## Overview & Current Events

Fortitude Gold Corporation was spun-off from Gold Resource Corporation into a separate public company in December 2021. Fortitude Gold is a junior gold producer with operations in Nevada, U.S.A, one of the world's premier mining-friendly jurisdictions. The company targets high-grade gold open pit heap leach operations averaging one gram per tonne of gold or greater. Its property portfolio currently consists of 100% ownership in six high-grade gold properties. All six properties are within an approximate 30-mile radius of one another within the prolific Walker Lane Mineral Belt. The company generates around \$82 million in annual revenues, 99% of which are from gold, and is headquartered in Colorado Springs, Colorado. It pays dividends on a monthly basis. Shares are trading over the counter (OTC) and are not listed on a major exchange.

On November 1<sup>st</sup>, 2022, Fortitude Gold Corporation reported its Q3-2022 results for the period ending September 30<sup>th</sup>, 2022. Revenues came in at \$16.1 million, 21% lower year-over-year. The decline was due to the company realizing 0.4% lower gold prices, at an average of \$1,619/oz., and selling around 9.4K ounces of gold, a year-over-year decline of 18.2%. This is due to a drop in total gold production, which declined by 17.3% to 9.5K ounces. Despite the lower production, the company maintained its 2022 Annual Outlook, targeting a production of 40K gold ounces. Moving to the bottom line, the company recorded a mine gross profit of \$7.4 million compared to \$9.6 million last year amid lower sales. Simultaneously, GS&A and exploration expenses rose notably, pressuring net income margins further.

Accordingly, net income came in at \$1.72 million, 63% lower year-over-year. On a per-share basis, net income came in at \$0.07, compared to \$0.19 last year. Based on the company's year-to-date results, gold production outlook (40K ounces versus 46.5K produced last year), and current gold prices, we continue to forecast EPS of \$0.55 for fiscal 2022.

## Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
<b>EPS</b>	---	---	---	---	---	---	---	---	\$0.48	\$0.75	<b>\$0.55</b>	<b>\$0.55</b>
<b>DPS</b>	---	---	---	---	---	---	---	---	---	\$0.31	<b>\$0.48</b>	<b>\$0.48</b>
<b>Shares<sup>2</sup></b>	---	---	---	---	---	---	---	---	21.2	24.1	<b>24.2</b>	<b>24.2</b>

Fortitude Gold estimates that its annual gold production will be maintained close to 40K ounces well through 2028. Thus, excluding any potential acquisitions, the company's medium-term results will mostly be determined by the underlying gold prices and modest expansions at existing mines. On the one hand, higher gold prices and operating efficiencies could boost the company's bottom line. On the other hand, lower gold prices and increased costs, especially during the current inflationary environment, could pressure profitability. For this reason, our medium-term assumptions employ constant results ahead. In terms of its dividend, the company has a unique policy: Returning as much cash to shareholders as soon as possible while balancing the capital needs of operations, reinvesting capital back into the business for organic growth, and paying taxes. Jason Reid, the company's CEO, has clearly stated they aim to counter the criticism of mining equities providing no yield, thus targeting an attractive yield while dividends are being paid monthly.

Updated November 6<sup>th</sup>, 2022 by Nikolaos Sismanis

Management believes this trait will differentiate the company from its mining peers from an investors' standpoint. The current \$0.04 monthly rate implies an annualized dividend of \$0.48 per share. We estimate stable payouts ahead, matching our stable EPS estimate.

## Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	---	---	---	---	---	---	---	---	---	9.7	<b>10.1</b>	<b>10.0</b>
Avg. Yld.	---	---	---	---	---	---	---	---	---	4.2%	<b>8.6%</b>	<b>8.7%</b>

Fortitude Gold currently trades at 10.1 times our expected EPS for fiscal 2022. This is more or less in line with its industry peers. Also, due to the company's short trading history, its future earnings potential influenced by a commodity that fluctuates, additional risks attached to an OTC listing from an investor's standpoint (e.g., liquidity risks), and rising rates, we lower our fair multiple from 11X to 10X. In line with the company's goal to feature a high dividend yield, shares of Fortitude currently yield a substantial 8.6%. The yield could grow more sizable following a slight valuation compression.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

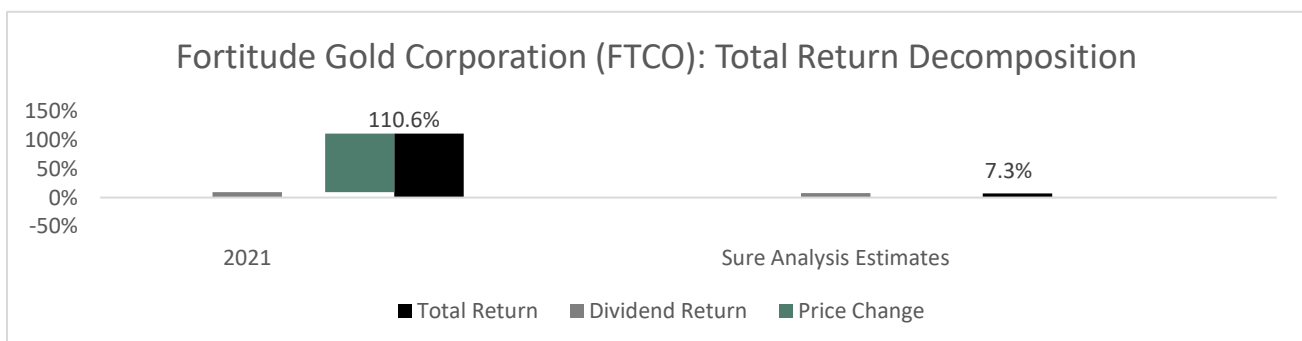

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	---	---	---	---	---	---	---	---	41%	<b>87%</b>	<b>87%</b>

We consider Fortitude Gold's current payouts relatively reliable, as they should be covered even following a noteworthy decline in gold prices. However, they could easily be cut during a prolonged, unfavorable environment for the commodity. The company's competitive advantage lies in management's expertise and robust shareholder value creation track record. During their leadership role in Gold Resource Corporation (NYSE:GORO) prior to the spin-off, they generated over \$1 billion in revenues, recorded ten consecutive years of profitability, and distributed over \$116 million in dividends to shareholders, among other developments. Its properties also feature exceptionally high-ore grade and near-surface deposits, resulting in low-cost operations relative to its peers. Additionally, the balance sheet is pristine, with \$127.4 million in total assets against just \$12.6 million in total liabilities, resulting in a strong equity value of \$114.8 million. The company is not necessarily vulnerable to a recession, as future results are mostly subject to gold prices. Still, gold prices are likely to decline during a recession.

## Final Thoughts & Recommendation

Fortitude Gold Corporation appears like an optimal pick for investors who seek exposure to gold miners combined with regular payouts, with the company featuring by far the highest yield amongst its peers. That said, future earnings will be highly correlated to the movement of gold prices. We forecast annualized returns of 7.3% through 2027, driven primarily by Fortitude's yield and relatively stable future results and valuation assumptions. We rate the stock as a hold.
