Overview & Current Events

KLA Corporation is a supplier to the semiconductor industry. The company supplies process control and yield management systems for semiconductor producers such as TSMC, Samsung and Micron. KLA was created in 1997, through a merger between KLA Instruments and Tencor Instruments, and has grown through a range of acquisitions since then. The company is headquartered in Milpitas, CA.

KLA Corporation reported its fourth quarter (fiscal 2022) earnings results on July 28. The company reported revenues of \$2.49 billion for the quarter, which represents an increase of 29% compared to the prior year's quarter. This revenue growth rate was stronger than what the analyst community had expected, as KLA's top line beat the analyst consensus by \$70 million. KLA's solid revenue performance can be explained by the fact that many semiconductor companies have increased their investments into manufacturing capacity thanks to ongoing strong chip demand.

KLA generated earnings-per-share of \$5.81 during its fourth quarter, which beat estimates by \$0.32, and which was up by an attractive 31% compared to the previous year's quarter. This follows strong earnings growth in recent quarters. KLA is guiding for revenues of \$2.6 billion for the current quarter, its fiscal Q1, and sees earnings-per-share of \$6.25.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$3.21	\$3.47	\$2.98	\$4.66	\$5.94	\$7.50	\$8.46	\$10.35	\$14.55	\$21.17	\$24.50	\$36.00
DPS	\$1.60	\$1.80	\$2.00	\$2.08	\$2.14	\$2.52	\$3.00	\$3.40	\$3.75	\$4.20	\$5.20	\$8.37
Shares³	165	165	158	156	157	156	156	156	155	149	145	135

KLA grew its earnings-per-share by ~20% annually between 2010 and 2021, although growth has been quite uneven. During 2009 the company reported net losses, and it has reported year-over-year earnings declines several times since then. Growth has seemingly stabilized during the last couple of years. From 2015 to 2019 the company reported strong results, and during fiscal 2020 the company hit new record profits.

KLA Corporation's earnings-per-share growth has historically come from a mix of revenue growth, margin improvements, and share repurchases. The revenue growth outlook remains strong, as KLA has been able to grow its sales considerably during the last couple of quarters. The majority of KLA's revenues come from product sales, but service revenues are becoming increasingly important. This is a positive in the long run, as a higher rate of recurring service revenues should help KLA's top line become less cyclical.

The semiconductor industry profits from massive tailwinds such as the Internet of Things, big data, autonomous driving, and cloud computing. These trends drive demand for chips, which means that companies such as Samsung and TSMC are increasing capacity to be able to meet demand, which fuels their demand for KLA's products. Global memory markets recovering from a period of low prices helps KLA. KLA has also made several acquisitions in the past, which have added to its growth, such as the \$3.4 billion takeover of Orbotech.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	15.9	18.2	22.8	13.6	14.1	13.6	14.4	18.7	22.1	15.2	15.3	17.0
Avg. Yld.	3.1%	2.8%	2.9%	3.3%	2.5%	2.9%	2.5%	1.8%	1.2%	1.3%	1.4%	1.4%

KLA now trades at 15-16 times this year's net earnings, based on estimates for the current fiscal year, which is lower than our fair value estimate. We believe that shares have upside potential towards a price to earnings multiple of around 17, which would be more in-line with how KLA Corporation was valued in the past.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	49.8%	51.9%	67.1%	44.6%	36.0%	33.6%	35.5%	32.9%	25.8%	19.8%	21.2%	23.3%

KLA did not raise its dividend during the last financial crisis, but since then the dividend has been raised very consistently. KLA was not profitable during 2009, but the company chose to maintain its dividend nevertheless. The payout ratio looks highly sustainable, although the cyclical nature in KLA's earnings could make the payout ratio rise substantially during another global economic downturn that hurts chip markets massively.

KLA is a key supplier to the largest semiconductor companies, and therefore a relevant part of this large industry that is extremely important to our modern way of life. KLA is the market leader in the process control sector. Its scale and size give it advantages over competitors when it comes to receiving big contracts, and through better economies of scale, KLA also has the ability to achieve higher margins than smaller peers. KLA's business is cyclical, as lower spending by semiconductor manufacturers during market downturns hurts KLA.

Final Thoughts & Recommendation

As an important supplier to the global semiconductor industry, KLA benefits from megatrends that increase worldwide demand for chips, such as the Internet of Things. KLA should be able to capitalize on these trends by growing its earnings-per-share meaningfully in the future. Because shares also trade below fair value, the total return outlook is pretty good. We rate KLA Corporation a buy at current prices.
