Overview & Current Events

Sherwin-Williams, founded in 1866 and headquartered in Cleveland, OH, is North America's largest manufacturer of paints and coatings. The company distributes its products through wholesalers as well as retail stores (including a chain of more than 5,000 company-operated stores and facilities) to 120 countries under the Sherwin-Williams name. The company also manufactures *Dutch Boy*, *Pratt & Lambert*, *Minwax*, *Thompson's Waterseal*, *Krylon*, *Valspar* (acquired in 2017), and other brands. Sherwin-Williams generated annual sales of \$22 billion last year and has a market capitalization of \$59 billion. With 44 years of consecutive dividend increases, Sherwin-Williams is a member of the Dividend Aristocrats Index.

On February 16th, 2022, Sherwin-Williams declared a \$0.60 quarterly dividend, marking a 9.1% increase.

On January 26th, 2023, Sherwin-Williams released Q4 and full year 2022 results for the period ending December 31st, 2022. For the quarter, Sherwin-Williams generated revenue of \$5.23 billion, a 9.8% increase compared to Q4 2021. This was driven by a 15.7% increase in the Americas Group and a 4.2% increase in the Performance Coatings Group, offset by a -2.4% decline in the Consumer Brands Group. Adjusted earnings-per-share equaled \$1.89 versus \$1.34 in Q4 2021.

For the year Sherwin-Williams' consolidated net sales increased 11.1% to \$22.15 billion. Adjusted earnings-per-share equaled \$8.73 compared to \$8.15 in 2021.

Sherwin-Williams also provided 2023 guidance, anticipating sales to be down by a mid-single digit percentage to flat, and adjusted earnings-per-share of \$7.95 to \$8.65. We have initiated our forecast accordingly.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$2.42	\$2.93	\$3.72	\$4.00	\$5.02	\$6.18	\$7.04	\$8.19	\$8.15	\$8.73	\$8.30	\$12.77
DPS	\$0.67	\$0.73	\$0.89	\$1.12	\$1.13	\$1.15	\$1.51	\$1.79	\$2.20	\$2.40	\$2.40	\$4.04
Shares²	300	284	277	279	282	279	276	276	267	262	255	240

Sherwin-Williams has put together an exceptionally strong growth record in the past, with earnings-per-share growing at a 12.1% average compound rate in the 2007 through 2022 period. This was driven by solid top line growth, significant margin improvement and a lower share count. The company posted especially impressive results in the 2018 – 2020 period, despite coming off a larger base. However, it is important to point out that some of this has been driven by one-time items such as a decline in the company's tax rate.

While Sherwin-Williams' historical growth rate is outstanding, we believe that the company is unlikely to replicate this performance moving forward. Indeed, the midpoint of management's 2023 guidance indicates a decline this year. We believe that Sherwin-Williams can deliver 9% annualized earnings growth over a full economic cycle. Growth can come from several factors, including revenue expansion – resting on higher sales at the company's existing stores – margin improvement, share repurchases, and general economic growth. The company has reduced its share count by ~20% over the last decade, and we believe that the number of shares will continue to decline, albeit irregularly, over time.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	24.3	24.1	24.3	23.2	22.8	22.2	23.2	24.9	34.6	31.2	27.4	23.0
Avg. Yld.	1.1%	1.0%	1.0%	1.2%	1.0%	0.8%	0.9%	0.9%	0.8%	0.9%	1.1%	1.4%

Sherwin-Williams has been a high-quality growth name during the last decade and indeed over the company's history. As a result, shares have generally commanded a premium valuation – trading hands around 25 times earnings on average during the last 10 years. Given a slower anticipated growth rate, we are using 23 times earnings as a starting point for fair value. With a multiple near 27 times our expectation of this year's earnings, shares could face a valuation headwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	28%	25%	24%	28%	23%	19%	21%	22%	27%	27%	29%	32%

Sherwin-Williams has raised its dividend consistently for decades, but its dividend payout ratio has never risen to a high level. While the dividend appears exceptionally well covered, the combination of a low payout ratio and above average valuation make for a lackluster dividend yield.

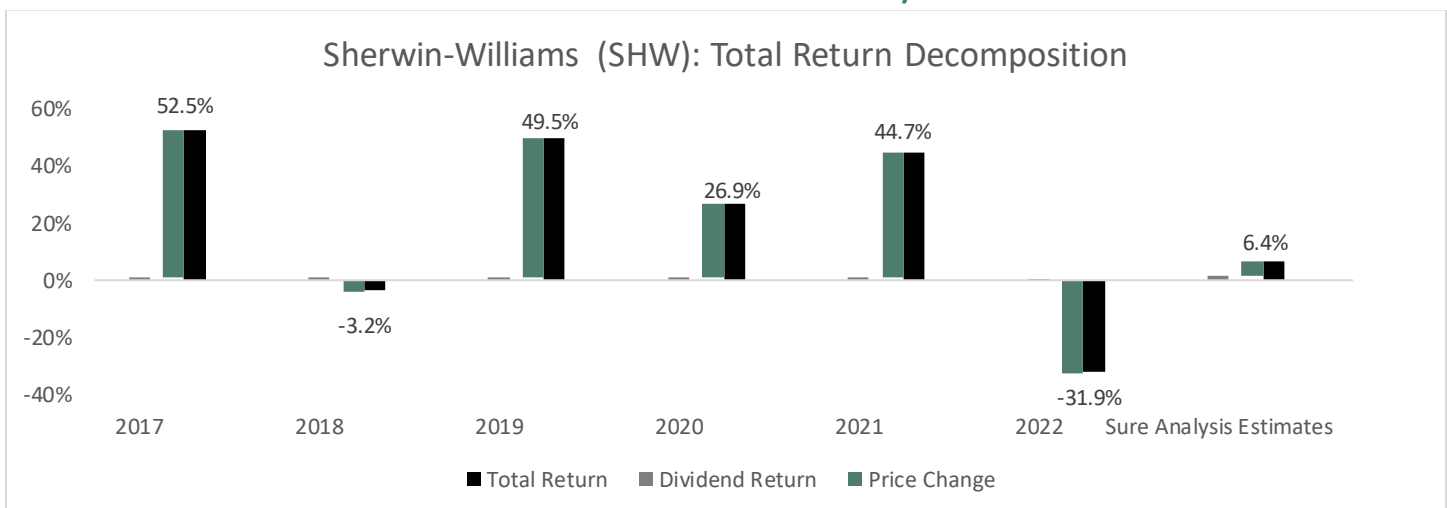

Sherwin-Williams is not necessarily in a high-growth industry, but its entrenched position offers the company its fair share of competitive advantages, allowing the business to grow consistently. Further, acquisitions are a way for Sherwin-Williams to enhance its presence, with the Valspar transaction being a good example.

During the Great Recession Sherwin-Williams posted earnings-per-share of \$4.70, \$4.00, \$3.78, and \$4.21 over the 2007 through 2010 stretch (with a growing dividend). This is somewhat surprising for a company in the paints and coatings industry – generally thought to be a cyclical business – but illustrates the underlying strength of the company. The company has held up quite well during the pandemic as well.

Final Thoughts & Recommendation

Shares are down -19% in the last year. We are forecasting 6.4% total return potential, stemming from 9% growth and a 1.1% starting dividend yield offset by the potential for a valuation headwind. While we are not enthused by the current valuation, we are encouraged by the underlying strength of the business. Shares earn a hold rating.
