Overview & Current Events

West Pharmaceutical Services manufactures packaging and components involved in the distribution and application of pharmaceuticals. The company's products include *Zenith Crystal*, a medical glass alternative, and *SmartDose*, an automatic medication delivery system. West Pharmaceutical was founded in 1923 and is headquartered in Exton, PA. The company has increased its dividend for 28 consecutive years, which qualifies it to be a Dividend Champion.

West Pharmaceutical Services reported its second quarter earnings results on July 28. The company reported that its revenues totaled \$770 million, which represents a revenue growth rate of 7% compared to the prior year's quarter. West Pharmaceutical Services' revenues were slightly higher than what the analyst community had expected, beating estimates by \$17 million. Revenues were negatively impacted by a strengthening dollar. Adjusted for that, West Pharmaceutical Services' organic revenues were up by a stronger 13% year over year.

West Pharmaceutical Services generated adjusted earnings-per-share of \$2.47 during the second quarter, which represents an increase of 0.5% compared to the prior year's quarter. West Pharmaceutical Services lowered its revenue guidance to a range of \$2.95 billion to \$2.98 billion. Management is expecting earnings-per-share in a range of \$9.00 to \$9.15, which would make 2022 a new record year for the company. At the same time, the guidance implies that growth will slow down quite a lot from the very strong level seen in 2021.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$1.38	\$1.57	\$1.75	\$1.30	\$1.91	\$2.78	\$2.81	\$3.24	\$4.76	\$8.58	\$9.08	\$13.97
DPS	\$0.37	\$0.39	\$0.41	\$0.46	\$0.50	\$0.54	\$0.57	\$0.61	\$0.65	\$0.69	\$0.72	\$0.96
Shares¹	67	70	71	72	73	74	74	75	76	75	74	72

West Pharmaceutical grew its earnings-per-share at an attractive pace of 12% annually between 2009 and 2019. This included the recovery from the last financial crisis, when West Pharmaceutical Services' earnings-per-share growth rate was at an above-average level, during 2010 – 2014. During the last financial crisis, West Pharmaceutical Services' earnings-per-share declined by roughly 15%, which was a very solid performance versus most other companies.

West Pharmaceutical projects a long-term organic sales growth rate in a range of 6% to 8%. This seems optimistic, as West Pharmaceutical's revenues have grown at a slower pace of slightly less than 5% over the last 10 years. West Pharmaceutical Services' organic revenue growth rate accelerated during 2019 and 2020, however, which is why the company could be able to generate higher revenue growth in the future, compared to its historic growth rate. Tailwinds for the industry, such as rising healthcare spending, will help West Pharmaceutical in achieving sizeable revenue growth in coming years. Revenue growth will be one source for higher earnings, but a more favorable product mix will positively impact West Pharmaceutical's earnings growth as well. The company seeks to increase its revenues in the Proprietary Products segment, which has significantly higher margins than the Contract-Manufactured Products business. A recently announced buyback program could also help the company in growing its earnings-per-share.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	17.2	23.7	26.1	43.8	38.1	36.0	34.9	46.3	59.5	54.7	37.3	25.0
Avg. Yld.	1.6%	1.0%	0.9%	0.8%	0.7%	0.6%	0.6%	0.4%	0.2%	0.1%	0.2%	0.3%

West Pharmaceutical Services has never been valued at an especially low valuation throughout the last past, but in the 2010-2013 time frame, its valuation was at least moderate, although shares still traded at a premium valuation relative to the broad market. Today, West Pharmaceutical Services' valuation is at a pretty high level, which is not justified by the company's earnings growth record during the last couple of years. We forecast significant downside potential for the company's shares based on expected multiple contraction headwinds.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	26.8%	24.8%	23.4%	35.4%	26.2%	19.4%	20.3%	18.8%	13.7%	8.0%	7.9%	6.9%

West Pharmaceutical Services' dividend payout ratio has never been high – the company has paid out less than one-third of its net profits in the form of dividends during each year of the last decade. Coupled with the fact that the company continued to raise its dividend during the last financial crisis, the payout appears to be very safe. At well below 1%, the yield is so low that the stock is very uninteresting for income investors.

West Pharmaceutical is not active in a cyclical industry, as demand for medical items and pharmacologic products is not really dependent upon economic conditions. This explains why West Pharmaceutical was not impacted by the last financial crisis to a large degree, showcased by the fact that earnings-per-share declined by just 15% peak-to-trough.

Final Thoughts & Recommendation

West Pharmaceutical Services is active in an industry that is poised to generate solid growth rates over the coming years, and which is also not very vulnerable to recessions. The coronavirus crisis was not a relevant headwind for the company. West Pharmaceutical Services also has a solid dividend growth track record. We still do not think that the company is attractive for income investors, mainly due to its extremely low dividend yield. Due to a pretty high valuation of more than 37 times this year's expected net profits, West Pharmaceutical Services earns a sell recommendation from us at the current price, although we would like the company around fair value.
