Overview & Current Events

Dover Corporation is a diversified global industrial manufacturer with annual revenues of nearly \$9 billion. Dover is composed of five reporting segments: Engineered Systems, Clean Energy & Fueling, Pumps & Process Solutions, Imaging & Identification, and Climate & Sustainability Technologies. Dover is a Dividend King with more than six decades of dividend increases. Slightly more than half of revenues come from the U.S., with the remainder coming from international markets.

On August 5th, 2021, Dover announced that it was raising its dividend 1% for the September 15th, 2021 payment, marking 66 consecutive years of dividend growth. This is the second-longest dividend growth streak among U.S. companies.

On July 21st, 2022 Dover reported second quarter earnings results for the period ending June 30th, 2022. Revenue grew 6.4% to \$2.16 billion, but was \$20 million less than expected. Adjusted earnings-per-share of \$2.14 compared favorably to \$2.06 in the prior year and was \$0.07 above estimates.

Organic revenue remains high, with the company seeing a 7% increase in the second quarter. Engineered Products increased 19% organically, as waste handling, vehicle services, and industrial winches and automation continue to see high demand. Clean Energy & Fueling was down 1% as gains in fueling, vehicle wash, and fuel transport in North America were more than offset by weakness in above-ground equipment. Imaging & Identification was lower by 1% as supply chain constraints impacted printers and services. Software performed well. Pumps & Process Solutions grew 7% due to improvements in volumes for non-COVID-19 biopharma as well as industrial pumps and precision components. Climate & Sustainability Technologies improved 11% as all businesses and major product lines were in high demand during the quarter. Dover's backlog grew 30% year-over-year to \$3.3 billion, though this was 2.9% lower quarter-over-quarter.

Dover reaffirmed guidance for 2022. Adjusted earnings-per-share are expected in a range of \$8.45 to \$8.65 with revenue projected to grow 8% to 10%. Dover did raise its organic growth forecast to 8% to 10% from 7% to 9% previously.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	13.2	15.4	18.5	18.5	20.7	19.5	17.6	16.4	18.7	23.8	14.7	17.0
Avg. Yld.	2.2%	1.8%	1.8%	2.4%	2.6%	2.1%	2.2%	2.0%	1.9%	1.1%	1.6%	1.2%

Shares of Dover have declined \$18, or 12.5%, since our April 21st, 2022 update. Shares trade with a price-to-earnings ratio of 14.7. We reaffirm our P/E target of 17 to reflect the company's average valuation over the last decade. If the company's P/E ratio reverts to its long-term average over the next five years then annualized returns would see a 2.9% benefit from multiple expansion during this time period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	29%	28%	34%	45%	58%	42%	32%	34%	35%	26%	23%	20%

Investors should keep in mind that Dover is vulnerable to recessions due to its cyclical nature. In 2009, its earnings-per-share plunged 45%, from \$3.67 to \$2.00. Accordingly, this stock should not be seen as a defensive portfolio constituent. Dover's key competitive advantage is its focus on niche industries. The company offers highly engineered products that customers have come to depend on, as switching to a different provider may not yield the same results for their businesses.

Final Thoughts & Recommendation

After second quarter results, Dover Corporation is now projected to offer a total annual return of 12.3% through 2027, up from our prior estimate of 9.4%. Our estimated return is based on 8% earnings growth, a starting yield of 1.6%, and a low single-digit contribution from multiple expansion. The majority of Dover's businesses continue to see high growth rates, though supply chain constraints remain in certain areas. We maintain our five-year price target of \$214, but now view shares of Dover as a buy due to projected returns.
