Overview & Current Events

Choice Properties Real Estate Investment Trust invests in commercial real estate properties across Canada. The company has a high-quality real estate portfolio of over 700 properties which makes up over 60 million square feet of gross leasable area (GLA). Choice Properties' portfolio is made up of over 700 properties, including retail, industrial, office, multi-family, and development assets. Over 500 of Choice Properties' investments are to their largest tenant, Canada's largest retailer, Loblaw. This \$8.6 billion market capitalization company is listed on the Toronto Stock Exchange under the trading symbol 'CHP-UN', or in the United States on the over-the-counter market under the trading symbol 'PPRQF'.

On April 27th, 2022 Choice Properties released Q1 results. Net income stood at \$387 million compared to a net loss of \$62.2 million in the year-ago period. The boost in net income was mainly caused by a \$243.5 million favorable change in the adjustment to the fair values of investment properties caused by fair value gains in industrial, development and retail portfolios, a \$106.5 million increase in income from equity accounted joint ventures, and a \$98.9 million favorable change in the fair value of the trust's exchangeable units. Moreover, funds from operations came in at \$0.242 per diluted unit, up by \$0.006 year-over-year. Adjusted FFO increased to \$0.222 from \$0.215 year-over-year. Meanwhile, \$854.4 million of transactions were completed during the first quarter.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
AFFO/S	N/A	\$0.33	\$0.59	\$0.57	\$0.62	\$0.70	\$0.62	\$0.64	\$0.63	\$0.75	\$0.62	\$0.85
DPS	N/A	\$0.30	\$0.54	\$0.51	\$0.52	\$0.56	\$0.57	\$0.56	\$0.57	\$0.59	\$0.58	\$0.57
Shares³	N/A	87.6	89.3	91.0	92.6	94.3	278.2	310.3	326.9	327.6	327.6	350

For Choice Properties' primary growth metric, we used adjusted funds from operations per share (FFO/S) instead of the typical EPS, since AFFO/S gives a much more accurate picture of a REIT's performance. Choice Properties only has reportable operations starting in the third quarter of 2013, which explains why the company's 2013 values are significantly lower.

Given the fairly slow growth performance over the past eight years and the lingering headwinds facing commercial real estate in light of COVID-19 and macroeconomic uncertainty, we are expecting weak performance this year and a steady recovery in the years following as the company's quality, diversification, and sound balance sheet will enable it to weather the current challenges.

Choice Properties has sustained or grown their dividend steadily on a same-currency basis since 2015. The company kept the dividend at an annualized \$0.65 (CAD) for their first three years of operations. The company's average annual dividend growth rate after that was respectable in the low single digits before dividend growth had to pause due to headwinds facing the retail industry and COVID-19. Going forward, we expect Choice Properties to keep their dividend

steady to allow the company's cash flow generation to catch up with the payouts. We also note that the dividend can move up or down when it is converted into US dollars depending on current exchange rates.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
P/FFO	N/A	N/A	11.5	12.2	13.5	12.5	11.2	13.5	15.1	18.2	19.4	10.0
Avg. Yld.	N/A	N/A	7.3%	7.5%	5.2%	6.5%	8.3%	6.3%	5.2%	4.9%	4.8%	6.7%

Choice Properties' average price to funds from operations ratio (P/FFO) has remained around 12-13 for much of their reportable years. Comparing the current P/FFO ratio to their historic average, Choice Properties is overvalued. Furthermore, we view 10 times FFO as a fair valuation given the REIT's heavy exposure to the out-of-favor retail sector alongside the lingering headwinds from the COVID-19 outbreak.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	N/A	45%	84%	91%	70%	81%	93%	85%	80%	88%	94%	67%

Choice Properties' portfolio has outsized exposure to Loblaw, making the REIT rather dependent on Loblaw's continued operations. One benefit of their strategic alliance with Loblaw is long-term leases, which gives some certainty for future earnings. Choice Properties has not been around for a recessionary period, so to predict how the company would perform in a recession we observed similar companies' performance in a recession.

The most similar company we found to Choice Properties is Crombie Real Estate (CRR-U), which also operates a REIT out of Canada with a portfolio designed like Choice Properties' portfolio. During the last recession, The Great Recession in 2008-2009, Crombie Real Estate's FFO/S decreased by nearly 19%, which is a relatively solid performance all things considered.

Final Thoughts & Recommendation

Overall, we expect total returns of -1.1% annually going forward, mainly driven by the 4.8% dividend yield and mid-single-digit FFO-per-share growth rate, offset by considerable multiple compression. Given the weak total return potential and the company's large exposure to retail, we rate it as a Sell.
