Overview & Current Events

Cummins, headquartered in Indiana and founded in 1919, designs, manufactures, distributes and services engines for heavy, medium and light-duty trucks. The company's products include diesel and natural gas engines, as well as hybrid and electric platforms. Cummins operates in four segments: Engines (35% of annual revenues), Distribution (26%), Components (24%) and Power Systems (15%). The company also has a small New Power segment, which focuses on electric vehicles. Roughly 60% of its business is done in the U.S. and Canada. The company employs about 60,000 people and serves customers in about 190 countries. Cummins generates ~$26 billion in annual revenues.

On July 12th, 2022, Cummins announced that it was increasing its quarterly dividend 8.3% to $1.57, extending the company's dividend growth streak to 17 years.

On August 2nd, 2022, Cummins released second quarter results for the period ending June 30th, 2022. Revenue grew 7.9% to $6.6 billion, topping estimates by $110 million. Net income of $702 million, or $4.94 per share, compared to $600 million, or $4.10 per share, in the prior year.

Revenues for North America increased 15% while international revenue fell 2%. Again, much of the decrease was due to a slowdown in China. The slowdown in China was down on a sequential basis. The Engine segment increased 11% $2.8 billion, led by 16% growth in on-highway revenue. Distribution improved 17% to $2.3 billion, primarily due to strong demand in North America. Revenue for Components declined 2% as lower demand in China offset double-digit gains in North America. Power Systems was up 5% to $1.2 billion. Demand for mining and oil and gas products was high for both engine systems and aftermarket products. New Power grew 75% to $42 million as demand for batteries was up in the North American school bus market.

Leadership maintained its outlook for 2022 as well. The company continue to expects revenue to grow 8% for the year, up from 6% previously. Cummins is projected to earn $17.58 for the year, compared to $17.44 and $17.72 previously.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	$8.69	$7.91	$9.14	$8.92	$8.23	$10.63	$13.15	$14.48	$12.01	$14.61	***$17.58***	***$25.83***
DPS	$1.80	$2.25	$2.81	$3.51	$4.00	$4.21	$4.44	$4.90	$5.28	$5.60	***$6.28***	***$8.02***
Shares[1]	190	187	182	175	168	166	163	152	149	144	***142***	***140***

Looking at the 2012 to 2021 period, Cummins grew earnings-per-share by an average compound rate of 5.9%. The growth rate has accelerated to nearly 11% over the last five year. Taking into account the long- and medium-term growth rates, we reaffirm our earnings-per-share growth rate of 8% through 2027. 2020 was a difficult one for the company, but Cummins saw a rebound in 2021. That rebound is expected to continue into the new year as well. We believe the company will see a higher than usual growth rate as the global economy recovers from the pandemic. Cummins has also benefited from an increase in worldwide emission regulations and fuel efficiency standards. When paired with the company's reliable and superior quality engines, this has afforded the company growth opportunities. This trend is likely to continue, but we believe there is a tipping point whereby the increase in standards starts to be

addressed via alternative technologies, such as batteries. In turn, this could slow Cummins' growth profile as the company would either need to invest heavily in new technologies or risk falling behind.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	11.9	15.3	15.8	14.0	14.1	15.0	11.4	11.0	16.0	14.9	***12.7***	***13.0***
Avg. Yld.	1.7%	1.9%	1.9%	2.8%	3.5%	2.6%	2.9%	3.0%	2.9%	2.6%	***2.8%***	***2.4%***

Over the past decade, shares of Cummins have traded with an average price-to-earnings ratio of slightly more than 13. We believe this is a reasonable multiple considering the company's growth prospects paired with a fair amount of cyclicality in earnings. Shares of Cummins have increased $19, or 9.3%, since our May 5th, 2022 report. Using the current share price and expected earnings-per-share for the year, Cummins trades with a price-to-earnings ratio of 12.7. If shares were to trade at our target multiple by 2027, then valuation would be a 0.5% tailwind to total returns over this time period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	21%	28%	31%	39%	49%	40%	34%	33%	44%	38%	***36%***	***31%***

During the last recession Cummins posted earnings-per-share of $4.08, $2.47, $5.17 and $9.07 during the 2008 through 2011 stretch. Meanwhile, the dividend kept increasing during this time. We view this a microcosm of the business at large. That is, in lesser economic times earnings are likely to falter, but the company has the ability to recover quickly, and the dividend payout ratio is low enough to keep the payment steady. Cummins maintains a competitive advantage in its strong brand name, stemming from reliability and superior quality. In turn, the company maintains a large share of the heavy-duty engine market. Two main risks stick out: a high reliance on a few customers, namely PACCAR, Daimler, Chrysler and Navistar, which could turn to manufacturing in-house, and the potential for new technologies to disrupt or require increased investment.

Final Thoughts & Recommendation

Cummins is now projected to return a total of 10.8% annually through 2027, down from our prior estimate of 12.4%. Our projected return consists of an 8% earnings growth rate, a starting yield of 2.8%, and a small contribution from multiple expansion. Cummins once again saw strong growth in most areas of its business and the slowdown in China is becoming less of a headwind. We have raised our 2027 price target $3 to $336 due to revised earnings estimates for the year and reiterate our buy rating on shares of Cummins due to projected returns.
