## Overview & Current Events

Royalty Pharma (RPRX) is a company that buys biopharmaceutical royalties and funds innovations in the biopharmaceutical industry. Royalty Pharma was founded in 1996, and the company had its initial public offering in June of 2020. Royalty Pharma's portfolio consists of royalties on approximately 35 marketed therapies and 10 development-stage product candidates that address various therapeutic areas, such as rare diseases, cancer, neurology, infectious disease, hematology, and diabetes. The company has a total of 14 billion-dollar therapies in its portfolio, and across the portfolio, the average royalty duration is 13 years. While some investors might be concerned that almost 30% of the company's royalty revenue comes from its Vertex CF franchisee, Vertex is the strongest competitor in its market, far ahead of its closest competitor. This concentration in Vertex CF appears to be a good way for the company to capitalize on strong assets.

On August 4<sup>th</sup>, 2022, Royalty Pharma reported Q2 2022 results for the period ending June 30<sup>th</sup>, 2022. The company saw adjusted earnings-per-share of \$0.79, which beat analyst estimates by a cent and represented a year-over-year improvement of 11.3%. Revenue fell 3.4% year-over-year to \$536 million – but this decline still beat management's estimates by \$2.1 million. Management raised guidance for adjusted cash receipts from \$2.225-\$2.3 billion to \$2.275-\$2.35 billion for the fiscal year 2022. Adjusted cash receipts are the business's primary way of reporting cash flows. For the quarter, the company reported a 10.3% year-over-year increase in adjusted cash receipts to \$524 million. This strong performance was driven by double-digit expansion in royalties from the cystic fibrosis franchise, Xtandi, and recent royalty acquisitions.

This quarter, Royalty Pharma announced the acquisition of 6.5-10% of the royalties on Trelegy sales. Royalty paid \$1.31 billion net upfront, and the company expects to add at least \$200 million to adjusted cash receipts by 2025 from this deal.

## Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
<b>EPS</b>	---	---	---	---	---	---	---	---	\$1.32	\$1.49	<b>\$3.00</b>	<b>\$4.41</b>
<b>DPS</b>	---	---	---	---	---	---	---	---	\$0.30	\$0.68	<b>\$0.76</b>	<b>\$1.12</b>
<b>Shares</b>	---	---	---	---	---	---	---	---	375	415	<b>415</b>	<b>500</b>

Since Royalty Pharma went public in June of 2020, the stock has only traded for 2 years, so results are only available for 2020 and 2021. In 2022, we expect Royalty Pharma to deliver about \$3.00 in earnings-per-share based on analyst estimates. We forecast that earnings-per-share will grow at a rate of 8% annually over the next 5 years, guiding our 2027 earnings-per-share estimate of \$4.41.

From 2020 to 2021, the dividend payment grew 126.7%, which is obviously unsustainable. Going forward, we forecast a more normalized dividend growth rate, with dividends growing at 8% annually over the next 5 years. We expect 8% dividend growth, because this will be in line with the company's forecasted earnings-per-share growth rate.

## Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	---	---	---	---	---	---	---	---	37.3	30.2	<b>14.7</b>	<b>20.0</b>
Avg. Yld.	---	---	---	---	---	---	---	---	0.6%	1.5%	<b>1.7%</b>	<b>1.3%</b>

With limited trading history, it's difficult to use historic P/E multiples or dividend yields to estimate the stock's appropriate valuation multiples. However, we estimate that a 20x P/E ratio is fair for the business based on its strong earnings-per-share growth potential and dividend growth potential. Today, the stock offers a 1.7% dividend yield, which is low for investors who prioritize dividend income, but investors might consider the stock if they like the business model of buying biopharmaceutical royalties.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	---	---	---	---	---	---	---	23%	46%	<b>25%</b>	<b>25%</b>

Going forward, we expect Royalty Pharma to have about a 25% payout ratio. We project that the dividend will be safe since the low payout ratio signifies that the dividend is adequately backed by strong earnings-per-share. Royalty Pharma has a strong balance sheet; we see no liquidity or solvency risks with this company. We think the business has some recession resiliency because they earn revenue from royalties on drug sales. In a simplistic way, we think that people will always need drugs. Additionally, we think the company has a competitive advantage as a leading biopharmaceutical royalty holder.

## Final Thoughts & Recommendation

Royalty Pharma offers investors an opportunity to invest in a business that buys and holds biopharmaceutical royalties. By investing in strong royalties, Royalty Pharma has the chance to position itself as a leader in niche markets. At today's price, we rate the stock as a Buy because total return prospects come in at 16.1% annually over the next five years, due to strong growth estimates and a valuation multiple rerating. While this stock might not be attractive for income investors due to the low dividend, growth investors might be interested in this stock for its strong growth prospects and attractive royalty portfolio.
