Overview & Current Events

Royalty Pharma (RPRX) is a company that buys biopharmaceutical royalties and funds innovations in the biopharmaceutical industry. Royalty Pharma was founded in 1996, and the company had its initial public offering in June of 2020. Royalty Pharma's portfolio consists of royalties on approximately 35 marketed therapies and 10 development-stage product candidates that address various therapeutic areas, such as rare diseases, cancer, neurology, infectious disease, hematology, and diabetes. The company has a total of 14 billion-dollar therapies in its portfolio, and across the portfolio, the average royalty duration is 13 years. While some investors might be concerned that almost 30% of the company's royalty revenue comes from its Vertex CF franchisee, Vertex is the strongest competitor in its market, far ahead of its closest competitor. This concentration in Vertex CF appears to be a good way for the company to capitalize on strong assets.

On May 5th, 2022, Royalty Pharma reported Q1 2022 results for the period ending March 31st, 2022. The business saw diluted earnings-per-share of \$0.60, which lagged analyst estimates of \$0.72. Earnings-per-share fell 10.4% year-over-year from \$0.67 of earnings-per-share. Revenue fell 1.9% year-over-year to \$562 million. Management reaffirmed guidance for adjusted cash receipts of \$2,225-\$2,300 million for the fiscal year 2022. For the quarter, the company reported a 15% year-over-year increase in adjusted cash receipts to \$605 million. Adjusted cash receipts are the business's primary way of reporting cash flows. This strong performance was driven by double-digit expansion in royalties from the cystic fibrosis franchise, Tysabri, and recent royalty acquisitions. In the quarter, the company announced a \$450 million partnership with Cytokinetics for exposure in hypertrophic cardiomyopathy.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	---	---	---	---	---	---	---	---	\$1.32	\$1.49	\$2.94	\$4.32
DPS	---	---	---	---	---	---	---	---	\$0.30	\$0.68	\$0.76	\$1.12
Shares	---	---	---	---	---	---	---	---	375	415	415	500

Since Royalty Pharma went public in June of 2020, the stock has only traded for 2 years, so results are only available for 2020 and 2021. In 2022, we expect Royalty Pharma to deliver \$2.94 in earnings-per-share based on analyst estimates. We forecast that earnings-per-share will grow at a rate of 8% annually over the next 5 years, guiding our 2027 earnings-per-share estimate of \$4.32.

From 2020 to 2021, the dividend payment grew 126.7%. Going forward, we forecast a more normalized dividend growth rate, with dividends growing at 8% annually over the next 5 years. We expect 8% dividend growth, because this will be in line with the company's forecasted earnings-per-share growth rate.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	---	---	---	---	---	---	---	---	37.3	30.2	14.6	20.0
Avg. Yld.	---	---	---	---	---	---	---	---	0.6%	1.5%	1.7%	1.3%

With limited trading history, it's difficult to use historic P/E multiples or dividend yields to estimate the stock's appropriate valuation multiples. However, we estimate that a 20x P/E ratio is fair for the business based on its strong earnings-per-share growth potential and dividend growth potential. Today, the stock offers a 1.7% dividend yield, which is low for investors who prioritize dividend income, but investors might consider the stock if they like the business model of buying biopharmaceutical royalties.

Safety, Quality, Competitive Advantage, & Recession Resiliency

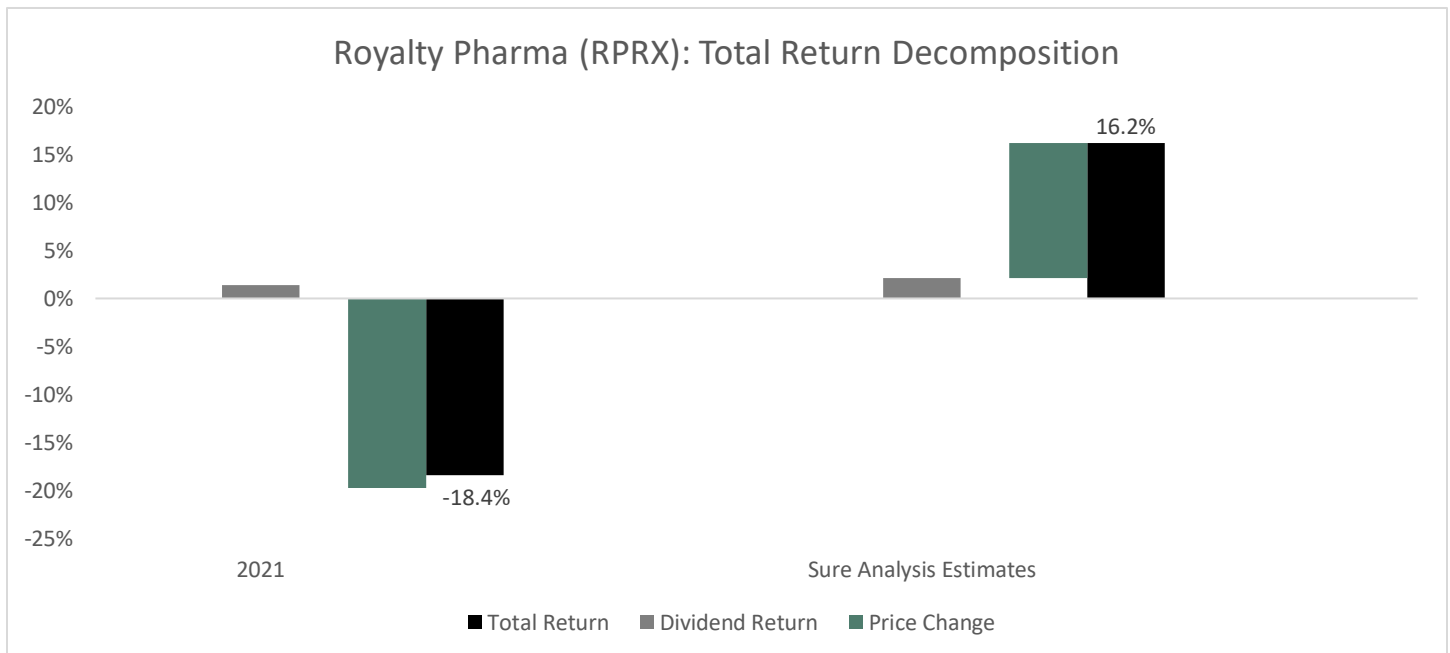

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	---	---	---	---	---	---	---	23%	46%	26%	26%

Going forward, we expect Royalty Pharma to have about a 26% payout ratio. We project that the dividend will be safe since the low payout ratio signifies that the dividend is adequately backed by strong earnings-per-share. Royalty Pharma has a strong balance sheet; we see no liquidity or solvency risks with this company.

Final Thoughts & Recommendation

Royalty Pharma offers investors an opportunity to invest in a business that buys and holds biopharmaceutical royalties. By investing in strong royalties, Royalty Pharma has the chance to position itself as a leader in niche markets. At today's price, we rate the stock as a Buy because total return prospects come in at 16.2% annually over the next five years, due to strong growth estimates and a valuation multiple rerating. While this stock might not be attractive for income investors due to the low dividend, growth investors might be interested in this stock for its strong growth prospects and attractive royalty portfolio.
