Overview & Current Events

Lancaster Colony has been making food products since 1969, after shifting away from housewares. The move has afforded the company some meaningful growth in the past five decades and the stock has a \$3.3 billion market capitalization on \$1.6 billion in annual revenue. Lancaster Colony makes various meal accessories like croutons and bread products in frozen and non-frozen categories. Lancaster also has one of the best dividend increase streaks in the entire market, with fiscal 2022 representing the 59th consecutive year of dividend increases.

Lancaster reported third quarter earnings on May 5th, 2022, with results coming in mixed. GAAP earnings-per-share missed estimates by 98 cents, coming in at -\$0.17. Revenue was better than expected at \$404 million, up 13% year-over-year, and beating estimates by \$12.7 million.

Net sales rose to a third quarter record as the retail segment saw 7.4% growth to \$213 million, which was attributable to pricing actions to combat inflation. Volume in the segment declined by 2%, reflecting planned product line reductions, as well as a very tough comparable period a year ago.

The Foodservice segment saw sales soar 20% to \$190 million as inflationary pricing and increased demand pushed the top line higher. Volume was down 2% as demand was unfavorably influenced by challenges in the restaurant industry of higher costs, tight labor market conditions, and a cautious consumer.

Gross profit was down \$22 million to \$68 million, driven by the unfavorable impacts of significantly higher commodity and packaging costs, higher freight and warehousing costs, increased labor costs, etc. The company noted its pricing actions helped offset some of this.

We now see \$4.45 in earnings-per-share for this year following a tough Q3. That's nearly a dollar below our prior estimate, but such is the impact on costs inflation is making.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$3.51	\$3.99	\$3.69	\$3.72	\$4.44	\$4.20	\$4.92	\$5.46	\$4.97	\$5.05	\$4.45	\$5.96
DPS	\$1.41	\$1.52	\$1.72	\$1.82	\$1.96	\$2.15	\$2.40	\$2.55	\$2.75	\$3.00	\$3.20	\$4.28
Shares¹	27	27	27	27	27	27	28	28	28	28	28	28

The company's earnings-per-share growth has been spotty as its revenue tends to ebb and flow with restaurant traffic. It recovered nicely from the Great Recession, but the drop in 2008 earnings was very steep.

We are forecasting 6% earnings-per-share growth annually ahead, comprised of low single-digit sales and flat margins over time, with the caveat that 2022 margins are very much at risk; this should be temporary. Lancaster does not buy back stock. The company's average revenue growth has been and should remain in the low single-digits, but keep in mind the possibility for earnings volatility going forward - there will be years where it dips and other years where it may rise rapidly, as it did in 2018, and again in 2019. Organic growth has been a problem for Lancaster Colony, but it does

complete sizable acquisitions regularly. After a decline in earnings in 2020, Lancaster has failed to get back near its prior highs in terms of earnings. We believe it may be some time before \$5.46 in annual earnings-per-share is hit again.

We are forecasting modest dividend growth annually for the next five years as Lancaster Colony continues its impressive streak of payouts to shareholders; the payout could be \$4.28 per share in five years. Lancaster is not a strong income stock, but it does prioritize growth in the payout each year, and that should continue. The company raised the dividend in December 2021 for the 59th consecutive year, boosting the payout by 6.7%.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	18.6	18.6	23.5	24.5	24.3	31.2	31.4	28.8	30.0	35.0	27.4	27.0
Avg. Yld.	2.2%	2.0%	2.0%	2.0%	1.8%	1.6%	1.7%	1.6%	1.8%	1.7%	2.6%	2.7%

The stock's price-to-earnings ratio has spent the past few years around 30, but given the company's exposure to restaurants, we see fair value at 27 times earnings. Today, shares trade for 27.4 times our fiscal 2022 earnings estimate, so we see it as essentially fairly valued.

We see the yield remaining about where it is today given a relatively stable valuation, and rising dividend-per-share. The stock's dividend yield was nearly cut in half from 2009 to 2017 due to a huge rally, but some of that has already been unwound as the share price has declined.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	34%	40%	38%	47%	49%	44%	47%	47%	55%	48%	72%	72%

Lancaster Colony's payout should remain near where it is today as dividend growth roughly matches earnings growth. Given its Dividend King status, we know the payout is important to management and the dividend is very safe.

Lancaster Colony's competitive advantage is in its leadership position within the niche categories in which it competes. The company goes after accessory categories like bread, dressings, and croutons where competition tends to be lighter. It also has strong distribution partnerships with companies like Walmart and McLane Company, a major restaurant distributor. Its recession performance track record is spotty because it is reliant upon restaurant traffic, something that suffers mightily during times of economic stress.

Final Thoughts & Recommendation

We forecast Lancaster Colony to provide shareholders with total annualized returns of 8.1% over the next five years, comprised of 6% growth, a 2.6% dividend yield, and a very small headwind from the valuation. Shares earn a hold rating.
