Overview & Current Events

Headquartered in Houston, TX, Main Street Capital Corporation is a Business Development Company (BDC) that provides long-term debt and equity capital to lower middle market companies and debt capital to middle market companies.

Main Street defines lower middle market companies as generally having annual revenues between \$10 million and \$150 million. The company's investments typically support management buyouts, recapitalizations, growth financings, refinancing and acquisitions. At the end of Q3 2022, Main Street had an interest in 75 lower middle market companies (valued at \$1.9 billion), 33 middle market companies (\$354 million) and 87 private loan investments (\$1.5 billion). The company has a market capitalization of \$2.9 billion and generated \$183 million in net investment income in 2021.

On November 2nd, Main Street Capital announced a 2.3% dividend increase to \$0.225 per share paid monthly.

On November 3rd, Main Street Capital reported third quarter 2022 results. Net investment income of \$62.4 million for the third quarter was a 27% increase compared to \$49.3 million in Q3 2021. The corporation generated net investment income per share of \$0.83, up 17% year-over-year from \$0.71 per share. Distributable net investment income per share totaled \$0.88, up 16% from \$0.76 in Q3 2021.

Main Street's net asset value per share increased compared to the end of 2021, from \$25.29 to \$25.94 a 2.6% increase. The corporation declared monthly dividends of \$0.225 to be paid in the first quarter of 2023, and a supplemental \$0.10 dividend to be paid in December. This monthly dividend is 4.7% higher than those declared for the first quarter of 2022.

As of the end of the third quarter 2022, the corporation had aggregate liquidity of \$420 million, consisting of \$61 million in cash and cash equivalents, and \$359 million of unused capacity under the revolving credit facility.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
NIIPS	\$2.01	\$2.06	\$2.20	\$2.18	\$2.23	\$2.39	\$2.60	\$2.50	\$2.10	\$2.65	\$3.14	\$3.38
DPS	\$1.71	\$2.66	\$2.55	\$2.65	\$2.73	\$2.79	\$2.85	\$2.91	\$2.46	\$2.48	\$2.70	\$2.84
Shares¹	29.5	37	44	49	52	57	60	63.0	66.0	70.0	75.0	90.0

NIIPS stands for Net Investment Income Per Share. Main Street's calculation of distributable net investment income excludes the impact of share-based compensation. We believe this is a real expense, and thus have elected to use net investment income instead. Main Street has put together a solid record in the past decade. From 2012 through 2022, Main Street was able to grow net investment income by an average compound rate of 3.1% per year, despite the pandemic. From 2016 to 2021, NIIPS grew 3.5% per year. This even though the company pays out basically all its income in the form of dividends and needs to issue shares in order to fund growth. Speaking of which, both aspects are worth describing in a bit more detail. Main Street's dividend policy is somewhat different from your typical firm. The company pays a monthly dividend, currently sitting at \$0.225 or \$2.70 on an annual basis, along with supplemental dividends twice a year (skipped in 2020 due to COVID-19). The upcoming supplemental dividend amounts to \$0.10 per share to be paid in December, while the company keeps its trend of increasing the regular monthly dividend slightly every year. The

supplemental dividends have been a result of generating realized gains from Main Street’s equity investments. Starting in 2019, Main Street began gradually reducing its supplemental dividend and absorbing it into the regular monthly dividend. Importantly, as a result of the BDC structure, dividends are classified as both ordinary and qualified dividends along with realized gains. Regarding the share count, you can see this growing significantly over time. In order to avoid corporate income tax, Main Street must distribute at least 90% of their taxable income, leaving little wiggle room to fund growth. While this strategy has worked extremely well since the last recession, we do caution that this method of funding becomes substantially less attractive (and more expensive) in lesser times. As such, we have tempered our growth expectations.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	15.2	15.9	13.3	13.3	16.5	16.6	13.3	16.4	17.4	15.3	12.0	14.5
Avg. Yld.	6.4%	8.1%	6.9%	7.3%	7.4%	7.0%	6.7%	6.8%	7.6%	6.1%	7.2%	5.8%

Over the past decade shares of Main Street have traded at an average P/E ratio of 15.3 times earnings. Given the current environment and Main’s recent performance, we estimate fair value of 14.5 times earnings, which implies the potential for a valuation tailwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	85%	129%	116%	122%	122%	117%	110%	116%	117%	93%	86%	84%

Main Street’s competitive advantage lies in its portfolio of small company interests, allowing for equity and debt exposure that would be difficult to replicate, along with the company’s management. In the last decade, the company has performed well, acting like a fund for small companies and passing along the income and gains to investors. The payout ratio detailed above is notable for two reasons. From an income standpoint, it highlights the BDC’s pass through status, requiring the company to pay a substantial dividend. From a safety standpoint, it shows that there is not much room for lesser performance. Indeed, given the idea of continued equity issuance to fund investments, growth came under pressure during the COVID-19 crisis, though investment income held up well overall.

Final Thoughts & Recommendation

Main Street has put together a solid record in the last decade. The company’s model is unusual for common equity, but typical of a pass-through entity – paying out all of earnings and funding growth by issuing shares. This leads to two distinct items: an above average dividend yield and an ever-increasing share count. We estimate annualized total returns of 10.8% moving forward, consisting primarily of the dividend. Shares of MAIN earn a buy rating.
