TRS-RenTelco rental revenues increased 5% due to higher average equipment rent and higher average monthly rental rates. Adler Tanks rental revenues grew 17% due to growth across regions and markets.

McGrath RentCorp has experienced volatility in its earnings-per-share over the past decade. Earnings-per-share dropped almost 19% in 2009 and it wasn't until 2011 that earnings recovered above 2008's total. We continue to expect earnings-per-share to grow at a rate of 3% per year through 2027.

McGrath RentCorp raised its dividend by 4.6% for the April 29th, 2022 payment. This marks 31 consecutive years of dividend growth. Shares offer an annualized yield 2.2% presently, ~70 basis points higher than the average yield of the S&P 500. Despite McGrath RentCorp's variance in earnings-per-share over the last decade, the company has been able to raise its dividend each year for more than three decades. This is an impressive feat for a company that can be very cyclical.

McGrath RentCorp (MGRC)

Updated May 2nd, 2022 by Nathan Parsh

Shares of McGrath RentCorp have gained \$2, or 2.5%, since our February 26th, 2022 update. Based off of earnings expectations for 2022, McGrath RentCorp's stock currently has a price-to-earnings ratio of 19.7. We maintain our target valuation of 17.6 times earnings given the quality of results over the past few years. If shares were to revert to this multiple by 2027, then valuation be a 2.2% headwind to annual results over this time period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	53%	58%	57%	63%	64%	49%	40%	38%	39%	47%	43%	43%

McGrath RentCorp showed in the last recession that its earnings are at risk during a downturn. The company's rental business would most likely see earnings decline in the next recession as customers might not be willing to add additional classroom or office space, and would make do with current facilities. Even when the economy strengthened, McGrath RentCorp had difficulty growing earnings until very recently. One area McGrath RentCorp has succeeded in is lowering its debt over the past decade. The amount of debt as a percentage of assets has gone down almost every year since 2008. McGrath RentCorp's payout ratio is in a healthy range and the company has increased its dividend by at least 9% for the three years prior to 2020, though the last two raises have been below this range. Higher-than-average increases could mean that management believes earnings will grow at a higher than usual rate.

McGrath RentCorp's key competitive advantage is that company's rental portfolio is fairly diverse. The company's products are used for office space, school classrooms, telecommunications and energy purposes. While still sensitive to the state of the economy, this product diversity does give McGrath RentCorp some cushion against weakness in any one area of its business.

Final Thoughts & Recommendation

After first quarter results, McGrath RentCorp is projected to return 3.0% per year through 2027, down slightly from our previous estimate of 3.4%. Our projected return stems from a 3% earnings growth rate and 2.2% starting yield that are partially offset by a low single-digit headwind from multiple compression. Each of McGrath RentCorp's business segments continues to see solid growth rates, with 2022 expected to be a very strong year for the company. That said, the valuation is slightly ahead of our target. We maintain our five-year target price of \$86 as well as our sell rating on shares of McGrath RentCorp due to projected returns.
