Overview & Current Events

Manulife Financial Corporation is an international financial services group that helps individuals and corporations make decisions through its wealth, asset management, and insurance businesses. It also offers annuity products and services. The company operates as Manulife across its offices in Canada, Asia, and Europe, and primarily as John Hancock in the United States. It has 37,000 employees, over 118,000 agents, and thousands of distribution partners, serving over 30 million customers. Manulife Financial is based in Toronto, Canada. The company reports in Canadian dollars, but all figures in this report have been converted to U.S. dollars.

On May 11th, 2022, Manulife Financial reported its Q1-2022 results for the period ending March 31st, 2022. Core earnings came in at \$1.17 billion, down 5.4% compared to last year. The decrease in core earnings was driven by lower new business gains in Asia and the unfavorable impact of markets on seed money investments in new segregated and mutual funds (compared with gains in the prior year quarter). In addition, lower in-force earnings in U.S. Annuities, primarily due to the variable annuity reinsurance transaction, also impacted results.

Core EPS (excluding the major investment gains) for the quarter was \$0.60, 6% lower year-over-year. For U.S. investors, the exchange rate of CAD against the USD fell amid a stronger USD, which negatively impacted the underlying numbers by a small margin. We forecast FY2022 EPS of \$2.55, to be adjusted over time as Manulife's performance through the year becomes clearer. Back in February, Manulife had increased its quarterly dividend by 17.9% to a rate of CAD 0.33, implying an annualized rate of \$1.03 based on the current CAD/USD rate.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$0.94	\$1.54	\$1.57	\$0.76	\$1.06	\$0.78	\$1.71	\$2.14	\$2.31	\$2.81	\$2.55	\$3.25
DPS	\$0.52	\$0.49	\$0.49	\$0.48	\$0.55	\$0.65	\$0.67	\$0.77	\$0.88	\$0.93	\$1.03	\$1.44
Shares¹	1,812	1,836	1,857	1,962	1,973	1,978	1,983	1,958	1,941	1,946	1,942	1,786

Manulife Financial has produced a growing net income over the past few years, powered primarily by growth in premiums and annuity revenues, as well as higher interest and dividend income derived by its investments. We expect the company to keep growing its EPS, driven by double-digit growth in its insurance segment in key Asian markets such as Japan and Hong Kong. Manulife should also generate higher wealth management fees going forward, enjoying consistent net inflows that grow its assets under management. During Q1, the company achieved net inflows of \$5.37 billion, driven by double-digit growth in gross flows across all geographies amid increased investor demand as well as lower mutual fund redemption rates. We still expect EPS growth of 5% in the medium-term, being cautious of potential FX fluctuations that could sway this figure either way.

Manulife Financial Corporation (MFC)

Updated May 21th, 2022 by Nikolaos Sismanis

The company has grown its DPS annually since 2014 in its local TSX listing, though U.S.-based investors have been slightly affected by currency effects. We expect the dividend to keep growing by around 7% in the medium term, lower than the company's latest increase of 17.9%, but closer to its historical average.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	12.8	10.7	13.0	22.4	12.9	22.1	10.5	8.4	7.4	7.1	6.9	8.0
Avg. Yld.	4.3%	3.0%	2.4%	2.8%	4.0%	3.8%	3.7%	4.3%	5.2%	4.6%	5.9%	5.5%

Manulife Financial shares have historically traded at a forward P/E in the high single to low single digits, in line with its industry peers. The stock's valuation is currently near its decade-low levels. Due to the company experiencing robust growth in Asia, we believe that the stock is undervalued at its current levels. A forward P/E of around 8.0 in the medium-term should make for a fairer multiple. The company ended the quarter with a book value per share of \$20.51, which is notably higher than the current stock price. Investors are to enjoy a relatively rich yield, powered by the stock's well-covered dividend.

Safety, Quality, Competitive Advantage, & Recession Resiliency

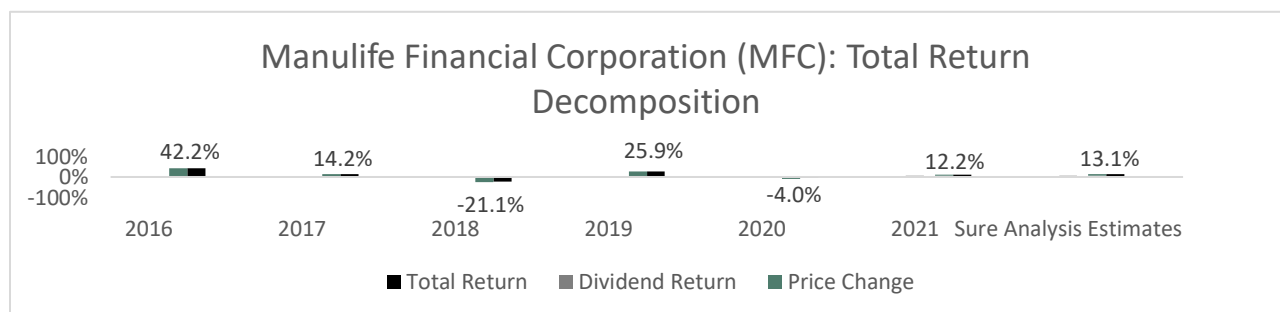

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	55%	32%	31%	63%	52%	83%	39%	36%	38%	33%	40%	44%

Manulife's dividend should be well covered by the underlying income, with the payout ratio currently at 40%. The company enjoys several qualities, such as great brand value due to its obsession with customer satisfaction, a clear long-term underwriting strategy that has shifted smoothly online, and a healthy financial leverage ratio, currently at 26.4%, close to the company's target of 25%. However, the company faces several risks. A 50 basis point decline in corporate spreads could affect the bottom line by around \$467 million. The insurance industry can also be quite competitive, with disruptive up-and-coming companies, such as Snowflake, threatening to capture market share. A recession could adversely affect the company, including deferred premiums, defaults of its debt investments, and lower investment income. Lastly, a surge in claims amid unforeseen reasons could also negatively impact the company.

Final Thoughts & Recommendation

Manulife Financials is a quality insurer with healthy financials and the potential to grow its earnings moving forward. The stock offers an above-average yield, which along with reasonable growth metrics, are projected to result in annualized total returns of 13.1% in the medium-term. However, U.S.-based investors should be wary of the possible currency fluctuations between the Canadian Dollar and the U.S. dollar, which could notably impact domestic investors' dividends, and, consequently, total returns. Still, shares earn a buy rating due to projected returns.
