Overview & Current Events

On June 3rd, 2021, Merck & Company (MKR) completed its spinoff of Organon & Co. Organon is a pharmaceutical company that develops and markets health solutions in a variety of areas. It's established brands portfolio consists of nearly 50 products that have lost patent exclusivity and are used for treatment in the areas of cardiovascular, respiratory and dermatology and non-opioid pain management. Organon's women's health portfolio includes fertility and contraception brands, such as Nexplanon/Implanon and Nuva Ring. The company also has a small portfolio of biosimilars which are used in immunology and oncology. The spinoff has resulted in 15% of revenue, 25% of manufacturing sites and 50% of products being transferred from Merck to Organon.

On August 4th, 2022, Organon reported second quarter results for the period ending June 30th, 2022. For the quarter, revenue of \$1.59 billion was flat compared to the prior year, but beat estimates by \$60 million. Adjusted earnings-per-share of \$1.25 compared to \$1.72 in the prior year, but was \$0.06 ahead of expectations.

Established Brands, which contributes two-thirds of quarterly revenue, grew 4% when adjusted for currency exchange. Women's health, which contributed a quarter of sales, was up 1% due to strength in *Nexplanon*, but was impacted by lower sales for the *Nuvaring*. Sales for Biosimilars were up 42% as demand remains high for *Renflexis*, which treats certain types of arthritis, and *Ontruzant*, which is used to treat HER2-overexpressing metastatic breast cancer.

Organon offered revised guidance for 2022 as well, with the company now expecting revenue of \$6.1 billion to \$6.3 billion, from \$6.1 billion to \$6.4 billion previously. The company is projected to earn \$4.95 per share this year, down from \$5.40 and \$5.48 previously. We have updated our forecast accordingly.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	---	---	---	---	---	---	---	---	---	\$6.54	\$4.95	\$5.74
DPS	---	---	---	---	---	---	---	---	---	\$0.56	\$1.12	\$1.30
Shares¹	---	---	---	---	---	---	---	---	---	253	253	253

Organon's parent company experienced an earnings per share growth rate of more than 5% over the last decade and nearly 12% over the last five years. Given that much of this growth was due to accelerating pharmaceutical sales that remain with Merck, we believe a slightly lower growth rate for Organon is likely to take place. Given the unknowns of the company at this point, we are comfortable forecasting earnings-per-share growth of 3% through 2027.

Organon does have several factors working in its favor for future growth. The established brands business should provide Organon with strong cash flows as the off-patent products don't require much in the way of the research and development expenses. The women's healthcare business has long been a pioneer in its field since its founding in 1923. The company produced the first-ever hormonal oral contraceptive as well the first-ever lower dose estrogen combined oral contraceptive. More recently, Organon developed the first once-a-month contraceptive ring. Biosimilars are the

smallest portion of the new company, but Organon does expect to expand its portfolio, including a biosimilar to Humira for the U.S. market starting in 2023. Organon operates a fairly diverse business, including geographically.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	---	---	---	---	---	---	---	---	---	4.7	6.3	7.0
Avg. Yld.	---	---	---	---	---	---	---	---	---	1.8%	3.6%	3.2%

Shares of Organon have decreased \$7, or 18.4%, since our May 22nd, 2022 report. Using the current share price and expected earnings-per-share for 2022, Organon trades with a price-to-earnings ratio of 6.3. This is an incredibly low valuation relative to other healthcare companies. However, we feel that this new company will likely see low, but stable, growth in future years. We believe a starting price-to-earnings ratio of 7 is appropriate for the time being, implying a 2.3% contribution from multiple expansion to annual returns over the next five years.

Even at the targeted low payout ratio, Organon's dividend yield is quite substantial at 3.6%. We believe that dividend growth will match earnings-per-share growth over the next five years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	---	---	---	---	---	---	---	---	9%	23%	23%

Organon has not yet been tested during a recession. Its former parent company generated of earnings-per-share growth of 33% from 2007 through 2009. Including 2006 in this calculation actually results an earnings-per-share decrease of nearly 11% for this period of time, showing that Merck's business was more unpredictable than its healthcare peers. However, Merck is a vastly different company now than it was during that period of time, thanks to the explosive growth of its key product *Keytruda*. Nevertheless, we believe that Organon would perform well during a recession as its product portfolio can largely be considered recession resistant. Healthcare companies tend to hold up much better than more cyclical companies in economic downturns as their products are in demand regardless of economic conditions.

Final Thoughts & Recommendation

Organon is projected to return 8.4% annually through 2027, up from our prior estimate of 5.6%. Our projected return stems from an earnings growth rate of 3%, a 3.6% starting dividend yield, and small tailwind from multiple expansion. Organon turned in another solid quarter, with growth in most businesses though currency exchange remains a challenge. The turnaround in Established Brands is especially important considering its importance to the business. We have lowered our five-year price target \$4 to \$40 due to earnings estimates for the year and continue to rate shares of Organon as a hold due to projected returns.
