## Overview & Current Events

Southern Copper Corporation is one of the largest integrated copper producers in the world. The corporation produces copper, molybdenum, zinc, lead, coal, and silver. All mining, smelting, and refining facilities are located in Peru and Mexico. Exploration activities are conducted in Peru, Mexico, and Chile. Southern Copper is listed on the NYSE and the Lima Stock Exchange since 1996, under the ticker symbol SCCO. SCCO has a market capitalization of \$37 billion. Southern Copper Corp. is an indirect subsidiary of Grupo Mexico, which owns 88.9% of SCCO capital stock through its wholly owned Americas Mining Corporation. SCCO has nearly 15,000 employees.

On July 28<sup>th</sup>, 2022, Southern Copper released second quarter 2022 results. Second quarter net sales were \$2.31 billion, a 20% decrease over the same prior year period. The decrease in net sales was primarily driven by a drop in prices for copper (-1.8%) and silver (-15.4%) as well as lower sales volume, partially offset by higher molybdenum prices (+31.7%).

At the same time, operating cost rose 23% to \$1.50 billion. Net income was \$432 million, a 54% decrease year-over-year. Income per share shrunk by 79% to \$0.56 from \$1.21 in the prior year period.

The operating cash cost per pound of copper (net of by-product revenues) was \$1.10 in Q2 2022, an unfavorable comparison to \$0.59 in the year-ago quarter. This decrease was largely due to higher production costs.

A \$0.75 quarterly dividend was declared, which was a 40% decrease to the last quarter dividend paid of \$1.25 per share.

## Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
<b>EPS</b>	\$2.65	\$1.92	\$1.61	\$0.93	\$1.00	\$1.90	\$2.00	\$1.92	\$2.03	\$4.39	<b>\$2.80</b>	<b>\$3.41</b>
<b>DPS</b>	\$3.71	\$0.68	\$0.46	\$0.34	\$0.18	\$0.59	\$1.40	\$1.60	\$1.50	\$3.20	<b>\$3.00</b>	<b>\$3.31</b>
<b>Shares<sup>2</sup></b>	845.6	835.3	812.6	775.9	773.0	773.0	773.1	773.1	773.1	773.1	<b>773.0</b>	<b>773.0</b>

Southern Copper Corp has a very choppy earnings history as their growth is highly reliant on ever-changing commodity prices, primarily copper but also silver, zinc, and others. Even so, the company expects that the quality of the assets they operate and develop will fuel growth over the long term. While net income per share has grown by 5.8% on average over the last nine years, it has grown by 34% on average in the last five. The business is largely cyclical. A significant increase in precious metals prices has caused significant growth in earnings in recent quarters, which led to blowout results in 2021, and we forecast a small reduction in 2022. From this point on, we estimate that SCCO can continue to compound net income per share by roughly 4.0% going forward. The dividend has also risen and fallen frequently, and we are forecasting 2% growth to \$3.31 in 2027.

Southern Copper's growth is underpinned by solid fundamentals in the copper market. The automobile industry's global recovery was part of the cause for a significant increase in copper production in 2021. Additionally, government infrastructure packages can cause increases in copper demand, as it's a fundamental element to green energy. The company has long-term projects in place, such as starting up new mines, and a total investment program of \$7.9 billion

for projects in Peru. So far, more than \$1.5 billion has already been invested. Most notable are Michiquillay (\$2.5B) and Los Chancas (\$2.6B). Michiquillay is expected to produce 225,000 tons of copper per year (and by-products) for more than 25 years with a start-up date by 2028. Los Chancas is anticipated to start producing 130,000 tons of copper and 7,500 tons of molybdenum annually in 2027. Southern also has some of the lowest cash cost for producing copper, and still, they are generally able to lower this and fuel bottom line growth. The company is also investing into increasing production at their existing mines and constructing other new mines.

## Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	12.5	16.3	18.6	30.5	27.2	20.2	22.8	18.8	21.1	22.0	17.3	18.0
Avg. Yld.	11%	2.2%	1.5%	1.2%	0.7%	1.5%	3.1%	4.4%	3.5%	3.8%	6.2%	5.4%

Southern Copper has traded at a price-to-net income of 21 on average in the past nine and five years. Today shares are trading at a small discount at 17.3 times net income due to strong net income forecasts and a subdued share price. We estimate that shares are worth 18.0 times net income and estimate a 0.8% gain due to valuation expansion. The yield of 6.2% today is quite impressive for a mining company.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	140%	35%	29%	37%	18%	31%	70%	83%	74%	73%	107%	97%

Southern Copper is a power player in the copper mining, smelting, and refining businesses. SCCO has the world's largest copper reserves. Southern also has the #1 mine life among copper producers and is one of the world's largest producer of mined copper. The corporation also has one of the lowest cash cost for produced copper among its peer group, which is yet another advantage.

SCCO was negatively affected by the great financial crisis, and earnings dropped in half from 2007 to 2009, which forced a reduction in the dividend from \$2.24 to \$0.44. While precious metals prices may increase during tough economic conditions, demand for the metals are likely to decrease.

## Final Thoughts & Recommendation

Southern Copper is a copper behemoth with the world's largest copper reserves. The company posted record results in 2021 and we anticipate them to be lower in 2022 but still strong historically. We estimate SCCO can produce total annualized returns of 9.8% in the intermediate term, and currently trades at 96% of our estimated fair value, thus we rate SCCO as a hold.
