Overview & Current Events

Illinois Tool Works is a diversified multi-industrial manufacturer with seven unique operating segments: Automotive, Food Equipment, Test & Measurement, Welding, Polymers & Fluids, Construction Products and Specialty Products. Last year the company generated \$14.5 billion in revenue. The \$65 billion market cap company is geographically diversified, with more than half of its revenue generated outside of the United States. Illinois Tool Works is a member of the Dividend Aristocrats Index and is a Dividend King.

On August 2nd, 2022, Illinois Tool Works reported second quarter 2022 results for the period ending June 30th, 2022. For the quarter, revenue came in at \$4.0 billion, up 9% year-over-year. Sales were up 14% in the Automotive OEM segment, the largest out of the company's seven segments. Five of the other segments saw sales growth above 20%, with the last segment being flat. Net income equaled \$738 million or \$2.37 per share compared to \$775 million or \$2.45 per share in Q2 2021.

Illinois Tool Works also reiterated its 2022 earnings guidance and sees \$9.00 to \$9.40 in earnings-per-share for the full year. At the same time, the company reduced its revenue growth estimates to 6% to 9% (down from 8.5% to 11.5%). The company also plans to repurchase \$1.5 billion of its own shares in 2022.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$4.09	\$3.63	\$4.67	\$5.13	\$5.70	\$6.78	\$7.60	\$7.74	\$6.63	\$8.51	\$9.20	\$12.90
DPS	\$1.48	\$1.60	\$1.75	\$2.07	\$2.40	\$2.73	\$3.56	\$4.14	\$4.42	\$4.72	\$4.88	\$6.08
Shares²	455	430	383	364	347	342	328	320	318	315	310	285

In the 2007 through 2019 period Illinois Tool Works increased its earnings-per-share by an average compound rate of 7.2% per annum. While there was cyclicity during the last recession, including a -40% drop in earnings from 2007 to 2009, generally the company has exhibited consistent progress. In the past, Illinois Tool Works was able to grow via moderate top-line growth that was aided significantly by margin expansion and share repurchases.

Results for 2020 dipped -14% amid the pandemic, but 2021 bounced back materially. Moving forward growth becomes a bit more difficult as the company gets larger. Still, the balance sheet is in good shape allowing for some flexibility from a capital allocation standpoint. Moreover, attractive returns can be achieved without venturing outside Illinois Tool Works' existing core competencies. Illinois Tool Works can continue to invest in its sales networks, R&D, and production capacity and the company's cost-cutting efforts could continue to buoy margins.

We are using the midpoint of management's guidance, \$9.20, along with a 7% expected annual growth rate over the intermediate term.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	13.9	19.4	18.5	18.0	19.0	21.0	19.3	19.8	27.4	25.7	22.8	19.0
Avg. Yld.	2.6%	1.7%	2.0%	2.2%	2.2%	1.9%	2.4%	2.7%	2.4%	2.2%	2.3%	2.5%

Over the past decade shares of Illinois Tool Works have traded hands with an average P/E ratio of about 20 times earnings. We believe that a P/E ratio of 19 is a fair starting point, considering the quality of the business and growth prospects. With shares currently trading near 23 times the midpoint of management's guidance, this implies the potential for a valuation headwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	36%	44%	37%	40%	42%	40%	47%	53%	67%	55%	53%	47%

Illinois Tool Works has an excellent dividend growth history. Its payout ratio was relatively high during the last financial crisis, but the company was not forced to cut the payout. Today the dividend payout ratio sits at 53% of expected earnings, above the company's long-term target, meaning that future dividend growth may trail earnings growth.

Illinois Tool Works' industry is not glamorous or one with outstanding growth rates, but the company has established itself as a major player that continues to grow profitably. Its experienced management and strong fundamentals, such as an above-average return on capital, function as competitive advantages. The company's profits were reduced during the last financial crisis, posting earnings-per-share of \$3.36, \$3.05, \$1.93, and \$3.03 during the 2007 through 2010 stretch. This is something to consider for the next downturn, as the business was tested in 2020 as well.

Final Thoughts & Recommendation

Shares are down 14% year-to-date, in-line with the broader market. Illinois Tool Works has several positives, including solid earnings growth, a nice dividend yield, a long and successful dividend growth history, and a compelling long-term track record. However, total return potential comes in at 5.4% per annum, stemming from 7% growth and a 2.3% dividend yield offset by the possibility of a valuation headwind. We are enthused about the business, but we are less keen on the valuation. Shares earn a hold rating.
