Itaú Unibanco has seen its earnings decrease at a compound annual growth rate of (2.9)% for the past ten years. We have estimated a modest EPS growth rate of 5.0% for the next five years. This will put 2027 earnings at \$0.78 per share. The growth will be driven by a more considerable increase in demand for deposits and loans. Another driver in earnings growth is that Itaú Unibanco positions itself as a regional money center in Latin America. The company saw an increase in revenue in this region. Itaú has about 30% of its loans outside of Brazil, allowing the company to benefit from growth in emerging Latin American markets.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	11	10.1	9.3	6	9.1	11	13.0	14.3	17.3	7.2	9.0	10.0
Avg. Yld.	4.1%	3.1%	3.3%	4.5%	4.4%	6.2%	6.1%	4.6%	0.9%	1.4%	1.6%	1.2%

For the ten-year average, shares have traded with an average P/E ratio of 10.8x earnings. However, we think a PE of 10x is fair. At the current price, Itaú currently has a P/E of 9.0x this year's earnings. The dividend yield was as high as 6.2% in 2017 and as low as 1.1% in 2010. Since the dividend has been increased for the year, Itaú Unibanco's current yield is 1.58%, but it is still much lower than the ten-year average of 3.9%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	44%	31%	31%	27%	40%	68%	80%	66%	14%	10%	15%	12%

Itaú Unibanco does not have an economic moat. Bank moats are achieved through cost advantages like funding, operational, credit, and regulatory. Also, bank moats are created in the banking system in which the company operates. The Brazilian banking system is flawed because of its unfriendly regulatory prospect, worsening macroeconomic prospects, and bleak political conditions. Itaú does have a competitive advantage as it is the largest bank in Latin America. During the Great Recession, Itaú Unibanco saw earnings decrease from \$0.57 a share in 2007 to \$0.46 per share in 2008, which fell by -19%. However, in 2019, the company reported earnings of \$0.57 a share, or an increase of 24%. The stock price shows a different story. The stock price dropped -62.6% in ten months from high to low. Itaú has an S&P Credit Rating of BB-, which is not an investment-grade rating. The Debt-to-Equity ratio (D/E) is 2.3, which is relatively high. However, the D/E ratio is improving. Overall, Itaú Unibanco has a satisfactory Balance Sheet.

Final Thoughts & Recommendation

Itaú has a decent Balance Sheet to withstand the current economic headwind. However, earnings have been very volatile throughout the past ten years, affecting investors' total return rate. We anticipate a return rate for the next five years to be about 8.6% per year. Thus, we rate Itaú Unibanco as a hold at the current price.
