used worldwide. Its products include antenna tuners, amplifiers, converters, modulators, receivers, and switches. Skyworks' products are used in diverse industries, including automotive, connected home, industrial, medical, smartphones, and defense. The company traces its roots back to a merger in 2002, is headquartered in Woburn, Massachusetts, employs over 8,400 people, and has a market capitalization of \$22.4 billion.

On February 3rd, 2022, Skyworks reported first-quarter results for Fiscal Year (FY)2022. The company fiscal year ends at the end of September. Revenue grew 15% for the first quarter to \$1.510 billion compared to 1Q21, which was flat to consensus estimates. On a GAAP basis, operating income for the first quarter was \$445.9 million with diluted earnings per share of \$2.40, which is lower than the \$3.05 per share in diluted earnings the company made in 1Q2021. On a non-GAAP basis, operating income was \$585.8 million, with non-GAAP diluted earnings per share of \$3.14 compared to \$3.36 per share in the same quarter last year. Overall, Skyworks delivered first-quarter solid results, with double-digit sequential growth in both revenue and earnings per share. Management expects that demand for connectivity to start rapidly expanding across multiple essential wireless protocols, including 5G, advanced Wi-Fi, and precision GPS. Key business highlights for the quarter were supported the launch of Wi-Fi access points at Siemens, powered NETGEAR's latest Wi-Fi 6E mesh system, delivered industrial IoT solutions to Itron, Honeywell, and Thales supporting smart energy and factory automation, captured design wins at Quectel for their enterprise machine-to-machine platforms, etc.

Skyworks management team provided an outlook for the second quarter for the Fiscal Year 2022. They anticipate revenue between \$1.300 billion and \$1.360 billion, with non-GAAP diluted earnings per share of \$2.62 at the midpoint. We estimate EPS for FY2022 to come in at \$11.55, increasing 10.0% from FY2021 earnings.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$1.90	\$2.20	\$3.24	\$5.27	\$5.57	\$6.45	\$7.22	\$6.17	\$6.13	\$10.50	\$11.55	\$18.60
DPS	\$0.00	\$0.00	\$0.22	\$0.65	\$1.06	\$1.16	\$1.34	\$1.58	\$1.88	\$2.24	\$2.24	\$3.45
Shares²	192.0	192.0	192.0	195.0	192.0	186.0	183.0	175.0	169.0	167.0	167.0	167.0

Skyworks has enjoyed tremendous growth over the past decade thanks to smartphones' proliferation that use its chips. The company increased its EPS by 20.9% per year over the past nine years and 12.4% over the past five years. These past two years of 2020 and 2021 saw a significant upturn for many semiconductor companies, including Skyworks, but analysts, on average, expect 15% earnings growth over the next three years. However, our base case is for ~10.0% growth over the next five years. The company has been increasing its dividend since 2014, where the three-year average dividend growth rate is 16.1%, and it has a low payout ratio of 19% based on this year's expected earnings of \$11.55 a share.

¹ Ex-Dividend and Dividend Payment Dates are estimates.

² Share count is in millions.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	10.3	11.6	19.4	14.4	12.9	14.3	9.6	19.6	23.5	15.7	11.8	15.0
Avg. Yld.	---	---	0.4%	0.8%	1.4%	1.1%	1.5%	2.0%	1.3%	1.3%	1.6%	1.2%

Skyworks has averaged a 15.1 P/E ratio over the past nine years. We consider a P/E ratio of approximately 15 to be fair. At least until the company can demonstrate a broader customer base and diversify away from its smartphone focus. However, the stock is undervalued to our fair price. The current dividend yield is higher than its five-year average.

Safety, Quality, Competitive Advantage, & Recession Resiliency

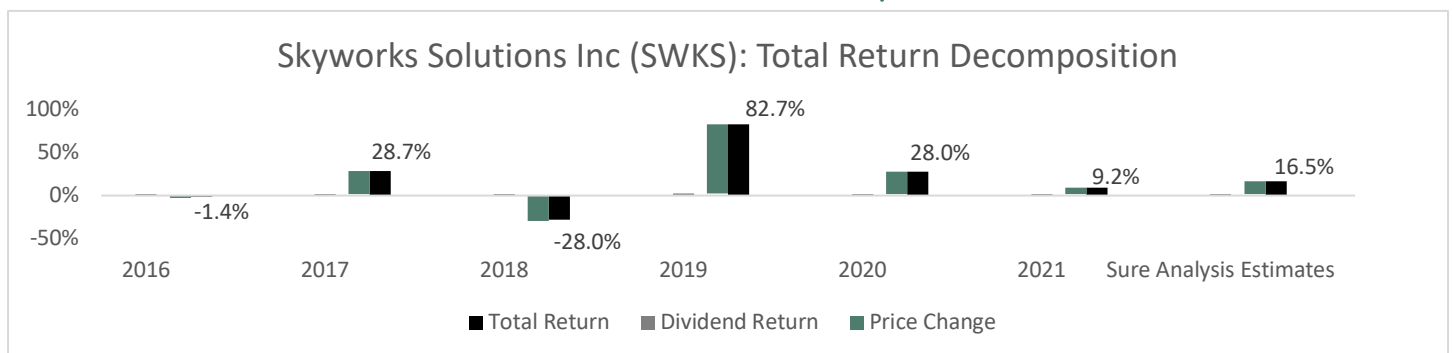

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	---	6.8%	12.3%	19.0%	18.0%	18.6%	25.6%	30.7%	21.3%	19%	19%

Skyworks's advanced products give it a small economic moat in the niche of wireless technology, but the company is heavily reliant on the smartphone market, particularly on Apple. Over the past three years, Skyworks has generated 39%-51% of its annual revenue from Apple. This has been a tremendously profitable Skyworks relationship during the proliferation of iPhones and other smartphones over the past decade. Still, as iPhones and other smartphones become saturated in the marketplace, Skyworks is increasingly looking to diversify into other markets. The company is expected to benefit from the 5G cellphone technology shift with more revenue earned per phone. Still, it seeks to strengthen its foothold in automobile connectivity, smart homes, and other Internet of Things end markets to diversify its customer base outside of the phone market. Thus far, the company has generated very high returns on invested capital, often over 20% per year. Skyworks has over \$1,016.9 million in cash and cash equivalents and zero debt. This gives the company tremendous flexibility and resiliency to offset some of its concentrated customer base risks and move forward with its growth plans. The dividend is new but very well covered by earnings, and we consider it very safe. The company remained profitable during the previous recession.

Final Thoughts & Recommendation

Skyworks is a specialized semiconductor company that has generated desirable growth rates and capital returns during the past decade. The company's earnings growth will likely be less stellar in the future because its crucial growth driver in recent years, the smartphone market, has matured. Skyworks' key opportunity and challenge will be diversifying into other industries and broadening its customer base while maintaining a solid presence in the phone market. We expect 16.5% forward returns for the next five years. We give SWKS a buy recommendation as the price has gone lower from our last report.
