Overview & Current Events

Abbott Laboratories, founded in 1888, is one of the largest medical appliances & equipment manufacturers in the world, comprised of four segments: Nutrition, Diagnostics, Established Pharmaceuticals and Medical Devices. With a market capitalization of \$192 billion, Abbott Laboratories provides products in over 160 countries and employs 113,000 people. The company generated \$43 billion in sales and \$9.4 billion in profit in 2021.

On December 10th, 2021, Abbott Laboratories declared a \$0.47 quarterly dividend, marking a 4.4% year-over-year increase. This was the company's 392nd consecutive payment and 50th straight year of increasing its dividend.

On July 20th, 2022, Abbott Laboratories reported second quarter results for the period ending June 30th, 2022. For the quarter, the company generated \$11.3 billion in sales (57% outside of the U.S.), representing a 10.6% increase compared to the second quarter of 2021. Adjusted earnings-per-share of \$1.43 compared favorably to \$1.17 in the prior year. Revenue was \$930 million better than expected while adjusted earnings-per-share topped estimates by \$0.29.

U.S. sales improved 36.6% while international was down 4.2%. Companywide organic sales growth was 14.3%. Results were once again up almost across the board with Diagnostics, Established Pharmaceuticals, and Medical Devices organic sales increasing 36.9%, 9.2%, and 7.5% respectively. Nutrition declined 4.5% due to a voluntary recall of certain powder formulas in the U.S. at one of the company's plants. The plant in question saw partial production restarted on July 1st, 2022.

Abbott Laboratories raised its guidance for 2022, with the company now expecting adjusted earnings-per-share of at least \$4.90 for the year, up from \$4.70 previously.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$4.99	\$2.01	\$2.28	\$2.15	\$2.20	\$2.50	\$2.88	\$3.24	\$3.65	\$5.21	\$4.90	\$6.25
DPS	\$2.01	\$0.56	\$0.88	\$0.96	\$1.04	\$1.06	\$1.12	\$1.28	\$1.44	\$1.80	\$1.88	\$2.64
Shares¹	1,577	1,548	1,508	1,473	1,473	1,744	1,756	1,781	1,786	1,789	1,765	1,750

The above table shows a significant gap between the 2012 and 2013 numbers, both for earnings-per-share as well as for dividends per share. Before and after that jump, both earnings-per-share and dividends have been growing relatively consistently. This gap is explained by the fact that Abbott Laboratories spun off its biotech business (which is now publicly traded as AbbVie with the ticker ABBV) in 2013.

AbbVie has been a very successful standalone company. When it was still owned by Abbott Laboratories it was a major growth driver. However, since the spin-off Abbott Laboratories' earnings-per-share growth rate has still been very solid. During the last five years in particular earnings growth has been quite strong.

With its strong position in growth markets such as diagnostics - Abbott Laboratories is the market leader in point-of-care diagnostics - and cardiovascular medical devices, Abbott Laboratories should be able to generate attractive long-term growth rates for both earnings-per-share and dividends. The ongoing COVID-19 pandemic puts a large unknown on

¹ In millions.

Abbott Laboratories (ABT)

Updated July 20th, 2022, by Nathan Parsh

short-term demand across the globe. However, we believe that Abbott will be resilient in this environment – especially considering the COVID-19 diagnostics tests. We are forecasting 5% growth coming off \$4.90 in EPS for 2022.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	12.6	17.8	18.0	21.5	18.4	19.4	22.3	24.9	26.3	22.6	22.2	20.0
Avg. Yld.	3.2%	1.6%	2.1%	2.1%	2.1%	2.2%	1.7%	1.6%	1.5%	1.5%	1.7%	2.1%

Shares of Abbott Laboratories have decreased \$14, or 11.4%, since our April 20th, 2022 report. The stock’s price-to-earnings ratio expanded after the spin-off of AbbVie, which is not surprising, as AbbVie had been the somewhat riskier part of the business. In addition, shares were coming off recession lows. Abbott Laboratories as a med-tech pure play is a low-risk investment, but its current valuation seems elevated, nevertheless. We believe that shares are trading above fair value, pegged at 20 times earnings, implying the potential for a valuation headwind from this point.

Abbott Laboratories has declared almost 400 consecutive dividends and increased its payout for 50 straight years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	40%	28%	39%	45%	47%	42%	39%	40%	39%	35%	38%	42%

Abbott Laboratories’ dividend payout ratio has never been above 50% throughout the last decade. Coupled with the fact that the company’s earnings-per-share did not decline during the last financial crisis – it actually continued to grow – Abbott Laboratories’ dividend looks very safe.

After the spin-off of AbbVie, Abbott Laboratories has proven to be a very stable performer with a solid outlook. The markets that Abbott Laboratories addresses are not cyclical as medical devices and diagnostics are needed whether the economy is doing well or not. This explains why Abbott Laboratories performed so well during the last financial crisis. Moreover, for future recessions, we believe Abbott Laboratories will most likely not be vulnerable. The company is a leader in the markets it addresses, such as in point-of-care diagnostics, which provides competitive advantages due to Abbott Laboratories’ scale and global reach. This is especially true given the current global pandemic.

Final Thoughts & Recommendation

We continue to find that Abbott Laboratories is a fundamentally strong company that addresses attractive and growing markets. However, the stock’s current valuation remains slightly ahead of our target. We are projecting total annual return potential of 4.6%, up from 1.4% at the time of our last report. This projected return stems from 5% earnings growth and a 1.7% starting dividend yield offset by a valuation headwind. Most of the company’s segments showed high growth rates. Nutrition remains a headwind, but the production restart at the formula plant is a positive sign. We now rate shares of Abbott laboratories as a hold due to projected returns.
