## Overview & Current Events

NextEra Energy (NEE) is an electric utility with three operating segments, Florida Power & Light (“FPL”), NextEra Energy Resources (“NEER”), and Gulf Power. FPL and Gulf Power are rate-regulated electric utilities that together serve more than 5.7 million customer accounts, supporting more than 11 million residents in Florida, while NEER is the largest generator of wind and solar energy in the world. NEE was founded in 1925. NEE generates roughly 70% of its revenues from its electric utilities, whereas the remainder comes from NEER.

NextEra Energy reported its Q1 2022 financial results on 04/21/22. For the quarter, the company reported revenues of \$2,890 million, translating to adjusted earnings \$1,455 million (up 9.4% year over year). On a per-share basis, adjusted earnings climbed 10.4% to \$0.74.

Driven primarily by continued investment, FPL saw almost 13% year-over-year net income growth. For example, it commissioned approximately 450MW of new solar capacity, bringing its solar portfolio to more than 3,600MW – one of the largest in the United States. NEER added about 1,770 net MW of renewables and storage to its backlog (~1,200 MW of wind, ~440 MW of solar, and ~130 MW of storage).

In February, the utility increased its quarterly dividend by 10.4% to \$0.425 per share, which equates to an annual payout of \$1.70 per share. Management maintained its 2022 adjusted EPS guidance range at \$2.75-\$2.85. We keep the midpoint of \$2.80 for our 2022 EPS estimate.

## Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
<b>EPS</b>	\$4.56	\$4.83	\$5.60	\$6.06	\$5.78	\$6.70	\$7.70	\$8.37	\$2.31	\$2.55	<b>\$2.80</b>	<b>\$3.93</b>
<b>DPS</b>	\$2.40	\$2.64	\$2.90	\$3.08	\$3.48	\$3.93	\$4.44	\$5.00	\$1.40	\$1.54	<b>\$1.70</b>	<b>\$2.56</b>
<b>Shares<sup>1</sup></b>	424	435	443	461	468	471	477	491	1,972	1,975	<b>2,005</b>	<b>2,160</b>

The stock had a 4:1 stock split in October 2020. This is why its EPS appears to be much lower in 2020 in the table above. We also adjusted its 2020 dividend-per-share (DPS) accordingly. Although there were some years where profits declined sequentially, as they did between 2015 and 2016, NextEra Energy’s EPS rose relatively consistently during the last decade. NextEra Energy’s earnings did not take a significant hit during the last financial crisis, as EPS dropped by just 2% between 2008 and 2009. Between 2012 and 2021, NextEra Energy grew its EPS by 9.3% a year on average. The company’s future growth will be generated through organic investments and acquisitions. For example, there was NEE’s acquisition of Gulf Power in January 2019, and it also acquired GridLiance in Q1 2021 to expand its rate-regulated/long-term contracted business. NEER commissioned ~3,800 MW of renewable and storage projects in 2021. At the end of 2021, its backlog stood at ~16,600 MW. Its renewable projects should drive the segment’s profits going forward. NEE forecasts that its adjusted EPS will rise by 6%-8% a year through 2025. We use the midpoint 7% for the EPS growth rate through 2027 and estimate a dividend growth rate of 8.5% through 2027.

## Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	14.4	16.6	17.3	16.9	20.7	23.3	22.6	25.7	30	32.7	26.4	24.0
Avg. Yld.	3.6%	3.3%	3.0%	3.0%	2.9%	2.8%	2.6%	2.3%	2.3%	1.9%	2.3%	2.7%

NextEra Energy's valuation has risen persistently over the last ten years. The P/E more than doubled between 2012 and 2021. Despite the recent dip, the valuation remains a little extended in our view. Although the growing renewable portfolio warrants a premium valuation compared to history, we believe that multiple normalization remains the greatest headwind going forward. Although its more recent five-year average P/E from 2017-2021 was 26.9, we think a multiple of about 24 is fair.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	53%	55%	52%	51%	60%	59%	58%	60%	61%	60%	61%	65%

NextEra Energy has established a compelling dividend growth track record over the last decade. This was possible due to earnings growth and a rising payout ratio. NEE plans to raise the dividend payout ratio further over the coming years, as the company targets a dividend growth rate of at least 10% through 2022, whereas EPS will not grow as quickly. We believe the dividend is safe due to NEE's stable profits and a sustainable payout ratio. Because of the regulations that are levied upon utilities, there are little competitive risks. As one of the biggest utilities in the United States, NEE also benefits from massive scale, which serves as a competitive advantage. Its focus on higher-growth renewable energy projects will allow NextEra Energy to continue growing faster than its peers. Utilities have low cyclicality, which is why economic downturns will do little harm (if at all) to NextEra Energy's bottom line.

## Final Thoughts & Recommendation

NextEra Energy looks more attractive than many of its peers in terms of its earnings growth track record, its earnings growth outlook, its dividend growth projections, and the strength of its renewable portfolio. The stock correction is finally making NEE a quality dividend stock candidate for nibbling from long-term investors. We estimate a rate of return of 7.3% from a dividend yield of 2.3%, 7% EPS growth, and -1.9% from P/E contraction. Sure Dividend rates NEE as a Hold.
