Overview & Current Events

President Lincoln signed the Pacific Railway Act of 1862 that authorized the Union Pacific Railroad Company to build a rail line west towards the coast from the Missouri River. Today, Union Pacific is the largest railroad company in the country and operates more than 32,000 miles of rail throughout the western two-thirds of the country. Union Pacific transports industrial and agricultural products, as well as coal and chemicals. The company generates more than \$24 billion in annual revenues.

On July 21st, 2022, Union Pacific announced second quarter earnings results for the period ending June 30th, 2022. Revenue grew 14% to \$6.27 billion, beating estimates by \$160 million. GAAP earnings-per-share of \$2.93 compared favorably to \$2.72 in the prior year and was \$0.08 above expectations. Union Pacific's operating ratio of 60.2% was 510 basis points higher than the prior year.

Revenue for Bulk products increased 10%, as average revenue per car was offset by a 1% decline in volume due to a decline in car supply. Coal and renewables revenue was higher by 2% while grain fell 4%. Revenue for the Industrial category grew 12% as volume was up 6% and average revenue per car load improved by 7%. Metals & Minerals improved 13% due to construction growth while higher demand for Industrial Chemicals & Plastics drove a 3% increase. The Premium category was especially strong as revenue improved 19%. A volume decline of 5% only partially offset a 26% increase in average revenue per car. Intermodal was down 8% due to global supply chain constraints, but Automotive was up 11%. The operating ratio declined so drastically as the company as available cars were limited to reduce congestion.

We now expect that Union Pacific will earn \$11.58 in 2022, down slightly from \$11.72 previously.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$4.14	\$4.71	\$5.75	\$5.41	\$5.07	\$5.79	\$7.91	\$8.38	\$8.12	\$9.96	\$11.58	\$16.24
DPS	\$1.25	\$1.48	\$1.91	\$2.20	\$2.26	\$2.48	\$3.06	\$3.70	\$3.88	\$4.29	\$5.20	\$7.29
Shares³	939	912	883	849	816	781	755	695	674	667	626	600

Earnings-per-share have increased at a rate of more than 10% per year over the past decade, though much of this growth occurred over the past few years. Earnings have increased at a rate of 14.4% over the past five years.

We believe that an earnings-per-share growth rate of 7% takes into account the quality of the firm and strong results over the past few years while reconciling that earnings-per-share are starting from a high base.

Union Pacific has increased its dividend for each of the past 15 years. The company had been very aggressive in raising its dividend prior to 2020. The company did not increase its dividend in 2020, due to the impact of the COVID-19 pandemic on the business, though the dividend growth streak continued due to the timing of payments.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	14.1	16	17.6	18.3	17.4	19.1	18.1	20.1	21.9	25.3	18.3	18.0
Avg. Yld.	2.1%	2.0%	1.6%	2.2%	2.6%	2.2%	2.1%	2.2%	2.2%	1.7%	2.5%	2.5%

Shares of Union Pacific have declined \$22, or 9.4%, since our April 24th, 2022 report. Shares trade with a price-to-earnings ratio of 18.3 based off of our expected earnings-per-share for the current year. We reaffirm our five-year valuation target of 18 as this better reflects the quality of earnings results over the past few years as well as the expected growth following a COVID-19 recovery. If the stock reverts to our target multiple by 2027, then valuation would likely be a 0.3% headwind to total returns over this time frame.

Safety, Quality, Competitive Advantage, & Recession Resiliency

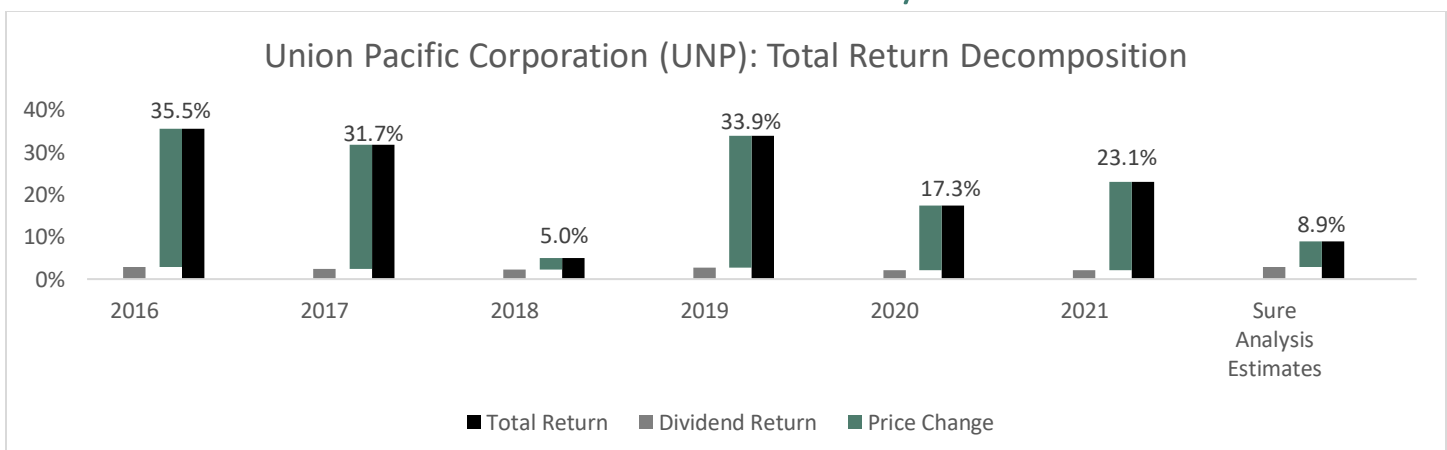

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	30%	31%	33%	41%	45%	43%	39%	46%	49%	43%	45%	45%

Union Pacific's earnings were impacted during the last recession. A decline in earnings would be likely to occur in the next recession as many of the products that the company transports, like automotive vehicles, are in high demand when the U.S. economy is strong. Union Pacific's dividend payout ratio has generally stayed below 40% over the last ten years. We feel that the company is unlikely to expand its dividend payout ratio much beyond current levels. Accelerated dividend growth will likely have to come from higher earnings growth. Union Pacific is the largest railroad in the U.S. and spans the western two-thirds of the country. This gives the company pricing power for its shipments. The railroad has stops along both the Canadian and Mexican borders, making Union Pacific an attractive option for businesses looking to ship goods to almost any place in North America.

Final Thoughts & Recommendation

After second quarter results, Union Pacific Corporation is now expected to offer a total annual return of 8.9% through 2027, up from our previous estimate of 6.8%. Our estimate stems from a 7% earnings growth rate and 2.5% starting yield that are offset by a small headwind from multiple reversion. Union Pacific saw excellent pricing in all of its major categories. The reduced availability of cars capped demand and helped drive the operating ratio much higher than what has been normal for the company. Union Pacific's aggressive dividend growth should be attractive to income-orientated investors. We have lowered our five-year price target \$4 to \$292 due to revised estimates for 2022, but continue to view Union Pacific as a hold.
