## Overview & Current Events

Freeport-McMoRan is a leading global mining company that is headquartered in Arizona. The company operates large, long-lived, geographically diverse mines with significant reserves of copper, gold, and molybdenum. The geographical footprint includes Indonesia, North America, South America, and Africa. It produces roughly four billion pounds of copper annually, and more than 2 million ounces of gold. Freeport-McMoRan should generate about \$27 billion in revenue this year and has a market capitalization of \$59 billion.

Freeport reported first quarter earnings on April 21<sup>st</sup>, 2022, and results were better than expected on both the top and bottom lines. Adjusted earnings-per-share came to \$1.07, which was an impressive 15 cents better than estimates. Revenue soared 36% year-over-year to \$6.6 billion, and was \$310 million better than expected.

Consolidated copper sales rose 24% year-over-year to just over a billion pounds, while gold sales rocketed 59% higher to 409 thousand ounces. Average realized prices were up 18% for copper to \$4.66 per pounds, while gold was up 12% to \$1,920 per ounce.

Net income more than doubled to \$1.53 billion in Q1, up from \$718 million a year ago. The company now expects to see 1.04 billion pounds of copper sales in Q2, 1.095 billion pounds in Q3, and 1.095 billion in Q4. These are down slightly from prior guidance.

We now see \$4.00 in earnings-per-share for this year, based upon strong volumes and even stronger pricing, which is driving outstanding profit margins.

## Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
<b>EPS</b>	\$3.19	\$2.64	-\$1.26	-\$11.31	-\$3.16	\$1.25	\$1.78	-\$0.17	\$0.54	\$3.13	<b>\$4.00</b>	<b>\$3.10</b>
<b>DPS</b>	\$1.19	\$1.25	\$1.25	\$0.46	---	---	\$0.20	\$0.20	\$0.05	\$0.23	<b>\$0.30</b>	<b>\$0.40</b>
<b>Shares<sup>2</sup></b>	949	1038	1039	1246	1445	1448	1449	1451	1469	1482	<b>1500</b>	<b>1550</b>

Freeport endured a tough period given metals pricing was weak for some time. However, those days have passed and 2021 proved to be much stronger. However, it has become clear the pricing of copper in particular isn't sustainable, and we have moved our estimate of growth to -5% for the foreseeable future. With earnings expected to rise significantly, we see sustained growth from here as more challenging considering it would need another sustained rise in metals pricing. Freeport is cashing in on a massive move higher in copper, but we know from historical tendencies that these moves don't last.

Freeport's future growth will be heavily dependent upon copper pricing, as that is where it derives most of its revenue. With copper volume being highly dependent upon global economic activity, it is susceptible to recessions. However, copper pricing has been soaring for months and is still very near its all-time high. With the company saving money on every line item of cost, margins have reflatated extremely quickly. Still, we note that as with any commodity company,

Freeport's revenue and margins have significant volatility from year to year, so this forecast has significant upside and downside risk due to factors outside of Freeport's control.

## Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	11.8	12.4	16.4	---	45.6	11.9	10.3	---	25.5	11.5	<b>10.0</b>	<b>13.0</b>
Avg. Yld.	3.2%	3.8%	3.8%	3.0%	---	---	1.3%	1.8%	0.3%	0.8%	<b>0.8%</b>	<b>1.0%</b>

Perhaps unsurprisingly, Freeport's price-to-earnings multiple has been quite erratic in the past decade. The company's wild swings in earnings have produced some very large and very small P/E multiples in the past, and shares trade for 10 times our earnings estimate after pulling back of late. We assign fair value at 13 times earnings given this volatility, and the fact that commodity companies tend to see lower valuations during times of economic stress. With this, we expect a 5.4% tailwind to total returns from the valuation.

Freeport reinstated its dividend in April 2021, paying a 7.5 cent per share dividend, which is good for 30 cents annually.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	37%	48%	64%	---	---	---	10%	---	9%	7%	<b>8%</b>	<b>13%</b>

The new payout ratio is extremely low, so we believe it to be safe for the foreseeable future. We see growth in the payout from here as somewhat modest given the company very recently had to suspend its dividend altogether.

The company's competitive advantage – if it has one – is in its scale. Freeport produces enormous volumes of copper and can therefore generally achieve lower product costs. However, it is still a mining company and advantages are difficult to come by. The company also suffers greatly during periods of economic weakness due to its exposure to copper, and it has more than \$8 billion in debt on its balance sheet. It pays hundreds of millions of dollars annually just in debt servicing costs, so its prospects for getting out of debt are quite dim given unpredictable earnings. We see the balance sheet as a significant negative for Freeport and note that it greatly increases risks for shareholders.

## Final Thoughts & Recommendation

We see Freeport-McMoRan as a high-risk way to enter the commodity space. The company's exposure to copper is very profitable during times of strong economic activity but devastating in weak periods. We forecast 1.0% annual returns from here. This is up slightly from our last report, and we continue to rate the stock a sell given the significant uncertainty surrounding the recovery, and its highly leveraged balance sheet. We see the stock as pricing in extremely high copper pricing for the foreseeable future, which may not last.
