Overview & Current Events

Intuit is a cloud-based accounting and tax preparation software giant, headquartered in Mountain View, California. Its products provide financial management, compliance, and services for consumers, small businesses, self-employed workers, and accounting professionals worldwide. Its most popular platforms include QuickBooks, TurboTax, Mint, and TSheets. Cumulatively they serve more than 100 million customers. The \$117.8 billion company recorded \$12.7 billion in revenues last year and is headquartered in Mountain View, California.

On August 23rd, 2022, Intuit reported its Q4-2022 full-year results for the period ending July 31st, 2022. The company posted another tremendous quarter, growing its "Small business and Self-employed" revenue by 41% and its online ecosystem revenue by 66%. QuickBooks Online accounting revenues grew 34% year-over-year as well. Following a strong Q4, the company ended its fiscal year with its revenues reaching \$12.7 billion, up 32% year-over-year.

Non-GAAP EPS for the year also grew substantially, up 22% to \$11.85 compared to fiscal 2021. Management remains focused on its acceleration of innovation-driven AI strategy and its 5 Big Bets, including revolutionizing speed-to-benefit, connecting people to experts, unlocking smart money decisions, being the center of small business growth, and disrupting the small business mid-market.

Following robust momentum entering fiscal 2023, management introduced its quite optimistic guidance for this year. Revenues are expected to be roughly between \$14.5 billion and \$14.7 billion implying a 15% growth rate year-over-year at the midpoint. Non-GAAP EPS is expected to be between \$13.59 and \$13.89. It implies year-over-year growth of 16% at the midpoint, which we have applied in our estimates.

Along with its earnings release, the company announced a 15% increase to its dividend to a quarterly rate of \$0.78.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$2.89	\$3.18	\$1.30	\$3.74	\$3.83	\$5.19	\$5.99	\$6.92	\$9.74	\$11.85	\$13.74	\$25.32
DPS	\$0.68	\$0.76	\$1.00	\$1.20	\$1.36	\$1.56	\$1.88	\$2.12	\$2.36	\$2.72	\$3.12	\$5.75
Shares¹	297	285	281	262	257	256	273	265	273	282	282	230

EPS CAGR over the past decade has been around 17%, while DPS CAGR has been about 17.6% during the period. Consistent earnings growth has resulted from multiple acquisitions that have allowed the company to expand its portfolio of products. We forecast EPS and DPS growth of around 13% through 2027 to reflect Intuit's strong momentum while assuming some degree of deceleration ahead. Overall, Intuit's resilient revenues should continue to grow gradually due to its non-stop acquisitions, which can help earnings growth amid unlocking efficiencies over time. Our estimates might be quite prudent, and actual results are likely to be stronger. This has been the case in every single report since initiating coverage on INTU. Still, we remain conservative against a potential deceleration and unforeseen headwinds. Finally, \$3.5 billion currently remains authorized under the company's stock repurchase program, representing 2.9% of its market cap. Intuit repurchased \$1.9 billion worth of stock during fiscal 2022.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	26.2	24.9	29.5	58.2	45.3	39	47.1	48.7	44.5	39.6	30.4	26.0
Avg. Yld.	1.0%	1.1%	0.9%	1.3%	1.2%	1.1%	0.8%	0.8%	0.6%	0.6%	0.7%	0.9%

Intuit's valuation has seen a significant premium over the past five years, as the company has dominated the tax-reporting software market. By showcasing robust, growing cash flows, even during times of uncertainty, the company currently features a P/E ratio of around 30.4 attached to its shares. Due to the company's fantastic moat, recession proof business model, and explosive growth, we can see the premium valuation lasting longer than expected before eventually compressing. To be prudent, however, we have set our medium-term fair P/E multiple at 26. The dividend yield should remain relatively low, despite its rapid growth and the moderate payout ratio. We expect investors to enjoy total returns mainly from share price appreciation, powered by EPS growth and share buybacks.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	24%	24%	77%	32%	36%	30%	31%	31%	24%	23%	23%	23%

Intuit makes for a relatively trustworthy investment, as its revenues are primarily recession-proof, as proven by the robust sales growth despite the challenges resulting from COVID-19. While nothing is certain in life, it is safe to say that taxes won't be disappearing. The company has dominated its industry, closing more than 38 acquisitions over the past few years. With non-meaningful levels of worrying competition, its suite of products will be there to help people pay their inevitable taxes, while the company enjoys a recurring stream of revenues.

To highlight its sales resilience, even in the midst of the 2007 to 2009 financial crisis, the company managed to grow earnings by around 7%. We consider Intuit to be an incredible sector-leader, while its future acquisitions should further strengthen its portfolio of products, hence its rich valuation. The stock's dividend remains very safe, reflecting only around 23% of the company's underling net income.

Final Thoughts & Recommendation

Intuit ended fiscal 2022 with very strong results, while its initial guidance for fiscal 2023 appears quite optimistic. We forecast medium-term annualized returns of around 10.3%, powered mainly by our growth estimates, offset by further valuation headwinds. With a low yield, the stock may not appeal to income investors. However, its rapidly growing dividend and cash flow resilience could end up being a moderate source of income in the long-term if valuation headwinds don't reduce too much of the growth returns. We rate shares as a buy due to projected returns.
