Overview & Current Events

Raytheon Technologies (RTX) was created on April 3rd, 2020, after the completion of the merger between Raytheon (previous ticker: RTN) and United Technologies (previous ticker: UTX), following United Technologies' spin-offs of its Carrier (CARR) and Otis (OTIS) businesses. The combined business, trading with a \$136 billion market cap and headquartered in Waltham, MA, is one of the largest aerospace and defense companies in the world with \$64 billion in 2021 sales and a global team of 174,000 employees, including 60,000 engineers and scientists. The company has four segments: Collins Aerospace Systems, Pratt & Whitney, Raytheon Intelligence & Space and Raytheon Missiles & Defense.

On April 25th, 2022, Raytheon Technologies increased its quarterly dividend 7.8% to \$0.55.

On July 26th, 2022, Raytheon Technologies reported Q2 results for the period ending June 30th, 2022. This marks the ninth quarter of reporting all four segments together as a combined business. Revenue grew 2.7% to \$16.3 billion, but was \$300 million less than expected. Adjusted net income equaled \$1.722 billion, or \$1.16 per share, compared to \$1.565 billion, or \$1.03 per share. Adjusted earnings-per-share was \$0.05 ahead of estimates.

Results were up 10% and 16% in the Collins Aerospace and Pratt & Whitney segments, respectively, while Missiles & Defense and Intelligence & Space segments were down -11% and -6% respectively. Raytheon Technologies backlog at the end of the quarter was \$161 billion, compared to \$154 billion in the first quarter, of which \$96 billion was from commercial aerospace and \$65 billion was from defense.

Raytheon Technologies reaffirmed prior guidance for 2022, with the company still expecting sales of \$67.75 billion to \$68.75 billion and adjusted earnings-per-share of \$4.60 to \$4.80.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$5.34	\$6.21	\$6.82	\$6.29	\$6.61	\$6.60	\$7.61	\$8.26	\$2.73	\$4.27	\$4.70	\$6.59
DPS	\$2.03	\$2.20	\$2.36	\$2.56	\$2.62	\$2.72	\$2.84	\$2.94	\$2.16	\$2.01	\$2.20	\$3.09
Shares¹	919	917	909	838	809	799	861	864	1,515	1,509	1,489	1,475

Note that we have elected to show United Technologies' history through 2019, as ~57% of the new business is now owned by legacy UTX shareholders. However, the company is much different today with the merger and spin-offs. With that being said, both United Technologies and Raytheon have put together solid operating records. In the last decade United Technologies grew earnings-per-share by an average rate of 7.2%, while increasing its dividend for 28 years. Moving forward we anticipate solid growth to continue, forecasting 7% growth over the intermediate term. This takes into account the strong history of the underlying operating businesses, along with the idea of growth becoming more difficult given the size of the business along with the recent uncertainty related to the worldwide COVID-19 pandemic.

¹ In millions.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	14.7	16	16.4	17.0	15.3	17.7	16.8	16.1	22.0	18.4	19.6	16.0
Avg. Yld.	2.6%	2.2%	2.1%	2.4%	2.6%	2.3%	2.2%	2.2%	3.6%	2.6%	2.4%	2.9%

Once again note that we are using the history of United Technologies, which has traded with an average P/E ratio of about 16 times earnings over the past decade. We believe this is a fair starting multiple, considering the quality and growth prospects of the firm. Shares of Raytheon Technologies have decreased \$8, or 8%, since our April 26th, 2022 update. With shares trading at nearly 20 times estimated earnings, this implies a valuation headwind. Reverting to our target valuation would decrease annual returns by 4.0% through 2027.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	38%	35%	35%	41%	40%	41%	37%	36%	79%	47%	47%	47%

Both United Technologies and Raytheon showed tremendous resiliency during the last recession, with UTX posting \$4.90, \$4.12, \$4.74, and \$5.49 in earnings-per-share during the 2008 through 2011 timeframe, while Raytheon increased earnings every year during the recession. Moreover, both companies kept increasing their dividends during this period.

As of Q2 2022 Raytheon Technologies held \$4.8 billion in cash, \$41.5 billion in current assets, and \$159 billion in total assets against \$37.8 billion in current liabilities and \$87 billion in total liabilities. Long-term debt stood at \$31.3 billion.

Final Thoughts & Recommendation

We remain enthused on a number of fronts about Raytheon Technologies, including the storied histories of the companies, the resilient businesses, and the tremendous backlog. However, the valuation still leaves something to be desired. We are forecasting a 5.3% annual total return through 2027, up from 3.5% previously. Our forecast stems from 7% growth rate and a 2.4% dividend yield offset by the potential for a valuation headwind. Shares now earn a hold rating due to projected results.
