Overview & Current Events

PSB Holdings is the parent company of Peoples State Bank, or PSB, which opened its doors in 1962 in Wausau, Wisconsin. The company has paid dividends to shareholders continuously since 1965 and has increased its payment for 28 consecutive years. The bank has ten branches, and assets totaling \$1.3 billion. The stock trades with a \$111 million market cap, making it one of the smallest companies we cover.

PSB reported first quarter earnings on April 25th, 2022, and results were somewhat weak against the year-ago period. Earnings-per-share came to 75 cents, which was four cents ahead of last year's Q1, but revenue was just \$11.6 million, down more than 6% year-over-year.

Net interest income was up to \$9.6 million from \$9.2 million from Q4, but flat to last year's Q1. The most recent quarter reflected higher Paycheck Protection Program fee income. Credit loss provisions remained at zero for this quarter, as it was for the fourth quarter. Provisions were \$1 million in the year-ago period.

Noninterest expense declined \$165k year-over-year to \$7.2 million, with lower salary and benefit costs, as well as lower incentive plan compensation expense driving that result.

Tangible book value declined to \$21.82 per share, primarily due to the recording of unrealized losses on the securities portfolio amid market expectations of future rate increases.

We now see \$2.80 in earnings-per-share for this year, up slightly from our prior estimate.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$1.20	\$0.96	\$1.30	\$1.61	\$1.83	\$1.58	\$2.29	\$2.51	\$2.40	\$2.88	\$2.80	\$2.80
DPS	\$0.25	\$0.26	\$0.27	\$0.28	\$0.30	\$0.32	\$0.34	\$0.38	\$0.41	\$0.44	\$0.46	\$0.59
Shares²	5.0	5.0	5.0	4.8	4.6	4.6	4.5	4.5	4.4	4.4	4.4	4.2

PSB has an impressive track record of growth; it managed to remain profitable during the Great Recession, which is a testament to its lending standards. Since 2011, PSB has managed to grow earnings-per-share by more than 8% annually, on average. We don't see that sort of growth in the future, however, and instead estimate 0% annual expansion, primarily due to the extremely low interest rates persisting in the U.S, elevated loan loss reserves, and little asset growth in the past few quarters outside of acquisitions. Even with declining estimates for this year, \$2.80 would be outstanding historically.

This lack of projected growth is primarily because the bank's spreads had previously expanded widely, and because its loan-to-deposit ratio is stretched at or near the limit, although that is coming down with deposit growth and loan paydowns, both of which reduce the loan-to-deposit ratio. Both levers allow banks to boost profitability of the existing asset base by improving margins, and producing leverage, respectively. PSB has done these things well in recent years

but given that its net interest margin is still near 3%, and that its loan-to-deposit ratio is still elevated, we see limited catalysts for outsized growth.

PSB almost certainly won't be able to produce anything like the growth it has for the past decade in the current environment, particularly with already-elevated earnings.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	7.1	10.1	8.5	8.7	8.6	13.8	10.7	9.7	8.8	8.7	8.9	10.0
Avg. Yld.	2.9%	2.7%	2.5%	2.0%	1.9%	1.5%	1.5%	1.5%	1.1%	1.8%	1.8%	2.1%

PSB's valuation has remained very low for much of the past decade despite its outstanding profitability and strong growth. The average P/E ratio for the past decade is just 9. However, we see fair value at 10 times earnings given the bank's strong track record of profitability and growth. We also believe this multiple accounts for slower growth moving forward. At 8.9 times earnings today, the stock is somewhat undervalued in our view.

The yield stands at 1.8%, which is more in line with historical standards. We see the yield drifting higher over time, potentially hitting 2.1% by 2027.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	21%	27%	21%	17%	16%	20%	16%	15%	10%	15%	16%	21%

Competitive advantages are tough to come by in banking, but PSB does have a strong brand in parts of Wisconsin. In addition, its lending standards are helping, as it did during the last downturn. The dividend is also very safe at just 16% of earnings, and there is plenty of room for future raises, as well as plenty of margin of safety if a prolonged recession were to strike.

Final Thoughts & Recommendation

We see PSB's total return outlook as having improved to 4.2%, which is based on the 1.8% yield, no growth, and a small tailwind from the valuation. The bank's outlook for rate spreads is uninspiring. However, we still see a very tough road for growth ahead from this year's base of earnings. With the increase in the total return outlook, we're moving PSB from sell to hold.
