Overview & Current Events

Dillard's is a department store company that sells fashion apparel, cosmetics and home furnishings through 290 stores and clearance centers. The company competes with larger peers such as Macy's and Kohl's. Dillard's was founded in 1938 and is headquartered in Little Rock, AR.

Dillard's reported its second quarter earnings results in August. The company reported that its revenues totaled \$1.59 billion during the quarter, which was 1% more than the revenues that the company generated during the previous year's quarter. The revenue increase was a lot smaller compared to the revenue growth Dillard's has generated during the previous quarter, which can be explained by the fact that Q1 had a very easy comparison due to the lockdowns in 2021, whereas Q2 was a harsher comparable. The revenue increase was, unlike in previous quarters, not caused by comparable store sales growth, as those were flat year over year.

The company reported a net profit of \$9.30 on a per-share basis for the second quarter. Unlike in the previous quarter, Dillard's was not able to grow its gross margin during the second quarter. In fact, its gross margin contracted to 41.5% of sales, down slightly year-over-year. Higher revenues and operating leverage still let earnings explode upwards compared to the previous year's quarter. Dillard had a very strong 2021 primarily thanks to an exceptional second half, but it looks like 2022 will be somewhat weaker overall. Still, 2022 should be the second-strongest year in the company's history. With consumer sentiment weakening and inflationary pressures on the rise, it is expected that the remainder of the current year will be weaker compared to what we have seen during the first half of the current year.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$6.32	\$6.99	\$7.79	\$6.91	\$4.93	\$4.89	\$6.23	\$4.38	-\$2.80	\$40.67	\$35.00	\$31.64
DPS	\$0.20	\$0.22	\$0.24	\$0.26	\$0.28	\$0.34	\$0.40	\$0.50	\$0.60	\$0.80	\$0.80	\$1.00
Shares¹	48	44	41	36	32	28	27	25	25	22	18	15

Dillard's recovered quickly from the financial crisis. By 2010, earnings-per-share were above pre-crisis levels. For several years Dillard's produced strong growth rates, but starting in 2015, profits started to decline. Revenue growth has not been strong over the last decade; sales in 2018 actually were lower than sales in 2008. Dillard's profit growth in the early 2010s was primarily driven by margin expansion, as gross and operating margins rose substantially.

Following a very solid 2018, during 2019 the company had to battle with declining margins, which were the result of mark-downs, and headwinds from declining comparable store sales, which hurt the company due to negative operating leverage. Dillard's has returned a massive amount of cash to its owners via share repurchases in the past. The company's share count declined by more than 60% over the last decade, which has increased each share's portion of the company's earnings by a lot. 2020 was a very weak year for Dillard's, but 2021 was a very strong year again. The forward outlook is more uncertain, but ongoing share repurchases should be beneficial for the company's earnings-per-share growth, which should help ease some of the headwinds that brick-and-mortar retailers will likely experience.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	11.3	12.1	13.8	14.7	13.4	11.6	9.6	16.7	NMF	6.0	8.0	11.0
Avg. Yld.	0.3%	0.3%	0.2%	0.3%	0.4%	0.6%	0.7%	0.7%	1.0%	0.3%	0.3%	0.3%

Dillard's valuation has not been especially high throughout much of the last decade, as the company's shares usually were valued at a low-double-digit price-to-earnings multiple. Right now, shares trade for around 8 times this year's estimated earnings-per-share. We believe that shares are trading below fair value today, which should have a positive impact on the company's total returns going forward.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	3.2%	3.1%	3.1%	3.8%	5.7%	7.0%	6.4%	11.4%	NMF	2.0%	2.3%	3.2%

Dillard's pays out only a marginal amount of its net profits in the form of dividends to the company's owners. Management is much more focused on reducing the share count, which the company has done very successfully in the past. It is very likely that management will continue to prioritize buybacks over dividends going forward. Despite the pressures during the current pandemic, Dillard's has decided to continue to pay its dividend.

One advantage that Dillard's has over some of its competitors is that it is not only active in apparel and cosmetics, but also in home furnishings, which provides some diversification and makes it less reliant on the performance of apparel sales – which are more easily done online compared to furniture. Management has pointed out that furniture performed better than other categories in recent years. Dillard's is not a recession-resilient stock.

Final Thoughts & Recommendation

Dillard's is a rather small department store company that has a somewhat unique product portfolio, due to selling furniture and related items on top of the usual soft-line categories sold by most department store chains. The company rebounded massively in 2021, and even though profits during this year will pull back, the current year should be a strong one. Forecast returns are not too strong, though, which is why we rate the stock a hold today.
