Overview & Current Events

Automatic Data Processing is one of the largest business services outsourcing companies in the world. The company provides payroll services, human resources technology, and other business operations to more than 700,000 corporate customers. Automatic Data Processing was founded in 1949 and currently trades with a market capitalization of \$92 billion, producing annual revenue approaching \$18 billion. With 48 years of consecutive dividend increases, it is also a member of the prestigious Dividend Aristocrats Index.

ADP reported second quarter earnings on January 25th, 2023, and results were roughly in line with expectations, although the stock traded down following the report. Adjusted earnings-per-share came to \$1.96, which was two cents ahead of estimates. Revenue rose just over 9% year-over-year to \$4.39 billion, which met expectations. The company maintained its full-year guidance of 8% to 9% revenue growth, and ~16% adjusted diluted earnings-per-share growth. Adjusted EBIT was up 15% to \$1.1 billion, which was 24.3% of revenue. That was up 120 basis points year-over-year in terms of EBIT margin.

Employer Services revenue was up 8% on a reported basis, and 10% on an organic constant currency basis. Margin in the segment increased 170 basis points.

PEO Services revenue was up 11%, while margin rose 130 basis points.

Interest on client funds soared 77% to \$187 million, as the average interest yield on funds rose 90 basis points to 2.2%.

We continue to estimate \$8.10 in earnings-per-share for this year.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$2.80	\$3.11	\$2.89	\$3.25	\$3.70	\$4.53	\$5.45	\$5.92	\$6.02	\$7.01	\$8.10	\$11.90
DPS	\$1.70	\$1.88	\$1.95	\$2.08	\$2.24	\$2.50	\$3.06	\$3.52	\$3.70	\$4.05	\$5.00	\$7.35
Shares¹	484	483	466	456	445	439	436	429	424	416	410	380

Automatic Data Processing has compounded its adjusted earnings-per-share at a rate of nearly 9% per year over the last decade, which we believe it can come close to matching moving forward given that its recent earnings growth had been accelerating meaningfully prior to COVID-19. Beyond 2023, we believe the company is capable of delivering 8% annualized growth in earnings-per-share over full economic cycles.

Much of this growth is likely to be driven by the company's Professional Employer Organization (PEO) Services segment, which continues to deliver very impressive revenue growth. Importantly, this revenue growth has been accompanied by meaningful margin expansion, which means that the segment's growth has had an outsized impact on the firm's bottom line. In addition, the company's buyback has been a low single-digit tailwind annually for earnings-per-share growth in the past decade, and we expect that will continue moving forward. We see the company's fundamentals as very strong given recent results, and we think the company will grow at meaningful rates for a long time to come.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	18.7	21.8	24.5	29.0	26.0	27.0	27.1	26.8	27.7	29.1	27.3	29.0
Avg. Yld.	2.9%	2.8%	2.5%	2.3%	2.5%	2.3%	2.1%	2.2%	2.2%	2.0%	2.3%	2.1%

ADP has traded with elevated valuations in recent years, near 30 times earnings. The stock has fallen since our last update and shares are now below our estimate of fair value. Shares trade for 27.3 times this year's earnings-per-share estimate, which compares favorably to our fair value estimate at 29 times earnings. That implies a small tailwind to total returns in the coming years from valuation expansion. We see the yield remaining near 2.0% in five years, in part thanks to strong forecasted dividend growth.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	61%	61%	68%	64%	61%	55%	56%	59%	61%	58%	62%	62%

What immediately stands out about ADP's quality metrics is the high levels of debt. Fortunately, the vast majority of this debt is in the form of client fund obligations – money that is held by ADP before being paid out to the employees of its corporate customers. These client fund obligations are actually a source of competitive advantage, as they behave like insurance float and allow the company to invest the proceeds into low-risk investments and generate additional investment revenue. Indeed, the company's long-term debt is quite minimal, which leads to very high levels of interest coverage. Its scalable business model means that minimal additional assets are required to service the payroll needs of more customers. Accordingly, client fund obligations as a percentage of total assets will naturally expand over time.

Recessions will undoubtedly harm earnings potential given that ADP needs people to be employed, but it held up very well during the last recession and performed better than expected during the COVID recession. The rebound out of COVID conditions is well underway and ADP is firing on all cylinders out of what was a very short recession.

Final Thoughts & Recommendation

The company continues to see strong revenue and earnings estimates for this year. However, with the improved valuation, we are upgrading the stock from hold to buy on 11.3% projected annual total returns, which stem from 8% earnings growth, a 2.3% dividend yield, and a 1.2% tailwind from the valuation.
