Overview & Current Events

Intel is the largest manufacturer of microprocessors for personal computers, shipping about 85% of the world's microprocessors. Intel also manufactures products like servers and storage devices that are used in cloud computing. Intel employs more than 120,000 people worldwide and has a current market capitalization of \$178 billion. The company generates about \$75 billion in annual sales.

On January 26th, 2022, Intel increased its dividend 5% to \$0.365 for the March 1st, 2022 payment date.

On April 28th, 2022, Intel reported first quarter results on for the period ending March 31st, 2022. Revenue fell 6.6% to \$18.4 billion, but was \$80 million above estimates. On an adjusted basis, revenue fell just 1%. Adjusted earnings-per-share of \$0.87 compared to \$1.34 in the prior year, but was \$0.08 better than expected.

Revenue for the PC-Centric business decreased 13% to \$9.3 billion for the quarter, primarily due to component shortages as well as the modem ramp down. PC volume fell 18%. Datacenter and AI Group continues to act well, with revenue growing 22% to \$6.0 billion. Enterprise and government revenue was higher by 53% and unit volumes grew 17%. Network and Edge Group grew 23% to \$2.2 billion due to the ongoing recovery from COVID-19 and strong networking demand. Intel saw strong growth rates in its emerging segments. Intel Foundry Services, Accelerated Computing Systems and Graphics Group, and Mobileye grew 175%, 21%, and 5%, respectively. Gross margin declined 480 basis points to 50.4%.

Intel is expected to earn \$4.16 per share in 2022, up from \$3.79 previously. We have updated our forecast accordingly.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$2.13	\$1.89	\$2.31	\$2.33	\$2.72	\$3.47	\$4.59	\$4.89	\$5.10	\$5.47	\$4.16	\$5.31
DPS	\$0.87	\$0.90	\$0.90	\$0.96	\$1.04	\$1.08	\$1.20	\$1.26	\$1.32	\$1.39	\$1.46	\$1.86
Shares¹	4944	4967	4748	4725	4730	4687	4600	4473	4119	4069	4069	3900

Along with most companies in the market, Intel's earnings declined during the last recession, although the company rebounded to growth the following year. Earnings growth over the past decade has averaged 11% per year. We are maintaining our forecasted growth rate of 5% through 2027. Applying the growth rate of 5% to the midpoint of Intel's guidance for 2021 and shares could earn \$5.31 by 2027.

Intel generated \$11.3 billion in free cash flow in 2021 and returned \$8 billion to shareholders last year. While Intel paused its dividend growth in 2014, the company has increased it every year since. Overall, the dividend has a CAGR of 5.3% since 2012.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027

Intel Corporation (INTC)

Updated May 3rd, 2022 by Nathan Parsh

Intel's shares have decreased \$3, or 6.3%, since our January 28th, 2022 report. Based off of the current share price and expected earnings-per-share for 2022, Intel's stock has a price to earnings multiple of 10.8. We are reaffirming our target P/E of 12 to better match the stock's long-term average valuation. If the P/E ratio were to match our fair value target by 2027, multiple expansion could be a 2.1% tailwind to annual returns over this time period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	41%	48%	40%	41%	38%	31%	26%	26%	27%	25%	35%	35%

Intel saw earnings declines in both 2008 and 2009 as the company struggled during the last recession. The company's products are in demand when customers feel that their business is on solid ground and they feel comfortable purchasing more of Intel's offerings. Intel also has a very low dividend payout ratio, making it likely that the company will continue to pay its dividend during a recession.

Intel's key competitive advantage is that it is the largest and most dominate company in its sector. This gives the company size and scale that competitors can't match. This makes revenues slightly less cyclical today than they were in 2009, but are still dependent on growing demand.

Final Thoughts & Recommendation

Intel is projected to return 9.9% annually through 2027, up from our previous estimate of 6.7%. The expected return consists of 5% earnings growth, a 3.2% starting yield, and a small contribution from multiple expansion. Year-over-year results were lower than the prior year, but Intel did see growth in most businesses. EPS estimates for the year have also increased. We have raised our 2027 price target \$6 to \$64 as a result and now view shares of Intel as a buy due to projected returns.
