## Overview & Current Events

National Bank of Canada (or simply National Bank) is the sixth-largest bank in Canada behind the Big Five banks with Royal Bank of Canada (RY) and Toronto-Dominion Bank (TD) leading at the top. National Bank's historical roots go as far back as 1859. Since 1993, it has maintained or increased its dividend per share every year. All figures in this report are in U.S. dollars unless otherwise specified.

The bank reported results for fiscal Q1 2022 on 02/25/2022. Against fiscal Q1 2021, it reported revenue growth of 11% to C\$2,466 million, net income growth of 22% to C\$932 million, and adjusted earnings-per-share ("EPS") growth of 23% to C\$2.65. This growth was driven by revenue growth across all its business segments, reversals of allowances for credit losses on non-impaired loans given improvements in the macroeconomic outlook and credit conditions, and a reduction in provisions for credit losses on impaired loans. Its Personal and Commercial segment increased net income by 27% to C\$317 million year over year (YOY), its Wealth Management segment increased net income by 11% to C\$176 million, the Financial Markets segment saw a 20% increase in its net income to C\$307 million, while the net income of its U.S. Special Finance and International segment witnessed a jump of 9% to C\$136 million. Adjusted return on equity ("ROE") rose to 21.7% from 21.2% a year ago. The bank's capital position remains solid with a Common Equity Tier 1 ratio at 12.7%. We increase our 2022 EPS estimate to US\$7.23.

## Growth on a Per-Share Basis

| Year                      | 2012   | 2013   | 2014   | 2015   | 2016   | 2017   | 2018   | 2019   | 2020   | 2021   | 2022          | 2027          |
|---------------------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|---------------|---------------|
| <b>EPS</b>                | \$3.97 | \$3.95 | \$3.93 | \$3.51 | \$3.26 | \$4.23 | \$4.51 | \$4.81 | \$4.68 | \$7.04 | <b>\$7.23</b> | <b>\$9.68</b> |
| <b>DPS</b>                | \$1.56 | \$1.60 | \$1.65 | \$1.52 | \$1.63 | \$1.77 | \$1.84 | \$2.00 | \$2.11 | \$2.26 | <b>\$2.73</b> | <b>\$4.01</b> |
| <b>Shares<sup>1</sup></b> | 323    | 326    | 329    | 337    | 338    | 340    | 335    | 334    | 336    | 342    | <b>344</b>    | <b>354</b>    |

From 2012 to 2021, National Bank compounded its EPS by 9.6% in CAD\$. In US\$, National Bank compounded its EPS by 6.6%. These are above average when compared to its bigger peers. Stellar earnings growth should also lead to above-average dividend growth. In the period, its dividend growth rate was 7.0% in CAD\$ but only 4.2% when translated into US\$. With about 80% revenue exposure to Canada and 55% revenue exposure to Quebec, the bank's growth rate is tied closely to the economic health of Canada and in particular to Quebec. Quebec is the second most populous province in Canada and contributes about 20% of Canada's GDP. National Bank generates 19% of revenue from the United States and Cambodia, which help contribute to higher growth long term. After the regulator, Office of the Superintendent of Financial Institutions, loosened its restrictions in November 2021, National Bank stock increased its quarterly dividend by 22.5% -- the largest increase among the Big Six Canadian Banks second only to Bank of Montreal's (BMO) dividend hike. We use a 6% EPS growth rate and 8% dividend growth rate through 2027.

## Valuation Analysis

| Year             | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | Now         | 2027        |
|------------------|------|------|------|------|------|------|------|------|------|------|-------------|-------------|

# National Bank of Canada (NTIOF)

Updated February 26<sup>th</sup>, 2022 by Kay Ng

National Bank has traded at an average price-to-earnings ratio of 10.9 from 2012-2021. However, the investment community has steadily discovered the bank's quality and its average P/E ratio from 2017-2021 was 11.0. We think that if National Bank continues to maintain its way of doing business and interest rates were to resume growth post pandemic, it could further expand its P/E to 11.5 by 2027. Using our 2022 EPS estimate, the bank trades at a P/E of 11.2 – which indicates a fairly valued stock.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year   | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2027 |
|--------|------|------|------|------|------|------|------|------|------|------|------|------|
| Payout | 39%  | 41%  | 42%  | 43%  | 50%  | 42%  | 41%  | 42%  | 45%  | 32%  | 38%  | 41%  |

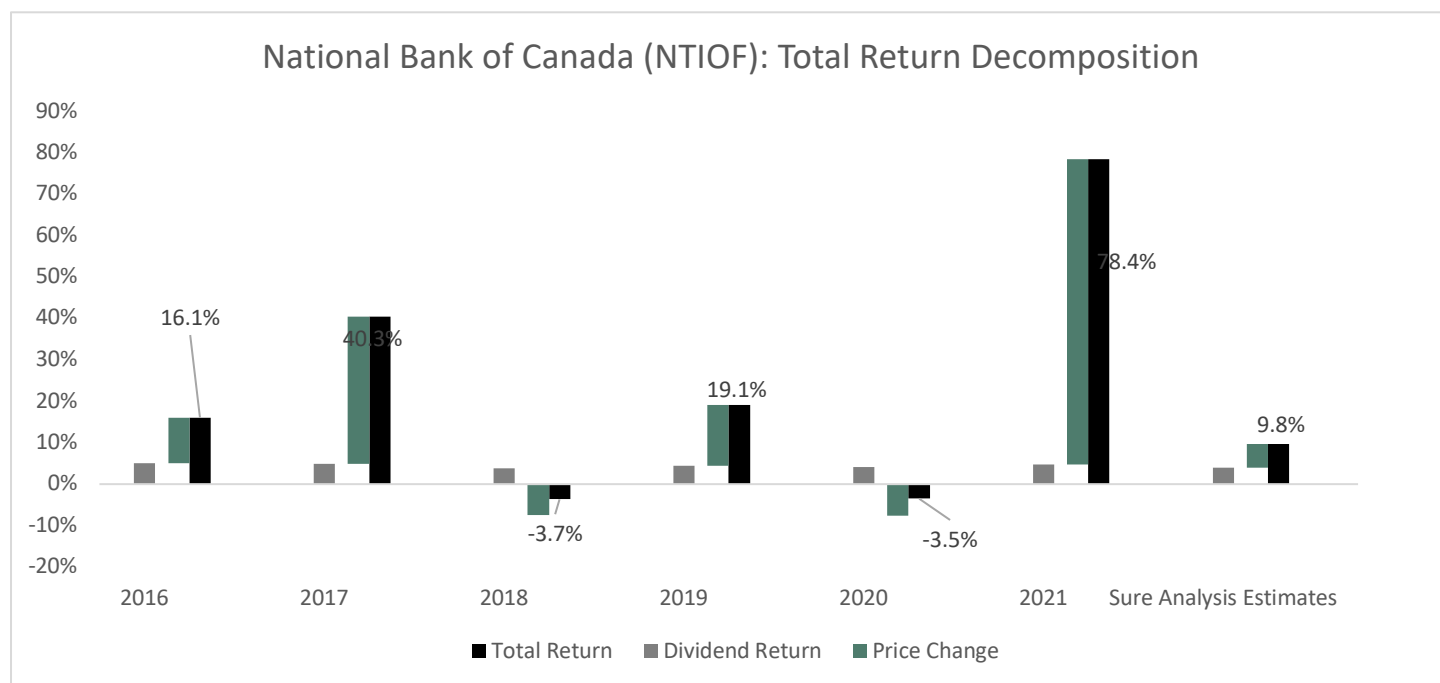

National Bank has a dominant position in Quebec. It also benefits from the effective regulation of the Canadian banking system. The World Economic Forum ranked Canada's banks as among the soundest in the world for the past decade or so, which highlights the fact that Canadian banks — National Bank included — are well capitalized and well managed.

Like all financial institutions, the bank's balance sheet primarily consists of debt, largely in the form of deposits. The Big Five Canadian banks tend to maintain a payout ratio of about 50%. So, National Bank's payout ratio is conservative. It should keep paying its dividend as the economy makes a comeback. We believe a dividend growth rate of about 8% through 2027 is possible. Notably, this bank has been more resilient than its bigger Canadian banking peers through the COVID-19 pandemic, which suggests management has been doing a great job in management risk while being focused on returns.

## Final Thoughts & Recommendation

We forecast defensive National Bank with 9.8% in total returns annually over the next five years, consisting of a yield of 3.4%, 6.0% earnings-per-share growth, and a 0.6% tailwind from valuation expansion. We rate the stock a buy on dips, especially for conservative investors looking for a low-risk dividend payer.
