Overview & Current Events

Mueller Water Products is a leading manufacturer and marketer of products and services used to transmit, distribute, and measure water in North America. The company's products and services are used by municipalities and the residential and non-residential construction industries. The majority of its revenues (>90%) are derived from spending on water and wastewater infrastructure upgrades, repairs, and replacements, typically associated with the construction of new residential communities. Management estimates it has one of the largest installed bases of Iron Gate valves and fire hydrants in the United States. The company generates around \$1.1 billion in annual sales and is based in Atlanta, Georgia.

On August 4th, 2022, Mueller Water Products reported its Q3-2022 results for the period ending June 30th, 2022. For the quarter, revenues came in at \$333.2 million, 7.31% higher year-over-year. This increase was primarily due to higher pricing across most of Mueller's product lines, which was partially offset by a decrease in volumes. Water Flow Solutions was the segment that contributed the most to this growth, with its sales rising 10.7% to \$195.9 million. The Water Management Solutions segment also performed somewhat well, growing sales by 2.8% to \$137.3 million, driven by the same catalysts as well as the addition of i2O Water, which were partially offset by lower volumes.

Net income per diluted share came in at \$0.17 as compared with \$0.09 last year. The notable increase was due to higher revenues being combined with lower operating expenses.

For the FY-2022, Mueller narrowed its consolidated net sales outlook, which is now expected to increase between 11% and 12% (previously 10% to 12%) as compared with the prior year. These expectations take into account the current backlog, higher pricing, new product initiatives, and channel strategies. We are now expecting FY2022 EPS to land close to \$0.60, but remain cautious of the possibility of rising costs in H2-2022, leading to compressed profit margins.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	(\$0.69)	\$0.26	\$0.35	\$0.19	\$0.40	\$0.77	\$0.67	\$0.40	\$0.45	\$0.44	\$0.60	\$0.77
DPS	\$0.07	\$0.07	\$0.07	\$0.08	\$0.10	\$0.15	\$0.19	\$0.20	\$0.21	\$0.22	\$0.23	\$0.28
Shares¹	156.5	157.7	159.2	160.5	161.3	160.1	158.2	157.8	157.8	158.4	157.0	150.0

Despite Mueller's revenue modestly growing over the past few years, they are still near the same levels they were a decade ago. The company has sustained a positive bottom line since 2013, but with no growth success, nonetheless. Its industry is very mature, with little to no expansion prospects. Hence apart from acquisitions, the company has few growth avenues. Further, the currently accelerated inflation could hurt the company if it isn't able to match higher costs with adequate price increases.

Still, powered by growing revenues, we estimate EPS growth of 5% in the medium-term. Mueller has never cut its dividend since its IPO. It has grown annually over the past 7 years, though at a humble rate since 2018. We expect DPS

¹ Share count is in millions.

growth of around 4% going forward, considering Mueller's limited profitability growth catalysts ahead. The company repurchased another \$5 million worth of stock in fiscal Q3. Continuous buybacks should contribute to EPS growth.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	---	29.8	26.1	48.5	29.7	15.6	17.2	26.2	22.5	48.0	19.7	18.0
Avg. Yld.	2.0%	0.9%	0.8%	0.9%	0.8%	1.3%	1.7%	1.9%	2.0%	1.5%	2.0%	2.0%

Over the past decade, Mueller's valuation multiple has hovered at various levels based on the company's profitability expectations. Shares are currently trading at 19.7 times our expected FY2022 EPS. Despite the recent sales rebound, due to its overall lagged financials, we believe that shares would be more fairly valued at a lower multiple of around 18. A lower multiple is even further justified in a rising rates environment, with the company's thin growth prospects hardly deserving a premium. The only catalyst behind the stock's historical premium, in our view, lies in all water-related investments attracting significant investor interest due to their mature and mission-critical business models. We expect the stock's yield to move up, assuming a reasonable valuation compression, though it is to remain rather soft overall.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	27%	20%	42%	25%	19%	28%	50%	46%	50%	39%	37%

We consider the stock's dividend relatively safe even as the payout ratio has moved higher over the past few years. The company is a market leader in water and wastewater infrastructure upgrades that see relatively stable annual demand. Water utility companies must modernize their facilities every a certain time period; hence robust demand should remain. The company claims that while the valve and hydrant products industry is competitive, it is a mature one and many end users are slow to transition to brands other than their historically preferred brand. Hence sales should not fluctuate wildly. Sales should remain relatively stable under a recession as well, as was the case during the Great Financial Crisis. However, the company still has little to no competitive advantages and is subject to limited growth catalysts ahead. On the positive side, Mueller's net debt position has been declining consistently, from \$1.5 billion in 2006 to \$292 million as of the latest quarter. The company also has no outstanding debt maturities prior to June 2029, which should allow for flexible capital allocation in the medium-term.

Final Thoughts & Recommendation

Mueller Water Products possesses certain attractive qualities, such as robust revenues, an improving balance sheet, and a healthy dividend payout ratio. However, we forecast the stock will deliver relatively humble returns in the coming years. This is due to the possibility of valuation headwinds offsetting gains from growth in the company's financials. Our annualized total return potential through 2027 comes out at 5.0%. Thus, we rate the stock a hold at their current levels.
