Overview & Current Events

Macerich Company is one of the country's leading owners, operators, and developers of major retail real estate. The company is incorporated as a real estate investment trust (REIT) and owns 51 million square feet of real estate consisting primarily of interests in 47 regional shopping centers. Macerich has a significant presence in the West Coast, Arizona, Chicago, and the Metro New York to Washington, DC corridor. The stock trades on the New York Stock Exchange with a market capitalization of \$2.7 billion.

In early November, Macerich reported (11/3/22) financial results for the third quarter of fiscal 2022. The REIT grew its occupancy from 90.3% in last year's quarter to 92.1% and its funds from operations per share (FFOPS) by 2%, from \$0.45 to \$0.46. However, as its recovery from the pandemic somewhat stalled, the REIT missed the analysts' consensus by \$0.01 and revised its guidance for its annual FFO per share from \$1.92-\$2.04 to \$1.93-\$1.99. Accordingly, we have lowered our forecast from \$2.00 to \$1.95. On the bright side, the tenants of the REIT currently enjoy higher sales than pre-pandemic levels and Macerich recently raised its dividend by 13%, after 4 years without a dividend hike.

Macerich was struggling before the pandemic, as it was trying to redevelop the properties it had recaptured from Sears. Even worse, the REIT is now facing a downturn due to the pandemic. Due to this downturn, Macerich cut its quarterly dividend twice in 2020, for an -80% total dividend cut. In reference to the pandemic, the worse seems to be behind Macerich but we are concerned over its high debt load.

Growth on a Per-Share Basis

| Year | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2027 |
|---------------------|--------|--------|---------|--------|--------|--------|--------|--------|---------|--------|--------|--------|
| FFOPS | \$3.18 | \$3.53 | \$3.54 | \$3.81 | \$4.08 | \$3.83 | \$3.73 | \$3.54 | \$2.16 | \$2.03 | \$1.95 | \$2.26 |
| EPS | \$2.03 | \$1.06 | \$10.45 | \$3.08 | \$3.52 | \$1.02 | \$0.42 | \$0.68 | -\$1.58 | \$0.07 | \$0.10 | \$0.40 |
| DPS | \$2.23 | \$2.36 | \$2.51 | \$2.63 | \$2.75 | \$2.87 | \$2.97 | \$3.00 | \$1.15 | \$0.60 | \$0.68 | \$0.92 |
| Shares ¹ | 137.51 | 140.73 | 158.20 | 154.40 | 143.99 | 140.99 | 141.21 | 141.4 | 160.6 | 223.2 | 215.0 | 250.0 |

Macerich has been unable to generate meaningful growth in funds from operations per share since 2009. Recent years have been particularly challenging as the company's revenue has actually declined. U.S. retailers closed 12,200 stores in 2020 and 5,079 stores in 2021. Even in 2019, before the pandemic, more than 9,300 stores were shut down. Fewer than half of U.S. malls are expected to survive the ongoing business disruption. The rent per square foot is still growing but it is misleading, as vacancy rates have increased. In 2019, UBS estimated that about 75,000 U.S. stores will close if the market share of online sales rises from 16% to 25%. The market share of online sales currently stands at 20%.

Macerich has tried to defend its business model by reducing its exposure to department stores and increasing its exposure to flagship apparel stores, restaurants, and home furnishing stores. However, the REIT still has significant exposure to the secular decline of traditional retail stores. Even worse, the pandemic is likely to have a long-lasting effect on malls, as it will lead many consumers to get used to online purchases for life. We thus expect just 3% average annual growth of funds from operations per share over the next five years off this year's decade-low level.

Valuation Analysis

| Year | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | Now | 2027 |
|-------|------|------|------|------|------|------|------|------|-------|------|------|------|
| P/FFO | 18.0 | 17.3 | 18.7 | 21.3 | 19.2 | 16.0 | 15.1 | 10.0 | 5.1 | 8.6 | 6.2 | 8.0 |
| Yield | 3.9% | 3.9% | 3.8% | 3.2% | 3.5% | 4.7% | 5.3% | 8.4% | 10.6% | 3.4% | 5.7% | 5.1% |

Macerich is trading at a price-to-funds-from-operations (P/FFO) ratio of 6.2, which is much lower than its 10-year average of 14.9. We assume a fair P/FFO ratio of 8.0 for this REIT. This level is much lower than the historical average of Macerich, but it is warranted given the aforementioned challenges. If the stock trades at our fair valuation level in five years, it will enjoy a 5.4% annualized gain thanks to the expansion of its valuation level.

Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2027 |
|--------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Payout | 70.1% | 66.9% | 70.9% | 69.0% | 67.4% | 74.9% | 79.6% | 84.7% | 53.2% | 29.6% | 34.9% | 40.8% |

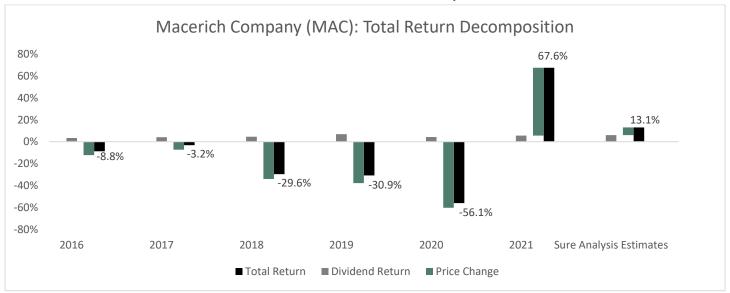

Macerich has properties in densely populated areas, with high barriers to entry. However, its poor performance record does not indicate the existence of a meaningful competitive advantage.

Moreover, Macerich has a high debt load, as its interest expense currently exceeds its operating income and its net debt stands at \$4.8 billion, which is 178% its current market cap. The high debt load is a major concern, particularly given the secular decline of this business. Furthermore, the trust has diluted its unitholders significantly over the last decade. This dilution has provided a strong headwind in growth of funds from operations per share while it has also greatly increased the financial burden of the dividend. Macerich cut its dividend in the Great Recession and in 2020 due to the pandemic. Macerich does not appear suitable for Income investors.

Final Thoughts & Recommendation

Thanks to the recovery of the economy from the pandemic, Macerich has stabilized its business performance lately. In the absence of a recession, the stock could offer a 13.1% average annual return over the next five years thanks to 3.0% growth, its 5.7% dividend and a 5.4% valuation tailwind. However, we are concerned over its secular decline, its debt pile and its excessive risk during downturns. Shares receive a hold rating.
