## Overview & Current Events

Franklin Resources, founded in 1947 and headquartered in San Mateo, CA, is a global asset manager with a long and successful history. The company offers investment management (which makes up the bulk of fees the company collects) and related services to its customers, including sales, distribution, and shareholder servicing. As of June 30<sup>th</sup>, 2022, assets under management (AUM) totaled \$1.380 trillion for the \$14 billion market cap company.

On July 31<sup>st</sup>, 2020, Franklin Resources acquired Legg Mason (previous ticker LM) for \$4.5 billion in cash, to go along with the assumption of \$2 billion in debt.

On December 14<sup>th</sup>, 2021, Franklin Resources announced a \$0.29 quarterly dividend, marking a 3.6% year-over-year increase and the company's 42<sup>nd</sup> consecutive year of increasing its payment.

On July 28<sup>th</sup>, 2022, Franklin Resources reported Q3 fiscal year 2022 results for the period ending June 30<sup>th</sup>, 2022. (Franklin Resources' fiscal year ends September 30<sup>th</sup>.) Total assets under management equaled \$1.380 trillion, down \$97.7 billion compared to last quarter, as a result of \$135.5 billion of net market change, distributions and other, and \$19.8 billion of long-term net outflows.

For the quarter, operating revenue totaled \$2.031 billion, down 7% year-over-year. On an adjusted basis, net income equaled \$416 million or \$0.82 per share compared to \$494 million or \$0.96 per share in Q3 2021. During Q3, Franklin repurchased 2.0 million shares of stock for \$51 million.

Franklin also closed the acquisition of Lexington Partners, a global leader in secondary private equity and co-investments, in the quarter. The company also announced the acquisition of Alcentra, a leading European alternative credit manager.

## Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
<b>EPS</b>	\$2.99	\$3.37	\$3.79	\$3.29	\$2.94	\$3.01	\$3.38	\$2.62	\$2.61	\$3.74	<b>\$3.60</b>	<b>\$4.17</b>
<b>DPS</b>	\$0.36	\$0.39	\$0.46	\$0.57	\$0.69	\$0.78	\$0.89	\$1.01	\$1.07	\$1.11	<b>\$1.16</b>	<b>\$1.42</b>
<b>Shares<sup>2</sup></b>	637	631	623	604	570	555	519	499	492	491	<b>490.0</b>	<b>470.0</b>

During the 2007 - 2018 period, Franklin Resources grew earnings-per-share by a compound rate of 3.3% per annum. 2019 and 2020 were down years, but the company got back on track in fiscal 2021. The biggest growth segment in the asset management industry is ETFs, which have much lower expense ratios than actively managed funds. Franklin's actively managed funds have performed well, which serves as an advantage versus other active asset managers; however, low-cost passive funds are the true competition. The "race to the bottom" as it relates to fees, is good for investors but not asset managers. We expect assets under management to stabilize somewhat as rising asset prices offset net outflows. However, if Franklin Resources must keep lowering its management fees, stable AUM will still lead to declining net income, all else equal. A counterpoint to this notion is that Franklin Resources has been acquiring alternative AUM through purchases such as Legg Mason, Lexington Partners, and Alcentra. While this does not change

the company's long-term problem, there are opportunities available in the way of synergies and complementary product offerings. We expect 3% annual growth over the intermediate term.

## Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	12.3	14.0	14.4	15.4	12.4	13.7	11.1	12.6	8.1	7.9	7.8	9.0
Avg. Yld.	1.0%	0.8%	0.8%	1.1%	1.9%	1.9%	2.4%	3.2%	5.0%	3.9%	4.1%	3.8%

Over the past decade shares of Franklin Resources have traded with an average P/E ratio of 12 times earnings. We are using 9 times earnings as our baseline, as asset managers are facing substantial headwinds in the way of falling asset management fees. With shares trading near 8 times estimated earnings, this implies a valuation tailwind.

The dividend is also worth mentioning. Not only is the 4.1% starting yield well covered, but Franklin Resources also has a tendency to periodically pay out a special dividend. While we have not included this in our forecast, investors could receive a yield in excess of the stated payout, although the company must first digest its Legg Mason merger.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	12%	12%	12%	17%	23%	26%	26%	39%	41%	30%	32%	34%

Franklin Resources' funds have performed well over the long-term, but we do not believe the company has a meaningful competitive advantage in its field. Indeed, Franklin Resources needs to adapt to the trend towards low-cost passive ETFs to remain competitive. Unless a novel solution is found, this could mean a difficult road in the years to come.

The dividend payout ratio has never been especially high, which has allowed the company to retire a meaningful number of shares and pay the occasional special dividend. Lately the payout ratio has inched upward, but the dividend is still well covered. Franklin Resources had perhaps one of the best balance sheets in our coverage universe prior to the Legg Mason acquisition, which required \$4.5 billion cash and assumed \$2 billion in debt.

## Final Thoughts & Recommendation

Shares are down 16% year-to-date, which is in-line with the broader market. Franklin Resources is a classic asset manager that must battle the rise of low-cost investing, which has been responsible for customers moving money from actively managed funds to ETFs. The company is in an interesting situation where the core business is declining, but the financial foundation – allowing for share repurchases, solid payouts and acquisitions – has been solid. Total return potential comes in at 9.5% per annum, stemming from 3% growth, a 4.1% dividend yield, and a valuation tailwind. Shares earn a hold rating.
