Overview & Current Events

Best Buy Co. Inc. is one the largest consumer electronics retailers in North America with operations in the U.S. and Canada. Best Buy sells consumer electronics, personal computers, software, mobile devices, and appliances and provides services. At end of Q1 FY2023, Best Buy operated 931 Best Buy stores and 16 Best Buy Outlet Centers in the U.S., 21 Pacific Sales Stores, 127 Best Buy stores in Canada, and 33 Best Buy Mobile Stand-Alone Stores in Canada. Best Buy exited its Mexico operations in fiscal 2021. The company continues to lower total store count during the COVID-19 pandemic continuing a long-term trend. The company's annual sales exceeded \$51.7B in fiscal 2022.

Best Buy reported poor Q1 FY2023 results on May 24th, 2022. Enterprise revenue decreased to \$10,647M from \$11,637M and non-GAAP diluted EPS decreased to \$1.57 from \$2.23 on a year-over year basis. GAAP diluted EPS decreased to \$1.49 from \$2.32. Comparable enterprise revenue decreased (-8.0%), on very tough comparisons to Q1 FY2022 of 37.2% growth. Domestic revenue fell (-8.7%) to \$9,984M from \$10.841M driven by a (-8.5%) fall in comparable sales and permanent store closures. Comparable domestic online sales fell (-14.9%) to \$3.6B compared to the prior year due to the reopening of the U.S. economy. Domestic online sales now comprise about 30.9% of total domestic revenue versus 33.2% last year. International segment revenue fell (-5.4%) to \$753M due to (-1.4%) comparable sales decline in Canada. Best Buy exited its operations in Mexico and closed all stores in 2021.

Best Buy is trialing a \$199 technical full-service subscription that is expected to generate \$1.5B in service sales.

Best Buy benefitted from the pandemic. COVID-19 changed how people work, attend school, entertain, and eat. This has driven sales of electronics, appliances, tablets, and home theater. However, a return to the office, lack of federal stimulus, inflation, supply chain disruptions, and higher labor and freight costs are now impacting sales and margins.

Best Buy lowered guidance to 3.0% - 6.0% sales decline and non-GAAP diluted EPS of \$8.40 to \$9.00 in fiscal 2023.

Growth on a Per-Share Basis

Year ¹	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS²	\$2.54	\$2.07	\$2.60	\$2.78	\$3.56	\$4.42	\$5.32	\$6.07	\$7.91	\$10.01	\$8.70	\$10.58
DPS	\$0.66	\$0.68	\$0.72	\$0.92	\$1.12	\$1.36	\$1.80	\$2.00	\$2.20	\$2.80	\$3.52	\$5.17
Shares³	338	347	352	324	311	283	266	256	257	249	242	208

Best Buy's diluted non-GAAP EPS growth is volatile because of the Great Recession and the transition to online shopping. In fact, sales growth was flat-to-negative from fiscal 2012 to 2017. However, the company's efforts to prioritize online sales growth, optimize store count and extract cost efficiencies led to organic sales growth and higher earnings accelerated by the COVID-19 pandemic. But now sales are declining as consumers return to more normal buying habits. Additionally, inflation and supply chain disruptions are impacting margins. We are forecasting on average 4% EPS and 8% DPS growth out to fiscal 2028, but growth will be uneven. The quarterly payout was raised 25.7% in fiscal 2023.

¹ Best Buy's fiscal year ends at the beginning of February. All tables are in fiscal year.

² Diluted Non-GAAP EPS including restructuring charges, intangible asset amortization, and acquisition-related transaction costs.

³ Share count in millions.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
P/E	7.4	15	11.8	12.5	10.1	12.7	13.3	11.9	11.3	10.0	9.4	11.0
Yld.	3.5%	2.2%	2.4%	2.7%	3.1%	2.4%	2.6%	2.8%	2.5%	2.8%	4.3%	4.4%

Best Buy's stock price is down significantly since our last report. The company was benefitting from the impact of COVID-19 due to still elevated stay at-home activity. However, sales are now declining more than expected, and costs are rising. We set our earnings estimate at the mid-point of lowered guidance. In addition, we have lowered our fair value estimate to 11X, slightly lower than the trailing 10-year valuation. Our fair value is now \$96. Our 5-year price target is now \$116.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	26%	33%	28%	33%	31%	31%	34%	33%	28%	28%	40%	49%

As a retailer, Best Buy is in a very competitive industry. Although it is one the largest electronics retailers by revenue, the company has for the most part no significant advantage. Both Walmart and Costco sell electronics and have scale and cost advantages. Best Buy is also not the clear market leader for online electronics retailing as Amazon, Walmart, Apple, and others provide significant competition there. However, Best Buy's Geek Squad does provide an advantage relative to other traditional retailers as they provide a level of expertise and service not typically found at other retailers.

Best Buy makes conservative use of debt with no short-term debt, \$15M in current long-term debt, and \$1,170M in long-term debt that is offset by \$640M in cash, equivalents, and short-term investments.

Final Thoughts & Recommendation

At present we are forecasting 11.1% annualized total return over the next five years from a dividend yield of 4.3%, 4% EPS growth, and 3.1% P/E multiple expansion. Best Buy was thriving during COVID-19, but sales are now declining more than expected and margins are compressing. We have lowered our estimates and valuation. The dividend yield is the highest in the past 5 years and may interest those seeking income. At the current price, we rate this stock a buy.
