Overview & Current Events

Bank of New York Mellon opened its doors in 1784 in the wake of the American Revolution, founded in part by Alexander Hamilton. The bank was the first ever to make a loan to the U.S. government and in the nearly 240 years since, has grown to more than \$16 billion in annual revenue and a market capitalization of \$33 billion. The bank is present in 35 countries around the world and acts as more of an investment manager than a traditional bank. Indeed, BNY Mellon's stated goal is help its customers manage their assets throughout the investment lifecycle. As such, BNY Mellon's revenue is mostly derived from fees, not traditional interest income.

Bank of New York Mellon reported third quarter earnings on October 17th, 2022, and results were better than expected on both the top and bottom lines. Adjusted earnings-per-share came to \$1.21, which was 13 cents better than expected. Earnings were higher than the \$1.09 posted in the year-ago period, and the \$1.03 posted in Q2 of this year. Revenue also outperformed, hitting \$4.28 billion, beating estimates by \$80 million and up from \$4.04 in the year-ago period.

Noninterest expense was \$3.68 billion, up from \$2.92 billion in the same period a year ago. Fee revenue was off slightly year-over-year, coming to \$3.24 billion. Net interest revenue was \$926 million, up 12% from Q2, and up 44% year-over-year.

Assets under management fell 8% during the quarter to \$1.78 trillion, mostly from market depreciation.

We've left our estimate of earnings-per-share unchanged for this year following Q3 results.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$2.03	\$1.74	\$2.41	\$2.85	\$3.17	\$3.31	\$4.21	\$4.02	\$4.01	\$4.18	\$4.25	\$5.69
DPS	\$0.52	\$0.58	\$0.66	\$0.68	\$0.72	\$0.86	\$1.04	\$1.18	\$1.24	\$1.33	\$1.48	\$1.89
Shares¹	1,254	1,142	1,118	1,085	1,048	1,013	1,007	901	879	826	790	700

BNY Mellon's earnings-per-share were a bit underwhelming coming out of the financial crisis as they were roughly flat for six years. However, since 2013 BNY Mellon has fixed its efficiency issues, leading to better margins as it is now more prepared to take advantage of revenue increases. To that end, we are forecasting 6% earnings-per-share growth annually moving forward.

BNY Mellon can achieve this growth in a variety of ways. First, revenue continues to grow over time, something we expect to continue under normalized conditions. Its assets under custody and administration continue to grow as well, particularly during strong equity markets, which is a key driver of fee income. Its lending business is small but growing and continues to add to top line growth as well, although this was not the case in 2020. We note that issues with AUM and lending margins tend to move in cycles, so BNY Mellon should see some respite from its headwinds over time. We also see the bank continuing its share repurchases over time, resulting in a meaningful tailwind for earnings-per-share outside of revenue and earnings growth. Finally, we expect margins to continue to improve slightly over time as the bank realizes additional operating leverage from higher revenue outpacing expense growth. Investors would do well to continue to monitor expense growth against revenue growth for signs of margin deterioration. We also note that if

equity markets begin to recover, the bank will be a beneficiary through its custodial and asset under management fee structure.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	11.2	17.2	15.1	14.5	12.7	15.1	12.6	11.9	9.6	12.2	9.4	12.0
Avg. Yld.	2.3%	1.9%	1.8%	1.6%	1.8%	1.7%	2.0%	2.5%	3.2%	2.6%	3.7%	2.8%

The stock's earnings multiple is now just 9.4, well under our estimate of fair value at 12 times earnings. Given this, we see a modest tailwind to total returns in the coming years from the valuation. We expect the dividend yield to return to sub-3% in the coming years. We note this is the cheapest the stock has been in the past decade, and the yield is also the best it has been.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	25%	34%	28%	27%	25%	29%	25%	29%	31%	32%	35%	33%

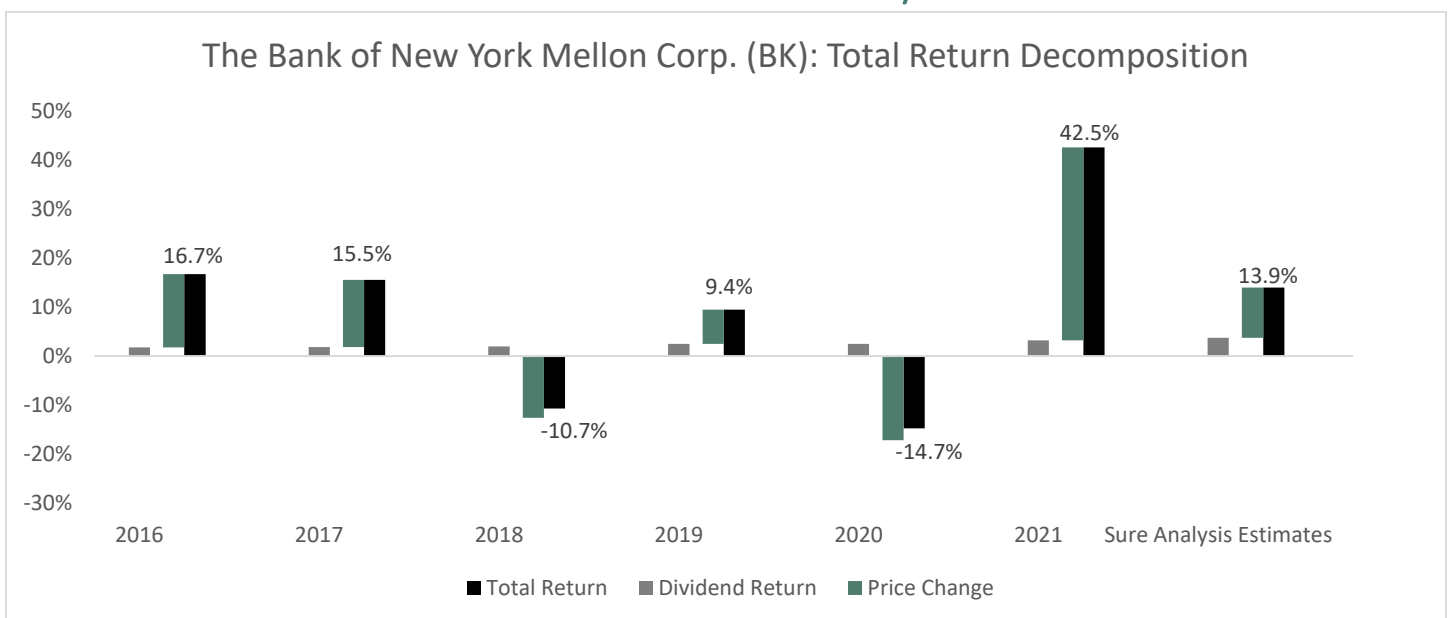

BNY Mellon's dividend is only about a third of its earnings, consistent with other large bank peers. That means the payout is very safe and we expect it to continue growing in the mid-single digits annually in the years to come.

BNY Mellon's competitive advantage is in its lack of reliance upon lending for revenue. This allows it to perform relatively well during recessions when other banks are struggling. While the company is not immune to downturns, its fee model is more resilient to such conditions than a bank that makes the majority of its revenue from interest income. Indeed, when many banks suffered in 2020, BNY Mellon saw essentially flat earnings year-over-year.

Final Thoughts & Recommendation

Overall, BNY Mellon looks like an undervalued stock with decent growth potential. We are forecasting total annual returns of 13.9% going forward, given the valuation tailwind of 5%, 3.7% yield, and 6% earnings growth from what should be a relatively low base for 2022. We are reiterating the stock at a buy rating after Q3 results.
