Overview & Current Events

Tenaris SA is a global manufacturer of steel pipes and related services that is headquartered in Luxembourg and is a majority-owned subsidiary of the Techint Group. Tenaris has significant exposure to oil prices as the majority of its customers operate in the energy sector. Its common stock is traded on three international stock exchanges, but U.S. investors can initiate a stake in the business through ADR shares. The company produces about \$10 billion in annual revenue under normal conditions and currently has a market capitalization of \$19.4 billion.

Tenaris reported first quarter earnings on April 27th, 2022, and results were better than expected. Adjusted earnings came to 85 cents per share, while revenue doubled year-over-year to \$2.37 billion, beating analyst estimates by \$60 million.

Adjusted EBITDA came to \$639 million in Q1, up from \$491 million in Q4, and up from \$201 million a year ago. As a percentage of revenue, adjusted EBITDA was 27%, up from 17% a year ago.

Sales were up 15% sequentially and 100% year-over-year, as higher prices as well as higher shipment volumes helped push the top line. The company said higher energy and raw materials costs weighed, but was more than offset by better pricing.

The company said it was discontinuing its industrial equipment business in Brazil, and that it was fully impairing its 49% share in the joint venture it has in Russia, costing \$15 million.

We've boosted our estimate of earnings-per-share to \$3.30 for this year following very high revenue for Q1 and a strong outlook for this year.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$2.88	\$2.62	\$2.28	\$1.08	\$0.15	\$0.77	\$1.48	\$1.26	\$0.22	\$1.90	\$3.30	\$3.30
DPS	\$0.76	\$0.86	\$0.90	\$0.90	\$0.90	\$0.82	\$0.82	\$0.82	\$0.14	\$0.54	\$0.56	\$0.56
Shares²	590	590	590	590	590	590	590	590	592	592	592	592

Tenaris' growth over the last decade has been far from constant, but this is largely due to the prolonged downturn in oil prices that began in 2014. Since the majority of Tenaris' customers operate within the energy sector, this reduces demand for its products and services and causes a decline in its aggregate sales.

Last year saw a strong rebound in Tenaris' earnings capacity. However, oil prices remain a key risk for Tenaris; much lower oil and gas prices significantly impaired the company's ability to produce earnings in 2020. Tenaris is beholden to capital expenditures of oil and gas producers, which generally decline when oil prices remain low for long periods of time. Our estimate of intermediate-term growth is 0%. The sharp recovery in energy prices, specifically for oil, have driven strong demand recovery for Tenaris as its customers invest more heavily in their own operations. We think the

recovery in earnings is accelerating into 2022 given this development, but that it may be difficult for Tenaris to grow from this year's very high earnings base.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	13.3	16.6	18.5	25.2	---	40.3	22.6	19.3	64.1	11.1	10.3	15.0
Avg. Yld.	2.0%	2.0%	2.1%	3.3%	3.4%	2.6%	2.5%	3.4%	1.0%	2.6%	1.6%	1.1%

Tenaris has traded at an average price-to-earnings ratio (P/E) of ~17 over the last decade, if we exclude the years in which its P/E ratio was artificially elevated due to depressed earnings caused by the decline in oil prices. We use 15 times earnings as our estimate of fair value given that Tenaris appears to be well on the way to recovery. Today, shares trade for just 10.3 times our earnings estimate of \$3.30, which means we expect a hugely positive impact from the valuation if the multiple were to revert to our fair value P/E estimate of 15 over time.

For income investors, we note that the country of Luxembourg imposes a 15% withholding tax on Tenaris' dividend payments. We expect the payout to remain at 17% of earnings by 2027, with the annual dividend at 56 cents per share. We note that Tenaris' unusual dividend policy is very difficult to forecast.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	26%	33%	40%	83%	600%	107%	55%	65%	64%	28%	17%	17%

Tenaris recently boosted its dividend on bumper earnings. We see the dividend outlook as murky at the moment, and Tenaris' dividend policy is quite variable.

Qualitatively, Tenaris' most compelling competitive advantage is its entrenched position in a technical segment of the energy sector that relies tremendously on strong customer-supplier relationships. As a large company with global operations, Tenaris' services are unlikely to be replaced by newer, smaller industry disruptors. Its leverage to the oil and gas markets has been both a blessing and a curse in recent years. Tenaris is not susceptible to recessions so much as oil prices, so investors should focus on the latter, not the former, when assessing safety.

Final Thoughts & Recommendation

We see Tenaris as having the pieces in place to continue to recover, and some of that progress is being seen in results already. With 9% total return prospects, we rate Tenaris as a hold, but note that investors are taking on inherent oil price risk by owning shares. The valuation is low today and, in our view, doesn't reflect outstanding earnings potential for 2022. However, we find the outlook for growth from here to be difficult.
