Overview & Current Events

Triton International is the world's largest lessor of intermodal containers. The company was formed on July 12th, 2016, through an all-stock merger between Triton Container International Limited ("TCIL") and TAL International Group ("TAL"). The company's intermodal containers are large, standardized steel boxes used to transport freight by ship, rail, or truck. Due to the handling efficiencies they provide, intermodal containers are the primary means by which many goods and materials are shipped internationally. Per its latest filings, Triton's total fleet consisted of containers and chassis representing 6.3 million twenty-foot equivalent units. The company generates around \$1.7 billion in annual revenues and is headquartered in Hamilton, Bermuda.

On May 3rd, 2022, Triton reported its Q1-2022 results for the period ending March 31st, 2022. Total leasing revenues during the quarter equaled \$417.1 million, 20.3% higher versus the comparable period last year. Revenues were driven by strong momentum in goods consumption, high levels of trade growth, and lasting logistical bottlenecks that slowed container turn-times, leading to incremental demand for containers. Following limited vessel capacity, freight rates remained elevated as Triton's customers focus on container availability. As a result, the company's increased fleet remained highly occupied, leading to Triton achieving another quarter of record profitability.

Adjusted EPS came in at \$2.76 compared to \$1.91 in Q1-2021, following economies of scale and declining interest expenses. The company's fleet utilization remained stable quarter-over-quarter, at 99.6%, which is highly impressive. Amid record operating cash flows, Triton repurchased 1.7 million common shares (around 2.5% of its shares outstanding) during Q1. It further boosted its stock repurchase program by \$200 million. With contractually secured cash flows providing great cash flow visibility, management sees outstanding momentum through 2022. We are raising our FY2022 EPS estimate from \$10.00 to \$11.00 as a result.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	---	---	---	---	(\$0.24)	\$4.55	\$4.38	\$4.57	\$4.18	\$7.26	\$11.00	\$14.04
DPS	---	---	---	---	\$0.90	\$1.80	\$2.01	\$2.08	\$2.13	\$2.36	\$2.60	\$3.65
Shares¹	---	---	---	---	56	76.2	80.4	74.7	67.1	66.1	65.1	57.0

Despite Triton operating in arguably one of the most cyclical industries, with global shipping subject to multiple potential disruptions, the company has been able to post quite stable revenues, and consequently, earnings-per-share. With demand exceeding supply, the company's average remaining duration on the containers ordered in 2021 was 13 years, extending the remaining term lease on its total portfolio to 79 months. With the majority of its leases (81%) under long-term contracts, the company's financials are essentially guaranteed to remain resilient even under a potentially challenging trading environment in the medium term. Triton has been growing its dividend annually since its merger in 2016. The latest dividend increase was by 14%. However, as seen in the company's declining share count, management's preferable capital return method has been through stock buybacks. Triton has purchased approximately 20% of its common shares since the inception of the program in August 2018. We expect earnings-per-share growth of 5% going

¹ Share count is in millions.

forward, led by organic growth and stock buybacks. Additionally, we expect dividend growth of 7% through 2027, assuming a prudent deceleration ahead.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	---	---	---	---	---	7.9	7.5	7.4	9.6	7.6	5.8	8.0
Avg. Yld.	---	---	---	---	6.0%	5.0%	6.1%	6.2%	5.3%	4.2%	4.0%	3.2%

Despite Triton's resilient cash flows, shares have often traded with a below-average earnings multiple. We believe that this is partially due to the company being valued in line with its industry peers, who, unlike Triton, face cyclical revenues. In addition, the company is headquartered in Bermuda, which is likely pushing away institutional ownership due to its non-U.S. registry. For these reasons, we expect Triton's P/E ratio to remain low at 8, but we still expect it to expand considerably from its current forward multiple of 5.8. We believe the stock is substantially undervalued. The yield sits at 4.0%, and it's worth noting that Bermuda does not apply a withholding tax on dividends.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	---	---	---	---	40%	46%	46%	51%	33%	24%	26%

Considering its growing capital returns, comfortable payout ratio, and long-term contractually secured cash flows, we believe that Triton's dividend is very safe. Besides, the company would likely suspend buybacks before messing with dividend. While Triton was formed just a few years ago, a look at its pre-merger financials showcases a relatively resilient performance, with sales dropping by only -20% during the Great Financial Crisis, which is quite impressive considering its industry. The company's massively expanded booking amid the frenzy in demand for containers should shield future cash flows. Triton competes with at least six other major intermodal equipment leasing companies. However, the company believes that it can maintain its above-average pricing due to its high level of customer service and long-term relationships. Triton achieved roughly a 40% share of all new leasing transactions in 2021, reflecting the importance customers place on its deep container supply capability. It also further highlights Triton's position as the "go-to" supplier in the container leasing industry. While the company's balance sheet features a massive \$8.72 billion position of long-term debt, interest payments are covered by 10.2 times its operating cash flows.

Final Thoughts & Recommendation

Triton International is an industry leader whose operations are critical for the transportation of goods worldwide. The company's results have been snowballing and are set to remain very strong based on its containers' current average leasing duration. Yet, the stock remains significantly undervalued. We forecast annualized returns of around 14.8%, driven by the strong earnings growth visibility, a 4.0% yield, aggressive buybacks, and the possibility for a valuation expansion. We continue rating shares a strong buy.
