Overview & Current Events

Everest Re Group is a holding company that provides insurance as well as reinsurance services. Everest Re provides reinsurance for property & casualty insurers as well as for special lines such as maritime and aviation. Everest Re operates in the US and through branches in Canada, Singapore and Bermuda. The company was founded in 1999, and is headquartered in Hamilton, Bermuda.

Everest Re reported its third quarter earnings results on October 26. The company earned revenues of \$3.1 billion during the quarter, which was 7% more than the revenues that Everest Re generated during the previous year's quarter. The company managed to grow its gross written premiums by 6% year over year in constant currencies, primarily in the insurance space (13%, versus 3% for reinsurance), which bodes well for future revenue growth in upcoming quarters. The company's attritional combined ratio stood at 112%, which was way higher than during the previous quarter, and which can be explained by the impact of hurricane Ian.

Everest Re reported an adjusted loss-per-share of \$8.22 for the third quarter. The weak profitability was caused by higher-than-average catastrophe losses compared to the previous year's quarter. The biggest and most relevant catastrophe during the quarter was hurricane Ian in September. 2021 was a strong year for the company profit-wise, but it is expected that earnings-per-share will decline during the current year, primarily due to the weak Q3 results.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$13.62	\$21.47	\$24.71	\$25.04	\$23.61	\$9.10	\$4.52	\$21.34	\$7.40	\$28.90	\$24.00	\$26.50
DPS	\$1.92	\$2.19	\$3.20	\$4.00	\$4.70	\$5.05	\$5.30	\$5.75	\$6.20	\$6.20	\$6.60	\$8.42
Shares³	51.1	47.4	44.5	42.7	40.9	40.8	40.5	40.4	40.3	40.2	40.0	38.5

Everest Re's profitability has always been quite uneven. As a combined insurer/reinsurer, the company is significantly impacted by major events such as hurricanes, earthquakes, and wildfires. During 2018, for example, the wildfires in California and Hurricane Michael reduced Everest Re's profitability significantly. Since those events are relatively infrequent, the company's earnings generation is quite strong in most years. In the 10 years from 2006-2016, Everest Re grew its earnings-per-share by 6.5% a year, although its profits have not hit the levels seen a couple of years ago since, mainly due to two quite weak years in 2017 and 2018, when catastrophe losses were well above the norm.

Everest Re has managed to grow its net premiums at a steady pace in recent years, which positions the company well to reap benefits in the future. On top of that, Everest Re has repurchased shares at a very meaningful pace over the last decade, although repurchase activity has slowed down over the last couple of years. Rising investment income, which is currently responsible for about 40% of profits, has been a tailwind in the recent past, a trend that will likely persist in the long run. The combination of growing premiums, positive investment income growth, and some share repurchases should allow for some earnings-per-share growth, but profits will likely remain volatile on a year-over-year basis.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	7.4	6.3	6.5	8.1	8.1	26.7	47.8	13.0	31.6	9.5	13.3	10.0
Avg. Yld.	1.9%	1.6%	2.0%	2.2%	2.5%	2.1%	2.6%	2.1%	2.6%	2.3%	2.1%	3.2%

Everest Re has been valued at a relatively low valuation throughout the majority of the last decade. In 2017, 2018, and 2020, Everest Re's price-to-earnings ratio was well above the usual level, though, due to lower-than-normal profits. We believe that the price to earnings ratio will normalize going forward, as future profits are expected to be higher compared to these below-average years. Shares do trade above our fair value estimate right now.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2020	2022	2027
Payout	14.1%	10.2%	13.0%	16.0%	19.9%	55.5%	116%	26.9%	83.8%	21.5%	27.5%	31.8%

Everest Re's dividend payout ratio was very low during the majority of the last decade. In years when earnings were below average, or nonexistent, such as in 2018 and 2020, Everest Re's payout ratio rose to a high level. Due to the cash reserves that the company has, Everest Re was nevertheless able to maintain, and even grow, its dividend during those years. We believe that the risk of a dividend cut is not very high.

Everest Re is not operating in a business that is impacted by recessions, since people and corporations still need insurance, and insurers still need reinsurers, regardless of economic conditions. Everest Re's results are certainly still cyclical, though. An above-average amount of catastrophic events, or a single exceptionally large catastrophic event, such as a major hurricane, leads to increased payouts, however. Such events can therefore hurt Everest Re's profitability to a significant degree. Everest Re's results can thus still swing up and down widely on a year-over-year basis.

Final Thoughts & Recommendation

Everest Re is an insurer/reinsurer that has recorded attractive business growth over the last decade, although there were large swings in its profitability. Everest Re did have a strong fiscal 2021 as catastrophe losses declined versus 2020. Everest Re is forecasted to generate weaker earnings-per-share in 2021, however, due to the impact of above-average catastrophe losses. Shares trade well above fair value today, which is why we rate Everest Re a sell at current prices.
