Overview & Current Events

Nutrien Ltd. (NTR) is a Canadian company formed through Agrium and PotashCorp's merger in a closed transaction on January 1, 2018. The company produces and markets crop nutrients to agricultural, industrial, and feed customers worldwide. The company has over 1,700 retail locations in North America, South America, and Australia and is one of the world's largest manufacturers and suppliers of potash, nitrogen, and phosphate. The company provides over 20% of the global market on potash, 3% nitrogen, and 3% phosphate. Nutrien has a market capitalization of approximately \$49.6 billion, more than 20,000 workers, and produced roughly \$27.7 billion in revenue in 2021.

On August 3, 2022, Nutrien reported its second-quarter results for Fiscal Year (FY)2022. Total sales increased 49% Year over Year (YoY) to \$14,506 million for 2Q22 compared to \$9,763 million in 2Q21. The increase came mainly from the Crop nutrients segment, which saw sales increase by 49%. The Seed segment saw growth for the quarter, which saw sales increase by 4%. The Crop protection products segment saw sales increase by 12% year over year. The cost of goods also increases because of inflation. Cost of goods was up 25% from \$5,679 million for the second quarter of 2021 to \$7,082 million. Net earnings came in at \$1,427 million for the quarter, compared to a profit of \$1,097 million in 2Q21. The global grain and oilseed stocks-to-use ratios remain well below historical average levels, which the company believes will continue to be supportive for crop prices. Prices for key crops such as corn, soybeans and wheat are up 25% to 35% compared to the ten-year average, providing strong incentive for growers to increase production.

Management provided their full-year earnings guidance for 2022. They expect the company to make \$15.80-\$17.80 per share for the year. However, this is due to inflation and should stabilize, thus bringing the company earnings down from this high during the next few years. Therefore, we will use \$11.00 per share for our calculation. This is 76.6% higher than what the company earned in FY2021.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	---	---	---	---	---	---	\$2.69	\$2.17	\$1.80	\$6.23	\$11.00	\$11.00
DPS	---	---	---	---	---	---	\$1.66	\$1.75	\$1.81	\$1.85	\$1.92	\$2.12
Shares¹	---	---	---	---	---	---	609.0	573.0	569.0	571.0	571.0	571.0

Nutrien does not have a long history as a combined company, and neither PotashCorp nor Agrium represent directly comparable predecessors. PotashCorp was primarily involved in its potash production side, while Agrium mainly represented the agricultural retail. As a combined company, Nutrien now has a significant stake in both sides, and with a 52/48 split, the merger was one of the equals. Analysts expect an EPS to be much higher in 2022 due to renewed commodity demand and pricing. Share repurchases are expected to contribute several percentage points per year on top of baseline growth. Nutrien repurchased approximately 0.7% of its market capitalization in 2021. We expect a 0% earnings growth over the next five years as earnings are expected to be up 76% for 2022. Dividend growth is expected to be 2% as it normalizes its payout ratio. Significant increases or decreases in fertilizer prices would substantially affect the growth rate and are mostly outside the company's control.

¹ Share count is in millions.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	---	---	---	---	---	---	17.2	22.1	26.6	12.1	8.4	12.5
Avg. Yld.	---	---	---	---	---	---	3.5%	3.7%	3.8%	2.5%	2.1%	1.5%

One of Nutrien's primary industry peers with a long history as a unified company, The Mosaic Company, has had an average P/E ratio of 19.9 over the past ten years, with a high of 31 and a low of 13. With an anticipated significant recovery in agriculture commodity prices, which have been in a multi-year bear market, we expect Nutrien's P/E ratio to increase to 12.5 as a baseline. Thus, the company has a low valuation at the current price with a current PE of 8.4 based on 2022 earnings.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	---	---	---	---	---	61.7%	80.6%	100%	29.7%	17%	19%

Nutrien has an economic moat from its potash and nitrogen production operations resulting in relatively high returns on invested capital in most years compared to the broader materials sector. The company has geographically significant production assets in Canada that sit on the bottom half of the global production cost curve. Even in a low-price environment, the company can outlast its competitors and survive to see periods of higher commodity prices. On the other hand, the company's phosphate production operations are in the upper half of the global cost curve. Its retail agriculture business, being the largest in North America, may have mild cost advantages, but several competitors are similar in scale. Therefore, these aspects of the business lack economic moat.

Agricultural commodities, especially fertilizer, are not very economically sensitive because people need to eat through recessions and expansions. However, the agricultural and fertilizer industries have cycles, and the supply/demand relationship in agricultural commodity production due to weather and other factors can dramatically affect prices. For example, potash spiked to over \$800/ton in 2009 but is currently under \$562/ton. Nutrien enormously benefits from higher potash rates, nitrogen, and phosphate and is hurt by lower prices. Nutrien's balance sheet is strong, with a debt/equity (D/E) ratio of 0.4 and an interest coverage ratio of 20.1. The company currently has an S&P credit rating of BBB, an investment-grade rating.

Final Thoughts & Recommendation

With an expected 9.9% annualized return over the next five years, we consider Nutrien a hold. However, Nutrien has a high-performance variance based on crop nutrition commodity prices and could deliver significantly higher or lower returns than this expected baseline.
