Overview & Current Events

IBM is a global information technology company that provides integrated enterprise solutions for software, hardware, and services. IBM's focus is running mission critical systems for large, multi-national customers and governments. IBM typically provides end-to-end solutions. IBM spun off Kyndryl, its managed infrastructure business, on November 3rd, 2021, but is still one of the largest IT services companies in the world. The company now has four business segments: Software, Consulting, Infrastructure, and Financing. IBM had annual revenue of ~\$57.4B in 2021 (not including Kyndryl).

IBM reported solid results for Q2 2022 on July 18th, 2022. Companywide revenue increased 16% to \$15,535M from \$14,218M while diluted adjusted earnings per share rose 43% to \$2.31 from \$1.61 on a year-over-year basis. Diluted GAAP earnings per share rose 79% to \$1.61 in the quarter from \$0.90 in the prior year.

Revenue for Software increased 12% to \$6,166M from \$5,795M in comparable quarters due to 9% growth in Hybrid Platform & Solutions and a 19% increase in Transaction Processing. Revenue was up 17% for RedHat, 8% for Automation, 4% for Data & AI, and 5% for Security. Consulting revenue increased 18% to \$4,809M from \$4,378M due to 16% rise in Business Transformation, 23% growth in Technology Consulting, and 17% growth in Application Operations. The book-to-bill ratio is a healthy 1.1X. Revenue for Infrastructure was up 25% at \$4,235M from \$3,560M due to a 41% rise in Hybrid Infrastructure and 5% growth in Infrastructure Support. Z Systems had 77% growth.

IBM completed its spinoff of Kyndryl at end of 2021, which was reported as discontinued operations. The company reorganized its remaining business units into three operating segments: Software, Consulting, and Infrastructure.

IBM continues its higher pace of acquisitions with Envizi, Sentaca, Neudesic, Randori, and Databand.ai expanding its expertise and offerings. It is planning to sell Watson Health for \$1 billion.

IBM forecasts revenue growth in the high-single-digits and free cash flow of about \$10 billion in 2022.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$14.37	\$14.94	\$15.59	\$13.60	\$12.39	\$13.66	\$13.81	\$12.81	\$8.67	\$7.93	\$9.80	\$11.92
DPS	\$3.30	\$3.70	\$4.25	\$5.00	\$5.50	\$5.90	\$6.21	\$6.43	\$6.51	\$6.56	\$6.60	\$6.94
Shares ¹	1117	1054	991	966	946	922	893	887	893	898	898	898

IBM's core operations are profitable. But IBM had difficulty generating growth in the past several years due to the transition to cloud and SaaS in the IT industry and IBM's late emphasis on this market. However, IBM is now focusing on cloud and SaaS and intends to be a major player in hybrid cloud as illustrated by the Red Hat and many smaller acquisitions. Earnings in 2020 were impacted by COVID-19 and non-operating pre-tax charges for business simplification. The company spun off Kyndryl in 2021, which had declining revenue and was not profitable. IBM has reorganized the remaining businesses into three operating segments. Due to the Red Hat acquisition and impact of the coronavirus we are not expecting any share buybacks in 2022 as the company deleverages. The company is increasing the dividend but at a very low rate of less than 1% annually.

Disclosure: This analyst is long IBM.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	13.7	13.0	11.7	11.4	12.1	11.6	10.4	11.2	14.4	13.4	13.2	12.0
Avg. Yld.	1.7%	1.9%	2.3%	3.2%	3.7%	3.7%	5.8%	4.5%	5.2%	4.9%	5.1%	4.8%

IBM's stock price is down slightly since our last report. We have lowered our earnings estimate for 2022. Our fair value estimate is now \$118 using a fair value multiple of 12X. We increased the multiple due to rising software revenue. Our five-year price target is now \$143 share. The current dividend yield is still well above the market average.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2021	2027
Payout	23%	25%	27%	37%	44%	43%	45%	50%	75%	83%	<i>67%</i>	58%

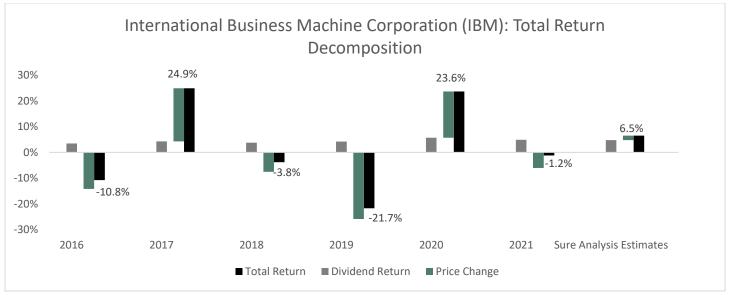

IBM's competitive strength is its brand, entrenched customer relations and extensive patent portfolio. IBM is also the market leader in mainframe computers where it has 90% of the market and little competition. IBM is a different company after the Kyndryl spin off, but it should still be recession resistant. The nature of mission critical IT enterprise systems and software makes this unlikely to change in the near future. IBM has a leading position in networking, global cellular connections, credit card transaction processing, airlines, banks, hotels, retail, etc. However, the company does face risks in that many of its competitors have emphasized the cloud earlier and are growing faster.

IBM is deleveraging after increasing debt for acquiring Red Hat. IBM divides its debt into core debt and financing debt. Debt is down ~\$22B+ since the acquisition and core debt is now \$38.0B and is offset by \$7.8B in cash, equivalents, and securities. Global Financing debt is \$12.3B and it is decreasing due to winding down of OEM financing.

Final Thoughts & Recommendation

At present we are forecasting a 6.5% annualized total return for the next five years from a dividend yield of 5.1%, 4% EPS growth, and (-1.9%) from P/E contraction. IBM is now primarily a software and consulting company focusing on the hybrid cloud. IBM should benefit moving forward as software sales are higher margin. The current dividend yield is attractive, and earnings coverage has improved since 2021. At the current price, we rate this stock a hold.
