Overview & Current Events

Ternium is the leading flat steel producer in Latin America, and has operating facilities in Mexico, Brazil, Argentina, Colombia, the southern U.S., and Central America. The company's steel products are sold to customers in the automotive, home appliances, HVAC, construction, capital goods, container, food, and energy industries. The company operates a fully-integrated production system, from the mining of iron ore to the manufacturing process of steelmaking and producing high value added products. Ternium S.A. trades on the NYSE under the ticker symbol TX as an American Depository Share (ADS). Ternium has a market capitalization of \$6.3 billion. TX has roughly 20,000 employees.

On November 3rd, Ternium reported third quarter 2022 results for the period ending September 30th, 2022. Ternium's steel shipment decreased 3% year-over-year to 2.967 million tons. Iron ore shipments fell by 2% compared to the previous year, to 831 thousand tons. The company achieved net sales of \$4.125 billion, a 10% decrease over Q3 2021's \$4.592 billion. Operating income decreased 70% to \$516 million. Adjusted EBITDA of \$679 million resulted in an adjusted EBITDA margin of 16%, much lower than the prior year's 41%. Adjusted EBITDA per ton was down from \$612 million in the prior year to \$229 million in Q3 2022. Earnings per ADS of \$0.78 was down heavily over the prior year's \$6.12 per ADS.

Leadership anticipates continued solid performance in 2022, however steel prices are decreasing significantly now. Costs for the steel industry had increased following the Russian invasion of Ukraine, which had previously caused a surge in steel prices. Steel prices have since fallen, but costs are still affecting margins.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$0.72	\$2.32	(\$1.01)	\$0.04	\$3.03	\$4.51	\$7.67	\$2.87	\$3.97	\$19.49	\$12.22	\$5.42
DPS	\$0.75	\$0.65	\$0.75	\$0.90	\$0.90	\$1.00	\$1.10	\$1.20	\$0.00	\$2.90	\$2.70	\$4.15
Shares ¹	196.3	196.3	196.3	196.3	196.3	196.3	196.3	196.3	196.3	196.3	196.3	196.0

Ternium's results have been cyclical, so earnings have been bumpy over the past decade, but the company has remained healthy overall over this time period. Increased demand for steel products has put TX in a good spot, as it set record 2021 earnings per ADS of \$19.49. Given the cyclicity of TX's earnings, certain year-over-year comparisons can be heavily skewed. Even so, over the last nine and five years on average, TX has produced earnings growth of 44% and 45% annually, respectively. Since the company is expected to report very strong results in comparison to its historic average, we believe earnings will contract by about 15% from these cyclical highs.

Ternium can grow its earnings by increased production through ramping up existing facilities or investing in new ones. Additionally, the increased demand and limited supply of steel products has caused a massive increase in the steel prices. Margin improvements across the vertically-integrated business could also boost the bottom line. The company has maintained its number of outstanding shares over the last decade quite steadily.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	10.0	50.0	11.6	15.3	50.0	7.1	6.4	3.8	13.1	5.9	2.7	6.5
Avg. Yld.	6.1%	4.1%	2.8%	5.3%	4.9%	3.5%	3.3%	5.1%	2.7%	3.5%	8.3%	11.8%

Given the strong outperformance for TX's earnings in 2022, the company has come to trade at a price-to-earnings ratio of 2.7, extremely below its average, even when excluding the 2013 and 2016 outliers. We estimate the company's fair value to be at roughly 6.5 times earnings. This would result in massive valuation gains of 19.5%, which will be offset by the estimated decline in earnings out to 2027. The company's yield is well above the average 4.1%. To note, Ternium pays a semiannual dividend, less frequent than the quarterly dividend most companies pay.

Safety, Quality, Competitive Advantage, & Recession Resiliency

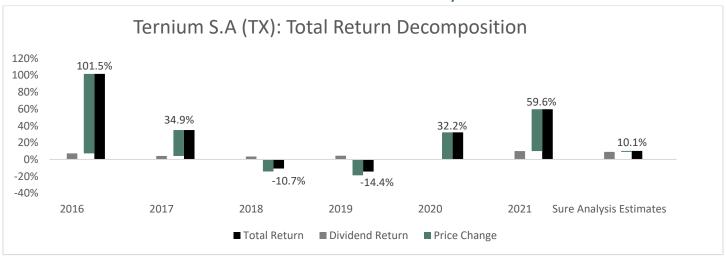

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	104%	28%	-74%	-	30%	22%	14%	42%	0%	15%	22%	<i>77%</i>

The cyclical nature of the company has shone through in the payout ratio where in at least three years out of the past decade, the company could not cover the dividend with earnings. The company did not pay a dividend in 2020 amidst the COVID-19 pandemic, but then paid a dividend in 2021 which was nearly double the size of the 2019 dividend. The company had no net debt at the end of the quarter. The lack of leverage reduces the risk profile of the company, but we don't believe them to be recession resistant given a decrease in demand for their steel products would impact the company. Ternium's Mexican facilities have logistical advantages within the Gulf Coast and a large portion of the West Coast. Additionally, TX's value-added services, including technical assistance related to steel use and production, and development of new steel products, is a competitive advantage.

Final Thoughts & Recommendation

Ternium is a highly cyclical company dependent on the demand and pricing of steel. Today the company appears to be on a downtrend from its cyclical top. We estimate a 15% decrease in earnings over the intermediate term. Combined with the 8.3% yield and estimated 19.5% in annual valuation expansion, we estimate total annualized returns of 10.1%. We rate TX as a marginal buy for investors who can stomach the volatility inherent in the steel market.
