Overview & Current Events

Marsh McLennan is a global professional services holding company which is active in risk, strategy, and people. The four main global businesses of the corporation are Marsh (insurance broker and risk management), Guy Carpenter (reinsurance and capital strategies), Mercer (human resources and consulting) and Oliver Wyman (strategy, economic and brand consulting). The company's roots trace back to 1871 as the Dan H. Bomar Company, thus it has a 150 year history of leadership and innovation. The company has clients in roughly 130 countries and 83,000 colleagues globally. Marsh McLennan trades under the ticker symbol MMC on the NYSE. MMC is headquartered in New York, New York and is currently trading with a market capitalization of \$79 billion. The corporation generates nearly \$20 billion in annual revenues.

Marsh McLennan reported second quarter results on July 21st, 2022. Consolidated revenue for the quarter increased 7% year-over-year to \$5.4 billion. All of MMC's business reported higher revenue compared to last year. Adjusted operating income grew 8% to \$1.3 billion, and adjusted EPS rose 8% to \$1.89.

The company repurchased roughly 3.8 million shares of common stock for \$600 million in the second quarter. At the end of the quarter, MMC had \$909 million of cash and cash equivalents.

March McLennan Agency announced the acquisition of Clark Insurance in June and the acquisition of CS Insurance Strategies in July. Additionally, MMC announced a 10% quarterly dividend increase to \$0.590 per share.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$2.16	\$2.42	\$2.60	\$2.98	\$3.38	\$3.88	\$4.33	\$3.41	\$3.94	\$6.13	\$6.80	\$9.32
DPS	\$0.90	\$0.96	\$1.06	\$1.18	\$1.30	\$1.43	\$1.58	\$1.74	\$1.84	\$2.00	\$2.36	\$3.16
Shares²	545.0	547	540	522	515	509	504	503.6	503.6	503.0	500.0	485.0

Marsh McLennan, with only one or two earnings bumps in the past decade, has produced a consistent and positive trail of earnings growth. In the past nine and five years, MMC has grown diluted EPS at 12.3% and 12.6% annually, on average. The dividend has grown at around 8.4% in the last five years. The corporation has successfully raised the dividend for twelve consecutive years, and we see it growing in-line with earnings going forward.

As MMC continues to acquire new bolt-on businesses (as with PayneWest, Compass Financial Partners, Heritage Insurance, INSPRO, etc.), increase revenues, gain clients, expand operating margins (particularly in Risk & Insurance services and consulting), and repurchase shares, we believe the company can grow earnings at a 6.5% annual clip going into 2027, to earn \$9.32. As a result, we also expect the dividend to grow at 6% per annum to reach \$3.16 in 2027. The payout ratio has been range-bound between 35% and 50% in the last decade, and we expect this will trend to the bottom of the range in the coming years, which leaves room for much more dividend growth in the coming years.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	15.3	17	19.7	18.9	18.8	19.9	19.2	28.6	27.7	30.7	23.1	22.5
Avg. Yld.	2.7%	2.3%	2.1%	2.1%	2.0%	1.9%	1.9%	1.8%	1.7%	1.3%	1.5%	1.5%

Marsh McLennan trades at 23.1 times this year's expected net earnings right now. This is 7% above the 10-year average PE of 21.6 and 8% below the 5-year average PE of 25.2. We believe that shares are overvalued right here, which results in a headwind to the stock price of -0.5% due to valuation compression. The dividend yield is in-line with the current yield of the S&P 500, as a result, MMC may not be suitable for yield-seeking income investors.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	42%	40%	41%	40%	38%	37%	36%	51%	47%	33%	35%	34%

The payout ratio has, in general, remained below 50% of earnings, thus we see the dividend as being very safe. During the great financial crisis, MMC kept the dividend steady at \$0.80 rather than increasing it which is why the dividend streak is 12 years, but we would like to point out that the dividend was not cut and would have had a few more years on the streak, but the corporation remained financially prudent. While earnings took a dive in 2007 – 2008, by 2009 they were again quite healthy (78% payout ratio showed the dividend as solvent), and surpassed previous records by 2011.

Marsh McLennan has a broad competitive advantage in that it has unparalleled geographic reach with clients in over 130 countries, with 23 of these countries contributing over \$100 million in revenue. Additionally, they list their talent pool as an advantage considering they have 83,000 experienced, diverse, and dynamic colleagues, nearly one third of which have over 10 years of tenure. Their scale is massive, and they are in leading positions across insurance brokerages and consulting and possess one of the largest capex spend among insurance brokers.

Final Thoughts & Recommendation

Marsh McLennan is a leading global professional services firm, with a wide range of businesses. We are forecasting annualized total returns of 7.4% into 2027, and the stock trades 3% above our estimated fair value. While we expect the company to continue growing, it appears to be trading with virtually no margin of safety. We rate MMC as a hold.
