Overview & Current Events

Trinity Industries is a leading provider of rail transportation products and services in North America. The business of the company is classified primarily under two reporting segments: Railcar Leasing, which owns and operates a fleet of railcars and provides third-party fleet leasing, management, and administrative services; and the Rail Products Group, which manufactures and sells railcars and related parts and components and provides railcar maintenance and modification services.

On April 27th, 2022, the company announced results for the first quarter of 2022, ending March 31st, 2022. Trinity reported revenue of \$472.7 million in Q1 2022, representing significant year-over-year growth of 42.9% compared to \$330.7 million in Q1 2021. The revenue rise was driven by the Rail Products Group, which reported revenues of \$391.1 million in the first quarter compared with \$261.0 million in the same period last year. Specifically, the increase in revenue for the rail products business derived from higher deliveries. The Rail Products Group received orders for 5,055 railcars and delivered 2,470 railcars compared to deliveries of 1,895 and new railcar orders of 1,410 in Q1 2021. Despite the higher sales, the company reported lower operating margins which stood at 11.6% in Q1 2022 compared with 15.5% in Q1 2021. The lower margins were driven by costs associated with external deliveries in the Rail Products Group, higher fleet operating costs, and increased depreciation in the Leasing Group. The Leasing Group's lease fleet of 107,090 company-owned railcars was 96.5% utilized as of March 31st, 2022, compared to a lease fleet utilization of 94.5% on 107,970 company-owned railcars as of March 31st, 2021.

After the first quarter announcement, management has provided full-year guidance for 2022. The industry deliveries of railcars are expected to be between 40,000 to 50,000. In addition, the company forecasts capital expenditures of \$35 million to \$45 million, while net investment in the lease fleet will be \$450 million to \$550 million during the year. As a result, management expects TRN's EPS to be in the range of \$0.85 to \$1.05.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$1.58	\$2.34	\$4.19	\$5.08	\$2.25	\$1.41	\$0.70	\$1.27	\$0.34	\$0.56	\$1.02	\$1.49
DPS	\$0.19	\$0.25	\$0.38	\$0.43	\$0.44	\$0.50	\$0.52	\$0.64	\$0.76	\$0.84	\$0.92	\$1.24
Shares	163.4	163.4	155.7	152.9	152.2	150.9	133.3	119.7	111.2	83.3	83.0	60.2

Trinity Industries has been adversely affected by the supply chain disruptions and higher costs after the pandemic outbreak over the past two years, along with implementing the Precision Scheduled Railroading model. As a result, the company's net income declined to \$0.56 per share in 2021. However, we see an uptick in late demand, which is reflected by the company's entire order book for 2022. The company is currently taking orders into 2023. We also expect steel prices to normalize going forward, thus reducing cost pressures on the company. As a result, we are forecasting EPS growth of 8% over the next five years, leading to our estimated EPS of \$1.49 in 2027. We also expect the company to grow its dividend to \$1.24 in 2027, in light of expanding EPS. The share buybacks by the company have also played a pivotal role in sustaining the high EPS growth rate as well. Trinity returned \$895 million to shareholders through \$88 million in dividends and \$807 million in share repurchases in 2021. After completing a \$250 million share repurchase authorization in Q3 2021, Trinity launched a new \$250-million share buyback program that runs through 2022.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Avg. P/E	9.6	9.3	9.0	5.6	9.6	20.8	46.5	16.4	60.4	51.0	26.6	15.0
Avg. Yld.	1.7%	1.6%	1.4%	2.1%	2.8%	2.3%	2.2%	3.1%	3.7%	3.0%	3.4%	5.5%

The railcar manufacturer currently trades at a forward P/E of 24.5, slightly higher than its long-term 9-year average P/E of 23.8 but significantly below its five-year average P/E of 39.0. Even though we believe that the declining steel prices and an uptick in demand will benefit the company in the near term, we assign a P/E of 15 to the stock, which we believe is a fair reflection of its value. Accordingly, our target price for the stock with an EPS of \$1.02 and P/E of 15 in 2027 stands at \$15.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	12%	11%	9%	8%	20%	35%	74%	50%	224%	150%	91%	83%

The company has paid a consistent dividend to its shareholders with a 10-year payout ratio averaging 59%, and we expect the company to maintain and increase its payout in the future. While commenting on the results, management noted that the repercussions of COVID-19 have negatively influenced the company as it incurred higher operating costs and reduced demand and employee availability. This is a good example of how macro-economic factors can easily affect the company's financials due to its highly cyclical nature. As a result, the company's operations are expected to remain under pressure in the near term. However, as demand lifts off and the price of steel normalizes in the future, the company would be in a much better position compared to where it is today. In addition, the leasing margins will improve in a rising rate environment, and the fleet's utilization ought to be high, driven by solid railcar demand. Nevertheless, an upcoming recession could adversely affect its performance.

Final Thoughts & Recommendation

While Trinity runs a capital-intensive cyclical business, we believe that increased bookings and reduced cost pressures will be a positive catalyst to EPS growth. Accordingly, Trinity's dividend growth prospects should remain strong throughout the cycle. However, we believe that any return potential to be produced by the underlying EPS and DPS growth could be offset by a valuation headwind. Therefore, shares earn a sell rating based on this rationale.
