## Overview & Current Events

Synchrony Financial is a consumer financial services company. It operates through the following business units: Payment Solutions, Retail Credit, and CareCredit. Synchrony Financial offers private label credit cards, small-size business credit products, promotional financing for higher-priced consumer goods, promotional financing for healthcare procedures such as dental and vision, as well as a range of other services to its customers. The company is headquartered in Stamford, CT, and was founded in 2003.

Synchrony Financial reported its first quarter earnings results on April 18. The company managed to generate revenues of \$3.4 billion during the quarter, which was down by a marginal 0.6% versus the previous year's quarter, despite an expansion in the company's net interest margin. The company also saw its credit quality improve, as net charge-offs dropped from a level of 3.62% one year ago to 2.73% during the most recent quarter, reflecting the healthy macro backdrop for consumers. The lower charge-offs had a positive impact on Synchrony's profitability.

Synchrony Financial generated earnings-per-share of \$1.73 during the first quarter, which beat the analyst consensus estimate by a wide \$0.19. Profits were up substantially on a sequential basis, climbing by almost 30% quarter-over-quarter. Synchrony Financial experienced a strong recovery in 2021, and it is expected that 2022 will be a strong year for the company as well. Since 2022 will likely not see provision releases that are as pronounced as those from 2021, net profits will likely still decline this year, although they should easily remain above pre-pandemic levels.

## Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
<b>EPS</b>	---	---	\$2.78	\$2.65	\$2.71	\$2.61	\$3.74	\$4.29	\$2.28	\$6.86	<b>\$5.80</b>	<b>\$6.89</b>
<b>DPS</b>	---	---	---	---	\$0.26	\$0.56	\$0.72	\$0.86	\$0.88	\$0.88	<b>\$0.88</b>	<b>\$1.12</b>
<b>Shares<sup>1</sup></b>	---	---	757	834	834	771	719	662	584	565	<b>530</b>	<b>450</b>

Synchrony Financial was founded in 2003, but the company's initial public offering was in 2014, which is why there is no long-term data available for the company. Between 2014 and 2019 Synchrony Financial grew its earnings-per-share by 9% a year, although almost all of that growth took place in 2018 and 2019. Before that, profits remained relatively stagnant. In 2019, Synchrony Financial managed to grow its earnings-per-share at a strong pace.

Synchrony Financial has broadened its cooperation with key vendors in the recent past, which includes companies such as Amazon, Walgreens, and QVC. The relationships with these retailers should positively impact Synchrony Financial's growth during the coming years, as this will allow for a rise in the company's active accounts. On top of that, purchase volumes and loan balances should grow in the long term, which is the basis for rising transaction fees and further growth for Synchrony Financial's net interest income. The coronavirus crisis has hit the company's bottom line to a significant degree in 2020, but Synchrony Financial nevertheless remained profitable during the most recent year. Synchrony made a strong recovery from the pandemic impact during 2021 already. Our estimate for this year's earnings-per-share is well above pre-crisis levels, in line with the analyst consensus, as Synchrony Financial will see substantial tailwinds from growing consumer spending and lower provisions for credit losses.

## Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	---	---	9.5	12.0	10.7	12.4	8.7	8.4	14.9	6.7	<b>6.6</b>	<b>9.0</b>
Avg. Yld.	---	---	---	---	0.9%	1.7%	2.2%	2.4%	2.6%	1.9%	<b>2.3%</b>	<b>1.8%</b>

Synchrony Financial has been valued at a price to earnings ratio of roughly 10 throughout the majority of the years since its IPO. More recently, shares have started to trade at a lower valuation, even before the pandemic, in 2019. Based on our earnings-per-share estimate of \$5.80 for 2022, the earnings multiple is below 7 right now. Meaningful multiple expansion tailwinds should occur over the coming years, which will positively impact Synchrony Financial's total returns.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	---	---	---	9.6%	21.5%	19.3%	20.0%	38.6%	12.8%	<b>15.2%</b>	<b>16.3%</b>

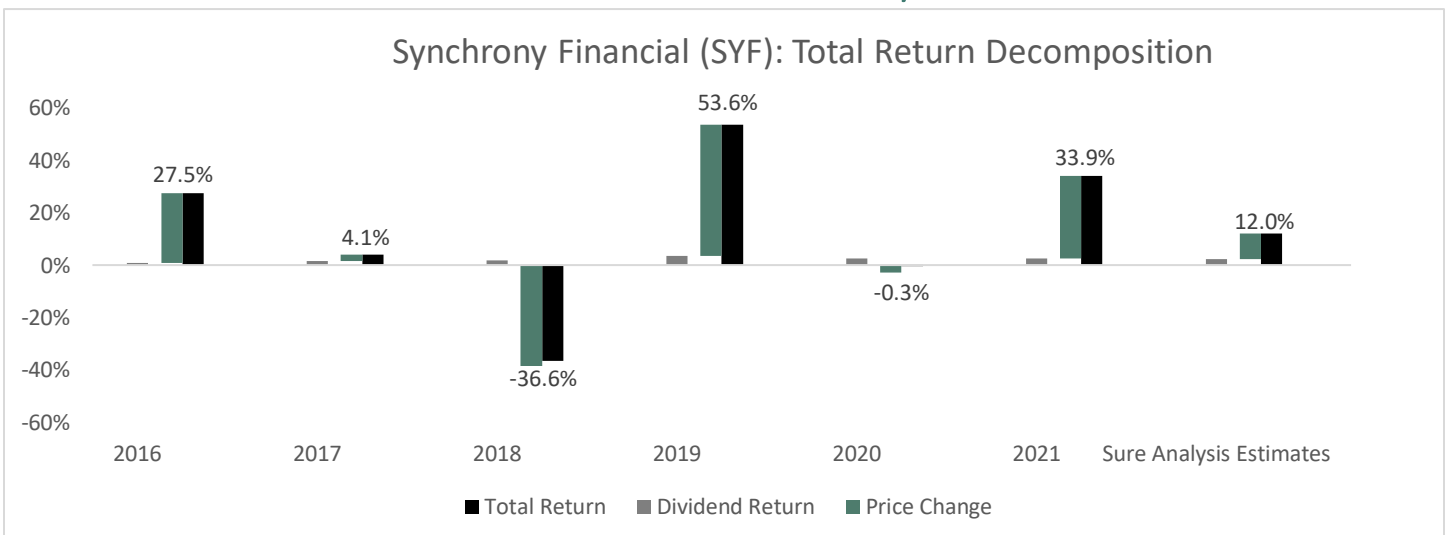

Synchrony Financial started to make dividend payments just a few years ago. Since then, the company has raised its dividend regularly and at a meaningful pace. Yet, Synchrony Financial's dividend payout ratio is still relatively low. We do not know whether Synchrony Financial will maintain its dividend during every recession, as the company's track record does not date back to the last financial crisis. During the current pandemic, the company has maintained its dividend.

Synchrony Financial is not the largest credit card company in the world; it has significantly larger peers, such as American Express. The market is large enough for a many companies to operate profitably, though, which is why Synchrony Financial's relatively small size is not necessarily a large disadvantage. During and following the current recession, Synchrony Financial should see a larger-than-normal amount of credit losses, but the company remained profitable in 2020. As this crisis is passing, profitability should recover as things revert back to normal.

## Final Thoughts & Recommendation

Synchrony Financial is one of the smaller credit card players. During the pandemic, shares initially sold off a lot, but as it became clear that the company would stomach the crisis well, its shares recovered. The long-term growth outlook is not too bad thanks to strong buybacks, and we believe that Synchrony Financial should be highly profitable in 2022 as the economy gets back on track. Based on this expectation, we rate shares a buy, as the total return outlook is attractive.
