Overview & Current Events

Founded in 1994 and named after Alexandria, Egypt - in homage to the scientific capital of the ancient world - Alexandria Real Estate Equities owns and operates life science, technology and agtech campuses across North America. Key locations for this Real Estate Investment Trust (REIT) include Boston, San Francisco, New York, San Diego, Seattle, Maryland, and the Research Triangle (North Carolina). The \$27 billion market cap company focuses on high quality properties in prime locations.

Alexandria's business model has taken on renewed importance as a result of the COVID-19 pandemic, as a significant number of the company's life science tenants are working on solutions for the crisis and similar future crises.

On May 31st, 2022, Alexandria increased its quarterly dividend by 3% to \$1.18.

On January 30th, 2023, Alexandria reported fourth quarter and full year 2022 results for the period ending December 31st, 2022. For the quarter, the company generated \$670 million in revenue, a 16.2% increase compared to Q4 2021. Adjusted funds from operations (FFO) totaled \$354 million or \$2.14 per share compared to \$304 million or \$1.97 per share in Q4 2021.

For the full year, Alexandria generated \$2.6 billion in revenue and \$8.42 in adjusted FFO, an 8.5% increase from 2021.

Alexandria ended the quarter with \$5.3 billion in liquidity. About fifty percent of the company's tenants are investment-grade or publicly traded large cap businesses.

Alexandria initiated 2023 guidance, with the company anticipating \$8.86 to \$9.06 in adjusted FFO, for an \$8.96 midpoint.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
AFFO	\$4.33	\$4.80	\$5.25	\$5.51	\$6.02	\$6.60	\$6.96	\$7.30	\$7.76	\$8.42	\$8.96	\$11.44
DPS	\$2.61	\$2.88	\$3.05	\$3.23	\$3.45	\$3.73	\$3.94	\$4.18	\$4.45	\$4.72	\$4.84	\$6.18
Shares²	68	71.1	71.5	76.1	91.6	111	120.8	136	147.5	161.7	162.0	180.0

Note that we are using adjusted FFO instead of earnings-per-share, as this better reflects the underlying earnings power of a REIT. Dating back to 2013, Alexandria has increased FFO per share by an average compound rate of 7.7% per annum and the dividend by 6.8% per annum. Impressively, the company has not failed to grow its FFO every year in the last decade.

Moving forward we believe Alexandria can continue to grow at a reasonable pace and we are expecting 5% intermediate-term growth, just shy of the company's historical rate. This could be too conservative given that the pandemic appeared to help, not hurt the business. Alexandria provides critical infrastructure for the companies that are battling the COVID-19 pandemic. Moreover, the REIT has a unique "cluster model" which focuses on providing proximity to world-renowned academic institutions, leading scientific and managerial talent, and sophisticated investment capital.

Alexandria Real Estate Equities (ARE)

Updated January 30th, 2023 by Quinn Mohammed

This, combined with new developments and progress in life science, should provide a long runway for growth. Of course, issuing shares and managing the company's debt load are two counterbalancing factors.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
P/FFO	16.1	16.1	17.7	16.8	20	18.2	19.7	21.6	24.2	19.7	18.0	18.0
Avg. Yld.	3.7%	3.7%	3.3%	3.5%	2.9%	3.1%	2.9%	2.6%	2.4%	2.7%	3.0%	3.0%

In the last decade, shares of Alexandria have traded hands with an average multiple of about 19 times FFO. We are using 18 times FFO for a starting fair value baseline. Shares are presently trading at 18 times expected FFO which implies no change to the valuation in the next five years.

Meanwhile, the dividend has been increasing at a solid rate and should continue to aid in shareholder returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	48%	60%	60%	58%	59%	57%	57%	57%	57%	57%	56%	56%

Alexandria has put its competitive advantage on display in its FFO and dividend record during the past decade. This stems from focusing on quality properties in prime locations in a needed and growing industry. Moreover, the cluster model is a unique attribute that Alexandria continues to leverage very well.

As of the last quarterly report, Alexandria had a net debt and preferred stock to adjusted EBITDA ratio of 5.2x and a fixed-charge ratio of 5.0x. These metrics could be better, but we are encouraged by the quality of the company's tenants along with the idea that there are no debt maturities before 2025 and the weighted average remaining debt term is 13.2 years.

During the last recession, FFO dipped -23% in 2010 and the dividend was slashed from \$3.18 in 2008 down to \$1.50 in 2010. While the company performed well throughout the pandemic, this is something to keep in mind, nevertheless.

Final Thoughts & Recommendation

Shares are up nearly 12% year-to-date, and trade at our fair value estimate, thus offer virtually no margin of safety. Alexandria offers quality properties in prime locations and has a very good track record. Moreover, the company's campuses have become a critical component in the battle against the pandemic. Total return potential comes in at 7.8% per annum, stemming from 5.0% growth and a 3.0% starting yield. Shares continue to earn a hold rating.
