Overview & Current Events

Occidental Petroleum is an international oil and gas exploration and production company with operations in the U.S., the Middle East, and Latin America. It has a market capitalization of \$68.3 billion. While the company also has a midstream and a chemical segment, it is much more sensitive to the price of oil than the integrated oil majors. That's why Occidental was more severely affected than its integrated peers by the downturn in the oil market between mid-2014 and 2016. Due to that downturn, the company reported negligible earnings in 2015 and posted a loss in 2016.

On August 8th, 2019, Occidental acquired Anadarko. Occidental pursued this acquisition thanks to the promising asset base of Anadarko in the Permian, which has enhanced the already strong presence of Occidental in the area, and high synergies. However, this is a huge acquisition, as the \$38 billion value of the deal is 56% of the current market cap of Occidental. Occidental secured \$10 billion in funding from Berkshire Hathaway (BRK.A) in exchange for preferred shares, which receive an 8% annual dividend.

In early August, Occidental reported (8/2/22) financial results for the second quarter of fiscal 2022. Its average realized price of oil grew 17% sequentially while the chemical segment posted record earnings for a fourth consecutive quarter thanks to wide margins amid strong demand. As a result, Occidental posted record free cash flow and grew its earnings-per-share 49%, from \$2.12 to \$3.16. Due to its high debt load, Occidental is extremely sensitive to oil and gas prices and thus it is one of the greatest beneficiaries in its sector from the 13-year high prices of oil and gas, which have resulted from the sanctions of western countries on Russia. We have thus raised our annual forecast from \$8.80 to \$10.30.

Occidental has been reducing its debt pile at a fast pace thanks to its record free cash flows. This seems highly attractive to Warren Buffett. Berkshire Hathaway has acquired a 20% stake in Occidental and has requested approval to buy up to 50% of the company. This has raised speculation that Berkshire may acquire Occidental, fueling a steep rally of the latter. We view Occidental as overvalued and hence we do not expect an acquisition around current stock prices.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$7.09	\$6.96	\$4.83	\$0.12	-\$1.01	\$0.89	\$5.01	\$1.45	-\$3.91	\$2.55	\$10.30	\$3.00
DPS	\$2.07	\$2.45	\$2.80	\$2.94	\$3.01	\$3.05	\$3.10	\$3.14	\$0.82	\$0.04	\$0.52	\$0.76
Shares¹	805.5	796.0	770.6	763.7	764.2	766.4	755.4	809.5	918.7	972.7	1000.0	1050.0

The pandemic has subsided and hence Occidental has decent growth prospects ahead. It doubled its output in the Permian in 2017-2019 and expects to double it again over the next five years, from 300,000 to 600,000 barrels per day. However, we note the high debt load of the company and its resultant sensitivity to prices. As long as the oil price remains high, Occidental will keep thriving. Nevertheless, we expect the oil price to deflate after the end of the war and thus we expect the earnings-per-share of Occidental to revert towards a mid-cycle level around \$3.00. While we may miss a portion of the upside of the stock, we prefer to remain conservative due to its excessive downside whenever the next downcycle of the oil price shows up.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	12.4	12.8	19.5	---	---	---	15.0	36.0	---	10.8	24.7	14.2
Avg. Yld.	3.0%	2.2%	3.0%	4.0%	4.2%	4.7%	4.1%	6.0%	4.3%	0.1%	0.7%	1.8%

Occidental is currently trading at 24.7 times its mid-cycle earnings-per-share of \$3.00. This earnings multiple is higher than the 10-year average price-to-earnings ratio of 14.2 of the stock. If the stock reverts to its average valuation level over the next five years, it will incur a -10.5% annualized drag due to the contraction of its valuation level.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	37.0%	27.6%	58.0%	---	---	343%	61.9%	217%	---	1.6%	17.3%	25.5%

Before the pandemic, Occidental had raised its dividend for 17 consecutive years at an 11% average annual rate. However, the pandemic caught Occidental off-guard, with a huge debt pile, and thus led to a -99% dividend cut in 2020. Moreover, Occidental is very sensitive to the gyrations of oil prices. The company's reliance on oil prices was displayed in the Great Recession, when its earnings-per-share fell -58%, from \$8.98 in 2008 to \$3.79 in 2009. We reiterate that the company is much more sensitive to oil prices than its "supermajor" peers like Exxon Mobil (XOM), partly due to its high debt load. Due to its leveraged balance sheet, Occidental has essentially become a leveraged bet for high oil prices in the future. Therefore, only the investors who have strong confidence in a sustained environment of high oil prices should consider this stock.

Final Thoughts & Recommendation

Due to its upstream nature and its takeover of Anadarko, which greatly increased interest expense, Occidental is extremely sensitive to the price of oil. Thanks to rally of oil and gas prices to 13-year highs, which has resulted from the invasion of Russia in Ukraine, Occidental has become highly profitable and is trying to reduce its debt load at a fast pace. However, we expect the stock to return -9.1% per year on average over the next five years, as its 0.7% dividend may be offset by a -10.5% valuation headwind. If commodity prices remain high, the stock could maintain its positive short-term momentum, but it could also offer poor long-term returns. The 10-year return of the stock (-10% vs. +187% of the S&P 500) is indicative of the risk of the stock. We rate shares as a sell.
