Overview & Current Events

Cummins, headquartered in Indiana and founded in 1919, designs, manufactures, distributes and services engines for heavy, medium and light-duty trucks. The company's products include diesel and natural gas engines, as well as hybrid and electric platforms. Cummins operates in four segments: Engines (35% of annual revenues), Distribution (26%), Components (24%) and Power Systems (15%). The company also has a small New Power segment, which focuses on electric vehicles. Roughly 60% of its business is done in the U.S. and Canada. The company employs about 60,000 people and serves customers in about 190 countries. Cummins generates ~$26 billion in annual revenues.

On May 3rd, 2022, Cummins released first quarter results for the period ending March 31st, 2022. Revenue grew 5.1% to $6.4 billion, topping estimates by $340 million. Net income of $418 million, or $2.92 per share, compared to $603 million, or $4.07 per share, in the prior year. However, this included a $1.03 headwind due to the company's suspension of its operations in Russia and a $0.09 impairment due to the separation of Cummins' Filtration segment. Adjusted earnings-per-share totaled $4.04 for the quarter, $0.49 above expectations.

Revenues for North America improved 12% while international revenue fell 3%. Much of the decrease was due to a slowdown in China. The Engine segment grew 12% $2.8 billion, led by a 14% increase in on-highway revenue. Distribution improved 15% to $2.1 billion. Strong demand for parts and whole goods in North America led to 17% growth with international higher by 13%. Revenue for Components fell 8% as weakened demand in China and India compared to record growth in the prior year more than offset an 8% improvement in North America. Power Systems was up 14% to $1.2 billion. Power generation demand was strong from China. Increased demand in mining and oil and gas drove a 21% improvement in Industrial revenue. New Power's sales fell 11% to $31 million, primarily due to the timing of projects and shipments of fuel cell systems.

Leadership provided a revised outlook for 2022 as well. The company now expects revenue to grow 8% for the year, up from 6% previously. Cummins is projected to earn $17.44 for the year, down slightly from $17.72 previously.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	$8.69	$7.91	$9.14	$8.92	$8.23	$10.63	$13.15	$14.48	$12.01	$14.61	***$17.44***	***$25.63***
DPS	$1.80	$2.25	$2.81	$3.51	$4.00	$4.21	$4.44	$4.90	$5.28	$5.60	***$5.80***	***$7.40***
Shares[3]	190	187	182	175	168	166	163	152	149	144	***144***	***142***

Looking at the 2012 to 2021 period, Cummins grew earnings-per-share by an average compound rate of 5.9%. The growth rate has accelerated to nearly 11% over the last five year. Taking into account the long- and medium-term growth rates, we reaffirm our earnings-per-share growth rate of 8% through 2027. 2020 was a difficult one for the company, but Cummins saw a rebound in 2021. That rebound is expected to continue into the new year as well. We believe the company will see a higher than usual growth rate as the global economy recovers from the pandemic.

Cummins Inc. (CMI)

Updated May 5th, 2022 by Nathan Parsh

Cummins has also benefited from an increase in worldwide emission regulations and fuel efficiency standards. When paired with the company's reliable and superior quality engines, this has afforded the company growth opportunities. This trend is likely to continue, but we believe there is a tipping point whereby the increase in standards starts to be addressed via alternative technologies, such as batteries. In turn, this could slow Cummins' growth profile as the company would either need to invest heavily in new technologies or risk falling behind. Cummins last increased its dividend 7.4% to $1.45 for the September 2nd, 2021 payment.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	11.9	15.3	15.8	14.0	14.1	15.0	11.4	11.0	16.0	14.9	***11.7***	***13.0***
Avg. Yld.	1.7%	1.9%	1.9%	2.8%	3.5%	2.6%	2.9%	3.0%	2.9%	2.6%	***2.8%***	***2.2%***

Over the past decade, shares of Cummins have traded with an average price-to-earnings ratio of slightly more than 13. We believe this is a reasonable multiple considering the company's growth prospects paired with a fair amount of cyclicality in earnings. Shares of Cummins have decreased $25, or 10.9%, since our February 5th, 2022 report. Using the current share price and expected earnings-per-share for the year, Cummins trades with a price-to-earnings ratio of 11.7. If shares were to trade at our target multiple by 2027, then valuation would be a 2.1% tailwind to total returns over this time period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	21%	28%	31%	39%	49%	40%	34%	33%	44%	38%	***33%***	***29%***

During the last recession Cummins posted earnings-per-share of $4.08, $2.47, $5.17 and $9.07 during the 2008 through 2011 stretch. Meanwhile, the dividend kept increasing during this time. We view this a microcosm of the business at large. That is, in lesser economic times earnings are likely to falter, but the company has the ability to recover quickly, and the dividend payout ratio is low enough to keep the payment steady. Cummins maintains a competitive advantage in its strong brand name, stemming from reliability and superior quality. In turn, the company maintains a large share of the heavy-duty engine market. Two main risks stick out: a high reliance on a few customers, namely PACCAR, Daimler, Chrysler and Navistar, which could turn to manufacturing in-house, and the potential for new technologies to disrupt or require increased investment.

Final Thoughts & Recommendation

Cummins is now projected to return a total of 12.4% annually through 2027, up from our prior estimate of 10.2%. Our projected return consists of an 8% earnings growth rate, a starting yield of 2.8%, and a small contribution from multiple expansion. Cummins saw strong growth in most of its businesses, though the slowdown in China is something to make note of. We have lowered our 2027 price target $5 to $333 due to revised earnings estimates for the year, but reiterate our buy rating on shares of Cummins due to projected returns.
