Overview & Current Events

CSX can trace its roots all the way back to 1827 when the B&O Railroad was first chartered. From just 13 miles of track, CSX has grown to cover 23 states and more than 20,000 route miles. CSX provides rail, rail-to-truck, and intermodal transport services. The company's market capitalization is \$66 billion after a recent selloff in the stock, and it should produce close to \$15 billion in revenue in 2022.

CSX reported second quarter earnings on July 20th, 2022, and results were better than expected on both the top and bottom lines. Earnings-per-share came to 54 cents, which was impressively six cents ahead of estimates. Revenue was up 28% year-over-year to \$3.82 billion, which was \$150 million better than expectations.

The company said nearly all of its markets improved from a revenue perspective, driven by pricing gains, fuel surcharge revenue, and the addition of Quality Carriers.

Operating income was \$1.7 billion, up fractionally year-over-year. Operating ratio was up to 55.4%, which included the effects of lower real estate gains, the Quality Carriers acquisition, and higher fuel prices. The company's operating ratio was unsustainably low in the year-ago period at 43.4%.

We now see \$1.85 in earnings-per-share for this year, up slightly from our prior estimate of \$1.80. The environment for revenue is very strong, but margins are at risk due to rising labor and fuel costs.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$0.60	\$0.61	\$0.64	\$0.67	\$0.60	\$0.77	\$1.28	\$1.39	\$1.20	\$1.56	\$1.85	\$2.72
DPS	\$0.18	\$0.20	\$0.21	\$0.23	\$0.24	\$0.26	\$0.29	\$0.32	\$0.35	\$0.37	\$0.40	\$0.67
Shares¹	3,063	3,027	2,976	2,898	2,784	2,670	2,580	2,334	2,304	2,217	2,150	1,700

CSX's earnings-per-share has grown somewhat unpredictably over the past decade as its fortunes are tied to rail volumes and pricing strength, both of which are heavily dependent upon particular industries and economic conditions. CSX stands to gain in the form of modest revenue increases in the coming years, helping to fuel our estimate of 8% earnings-per-share growth annually. The remainder will come from improved operating efficiency leading to higher margins, as well as sizable buyback spending, although this was nearly halted in 2020. We see the share count declining in the mid-single digits annually as CSX generates strong free cash flow and puts it to use. We see a path to recovery that has cleared up in the past couple of quarters and believe that CSX's growth will continue its improvement in 2022, with record earnings on tap.

Likewise, we see the dividend increasing at roughly the rate of earnings, reaching \$0.67 in five years from today's level of \$0.40. CSX has put buybacks first in recent years but with a much-reduced capex budget as part of its operational efficiency initiatives, more cash should be freed up for dividend increases. With the payout ratio still very low, CSX has plenty of room to continue its streak of dividend increases while still affording it the ability to buy back stock.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	12.1	13.6	16.1	15.7	15.5	21.8	16.8	17.2	20.6	21.0	16.8	18.0
Avg. Yld.	2.5%	2.4%	2.0%	2.2%	2.6%	1.6%	1.4%	1.3%	1.4%	1.1%	1.3%	1.4%

CSX's price-to-earnings multiple is much lower than our last update, given the share price has declined while earnings estimates are higher. Shares go for 16.8 times this year's estimated earnings. This is now somewhat lower than our estimate of fair value of 18 times earnings, so we now see a tailwind from the valuation. We expect the yield to remain about where it is for the foreseeable future.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	30%	32%	33%	35%	40%	34%	23%	23%	29%	24%	22%	25%

CSX's payout ratio remains low and as a result, is well covered. Indeed, its dividend safety is outstanding, but we note that the company has made it clear buybacks take priority over dividend growth.

The company's competitive advantage is in its lean operating structure, as well as its dominance in its service area. CSX looks poised to gain from its leverage to intermodal transport and the coal export market, although these things will not save it from recessions; rail operators are particularly sensitive to economic conditions and we see that as the key risk to owning CSX in the coming years, particularly considering the pandemic. That weakness was temporary, though, and we forecast more strong growth in 2022.

Final Thoughts & Recommendation

CSX is now trading under fair value. It could see total annual returns in the next five years of 10.8%, consisting of the low current yield, 8% earnings growth and a small tailwind from the valuation. CSX could therefore be appropriate for dividend growth investors as well as those seeking earnings growth, but the low current yield would make it unattractive for those seeking high current income. However, improving total return prospects have us upgrading the stock from hold to buy.
