Overview & Current Events

KKR Real Estate Finance Trust is a real estate finance company that engages primarily in originating and acquiring transitional senior loans secured by institutional-quality commercial real estate (“CRE”) properties. These senior loans are originally owned and operated by experienced and well-capitalized sponsors located in liquid markets with strong underlying fundamentals. The company has a \$7.9 billion purpose-built portfolio of senior loans that’s 73% secured by multifamily and office properties owned by high-quality sponsors. KREF generates around \$181 million in annual revenues and is headquartered in New York, New York.

On July 26th, 2022, KREF reported its Q2 results for the quarter ending June 30th, 2022. Total net interest income grew by 12.5% year-over-year to \$45.8 million, with the company originating and funding 11 floating-rate loans totaling \$1.03 billion and \$948.1 million, respectively. Loans featured a weighted average appraised loan-to-value ratio and coupon of 63% and 4.5%, respectively. Consequently, distributable earnings came in at \$33.1 million, or \$0.48/share, vs. \$29.7 million, or \$0.47/share in Q1-2022. During the quarter, the company collected 100% of interest payments due on its loan portfolio, which, according to management, now has a weighted average risk rating of 3.0 (on a five-point scale). The company is set to benefit from the rising-rate environment amid a rotation out of higher rate-floor loans. We continue to forecast FY-2022 distributable earnings per share of \$1.74. We remain conservative regarding potential write-offs through the year and/or the possibility of uncollected interest payments.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
DEPS²	---	---	---	\$1.95	\$1.61	\$1.30	\$1.58	\$1.67	\$1.95	\$1.63	\$1.74	\$1.87
DPS	---	---	---	\$0.73	\$1.22	\$1.62	\$1.69	\$1.72	\$1.72	\$1.72	\$1.72	\$1.81
Shares³	---	---	---	8.6	19.3	45.3	55.1	57.4	55.6	59.3	68.5	90.0

Since the company’s IPO, KREF has rapidly grown its loan portfolio by borrowing at lower rates and issuing shares with a lower cost of equity than the spreads it receives as net interest income from its loan portfolio. The previously low-rate environment constituted a fantastic environment for KREF to leverage its world-renowned manager’s (KRR) access to low-cost financing. The company’s term loan financing facilities also provide KRR matched-term financing on a non-mark-to-market and non-recourse basis. Hence, not only is the company borrowing on the cheap and securing better credits due to its manager’s reputation but also, its liability structure is resilient from a mark-to-market viewpoint. This enhances KREF’s ability to manage risk and its liquidity position during less favorable market cycles. While the strategy has worked successfully so far, KREF’s future profitability is susceptible to changes in interest rates, with 100% of its portfolio attached to floating rates. Based on its current portfolio composition, a 1.5% and a 2.0% increase in LIBOR would boost the quarterly net interest income per share by \$0.18 and \$0.41, respectively. The latter translates to

¹ Estimated dates based on past dividend dates.

² Distributable earnings per share modify GAAP net income (loss) by excluding (i) non-cash equity compensation expense, (ii) depreciation and amortization, (iii) any unrealized gains or losses. It’s a proxy of dividend coverage for income-oriented investors.

³ Share count is in millions.

KKR Real Estate Finance Trust Inc. (KREF)

Updated July 26th, 2022 by Nikolaos Sismanis

around 23.5% of its DEPS on an annualized basis. Thus, the ongoing rising-rates environment could benefit KREF, assuming its own financing remains cheap. Consequently, we are forecasting a modest earnings growth ahead of 1.5% per annum. The company has grown its dividend accordingly with its increasing DEPS. However, due to the risks associated with mortgage REITs, earnings to be easily compressed, while there is only minor room for growth. Thus, we are assuming dividends will grow by just around 1% in the medium term.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/DE	---	---	---	---	---	16.2	12.7	11.7	9.0	13.0	10.9	11.0
Avg. Yld.	---	---	---	---	---	7.7%	8.5%	8.8%	9.8%	8.1%	9.1%	8.8%

KREF has historically traded with an average price to distributable earnings ratio of 12.5. However, we believe that investors are most likely to value KREF based on its underlying yield and book value due to the company's business model. The yield currently stands at 9.1%, which we expect to remain at similar levels moving forward. At 11.0x DEPS, the stock offers a reasonable risk/reward profile. At the end of the quarter, the company's book value per share stood at \$19.36. Shares could be slightly undervalued, considering the accrued dividend value embedded in the stock.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	---	---	37%	76%	125%	107%	103%	88%	106%	99%	96%

While KREF's dividend is seemingly covered from the underlying distributable net income, there is only a thin margin to prevent a dividend cut in a scenario that would pressure the company's profitability. Hence, we don't consider it highly reliable. That being said, the company enjoys several qualities, including being managed by a leading global investment firm, KRR, which boasts \$479 billion of assets under management. The company is also led by a world-class management team of around 50 investment professionals who carry decades of experience in the mortgage industry. However, we can't ignore that the company operates in a highly competitive industry with various institutional lenders and investors. Further, a prolonged recession that could result in its borrowers missing on their payment schedule or an increase in interest rates could significantly impact the company's scheduled collections and overall investing spreads.

Final Thoughts & Recommendation

Backed by a credible sponsor, KREF has successfully grown its portfolio since its IPO and produced growing distributable earnings while paying its shareholders a substantial yield. Due to the macroeconomic environment, we remain cautious and predict humble growth rates in the medium-term. We forecast annualized returns of 9.3% in the medium-term, powered by KREF's yield, our thin growth estimates, and relatively stable valuation expectations. KREF, therefore, earns a hold rating. We caution that investors need to be wary of the risks attached to mortgage REITs.
